Cambria freeman.

EBENSBURG, CAMBRIA CO., PA.

FRIDAY, - - - APRIL 21, 1893.

MEETING OF THE DEMOCRATIC

COUNTY COMMITTEE. It is now only six weeks until the time fixed for holding the next primary election. Up to this time there are no candidates announced for the principal office, County Treasurer, and the prospects are that there is continued, as the expense entailed on candidates is unreasonable and too burdensome to bear. Believing also that it is unwise on the part of the Democracy to make their nominations five months before the election, I take the opportunity of calling the County Committee together for the purpose of considering the propriety of changing the time of making nominations to a later date, and of adopting some other system of nominating candidates. With the above stated objects in view, I hereby request the Democratic County Committeemen to meet at the Opera House in Ebensburg on MONDAY, MAY 8TH, 1893, at 1 o'clock, P. M. or the purpose aforesaid. I would suggest that each member of the County Committee consult his constituents on the subject so that any action taken by the Committee will be endorsed JAS. G. HASSON. Chairman Democratic County Committee

On Tuesday President Cleveland appointed William Wilkins Carr to be postmaster at Philadelphi , vice John Field, who a short time ago sent in his resignation.

ABOUT three o'clock Friday morning a train dispatcher's mistake brought an extra freight train running east, and an extra freight train going west, together with terrible force just east of Roxton, N. J., on the Trenton cut off of the Pennsylvania Railroad. Both engines and twenty cars were wrecked. Brakeman C. W. Striker was killed and Eugineer Hickle injured.

THE World has gathered the opinions of the leading physicians of New York, and the health officials, on the probabilities of a cholera epidemic this summer. On the whole, a careful review of what these medical experts say leads to the conclusion that a cholera epidemic is not probable. There is an almost unanimous belief that we will have some cases of cholera during the hot months. The doctors, however, point out clearly the reasons why these sporadic cases are not likely to become epidemic.

THE position of Assistant Treasurer of of the most important, from a strictly commercial point of view, under the Government. He handles more money than any man in the country and has to give a bond of \$200,000, something that comparatively few men can do. The nomination of Mr. Conrad N. Jordan, of New York, who was the United States Treasurer during President Cleveland's first administration, to this position gives general satisfaction, both in political and business circles.

COAL, says the Philadelphia Record, has lately been sent, from Philadelphia to Hamburg, Palermo, Cuba, Colon, Porto Rico, Martinique and St. Thomas by steamers, and shipped in sailing vessels to San Francisco, Laguayra, and Mexican ports. These shipments were not made in ballast, but on orders for commercial use. Coal is going from the Virginia coal fields to Spain and Brazil. From this time forth it is evident that the world's supply will be drawn less and less from the deep mines of Great Britain and more and more from our own

In the State Senate Tuesday Mr. Lemmon, of Blair, secured the passage, by a vote of 163 to 10, of a bill which empowers boards of health to placard all houses in which smallpox, diphtheria, diphtheretic croup, scarlet fever, typhns fever, or cerebro spinal meningitis may exist. Persons dying of any of these diseases must be coffined inside of six hours and buried within thirty-six. Funeral immediate adult relatives. They must not be held in a church or public buildpromptly disinfected. Penalties of \$5 capacious coal bunkers." to \$100 or up to sixty days' imprisonment are provided for violations.

JUDGE LATIMER, of York county, has given an important opinion affecting the Baker ballot act in the case contesting the election of Mayor Loucks, Republican. The officers in the recent election rejected thirty-three votes because the voters placed their marks at the proper places opposite the party designation and crossed over into the opposite the names of candidates other than mayor. The court decided that a group so marked was a vote for every man in it except the one against whom a cross had been made in the opposite column. He also held that ballots not marked in the proper place should be rejected. By this voting Mayor Loucks' majority was increased twenty-two.

At the conclusion of the World's Fair, the monster Krupp gun, the biggest piece of ordinance in the world, will be tifications. The works will be of earth, as stone is no longer of value to resist the terrible assault of modern implements of war.

occupied by the big gun. It can pro- pete with the proposed one on the New tect Chicago from its north coast to its York Central running between New York its southern, as expert gunners can and Chicago, will be run by the Trenton obtain an accuracy of marks cut off, thus running a number of miles manship that will enable them to north of Philadelphia. It will not enthrow a shot weighing nearly a ton clean | ter that city. through a man of war. One shot is guaranteed to send the largest craft affoat to the bottom.

IF, as reported, says the Pittsburg Dispatch, Mr. Cleveland has taken a definite stand against the annexation of Hawaii, he is to be congratulated on having been superior to the temptation of letting the hullabaloo of Jingoism override the dictates of sound com-

This is solely from the standpoint of the needs of this country. The United States have grown great and prosperous will be none if the Crawford county system and minding their own business. They have no more need for Hawaii than they have for the Azores, or the Shetland Islands, or any other group thousands of miles from our nearest coasts. It has no desire for an addition to its population, composed chiefly of Hawaiians and Japanese, who must be either admitted to our citizenship or held in a condition of subject utterly alien to to the fundamental principles of our government. Such an acquisition would e an expense and danger without the slightest compensation in the way of advantage to the masses of our people.

The United States Government can discharge its full duty to Hawaii by protecting American Interests there and guaranteeing the independence of whatever government the people of those islands may prefer. Beyond that it has no duty that calls for a departure from its traditional policy.

Senator Lloyd has drafte t a new road bill, which he will endeavor to substitute for that instituted by Senator Brown of Westmoreland. Mr. Lloyd's proposition is to form each county into the municipal corporation for road purposes, elect one delegate from each township and an additional delegate for each 200 of population to a county convention to meet every five years. This convention shall have power to pass all necessary ordinances for the construction, laying out and maintenance of roads in their respective counties, and to levy the needful taxes. A maximum rate of taxation will be fixed. It is thought that all the necessary work of these conventions can be performed during a two-weeks session, and a section of the bill will make provision for the compensation of delegates for that time. It is doubtful whether he can secure the substitution, as nearly all of the Republican Senators and some of the Democrats are already committed to Senator Brown's road scheme.

A DISPATCH from Washington on Tuesday says: Rapidly but quietly a transformation is taking place in the characof employes at the Homestead works Carnegie and Frick are replacing most of their white laborers and mechanics with olored men from this city and other have been sent to Homestead and sursounding factories from Washington alone. This supplanting of white men with colored laborers and mechanics has ong been contemplated as a preventive against strikes. There is a number of manufacturers here from Pennsylvania and states northwest, probably looking after the question of colored labor, for they claim that colored labor is not only better for all unskilled and much of the skilled work about the factories, but that it is more tractable and contented. It is proposed to pay colored laborers and mechanics from \$1.50 to \$3.50 a day, the latter being for semiskilled la

INVENTOR SHEEFIELD, of New York, laims to have discovered a marvelous motor, more powerful than steam, whereby it will be possible for ocean steamers to make a trip to or from Queesstown in a number of capitalists with faith in the scheme, as he declares that \$50,000 has already been subscribed to enable him to make a demonstration of the practicability of the invention. If the claims put forth in its behalf be not oversanguine, "all that would be needed to supply the necessary force to drive a steamship like the Teutonic across the ocean in three days would be a barrel of ordinary powdered sugar, a barrel of chlorate of must be private and attended only by potssh and enough sulphuric acid to supply the combustion needed to keep the machinery in motion. There would ing, and the vehicles used must be be no more need of mammoth boilers or agined that the latter was in some way

> Imports of potatoes have been much larger during the last eight months than they were in the corresponding period in the previous fiscal year. The actual figures are 1,835,691 bushels, as 63,044 oushels, in the eight months tollowing June 30, 1891. At the old rate of duty these imports would have been taxed a little over \$295, 000, but the Mckinley act raised the tariff rate on potatoes from 15 to 20 cents per bushel. That beneficent measure is, therefore, responsible for the increased exaction of something over \$133,000 on the foreign potatoes furnished to American consumers during the last winter. And, incidentally, it has helped to increase the cost of up on their tables, as well as to add to the price which farmers, whose crop was destroyed. short last year have been obliged to pay

Huns Attacked by Italians.

HAZELTON, PA., April 16 .- The trouble which has been brewing between the Huns and Italians of Milnesville and vicinity for some time terminated last night in a bloody battle. As a result two men are dead, two missing, supposed to be at the bottom of a mine hole, and three others seriously wounded.

A party of four Huns were coming snowballs soaked in water, into Harleigh. when they were attacked by 11 Italians, who opened fire. The City is after the bones of old Peter Stuy firing was a signal for a concerted attack vesual for the World's Fair. on the part of the Italians, who seemed to swarm from the woods on every side. About 200 yards further on a half dozen other Huns were at the school honse. and on the Harleigh road, near by, other Hungarians were met. The fight that ensued was terrific. The Hungarians, after the first onslaught, prepared to defend themselves, and a volley of bullets, sent into the attacking Italians, served to check them for a moment. It was Ind. Suicide over whisky. only for a moment, however, as the next instant they closed in and a fierce handstilleto playing havoc with the huns. The latter were outnumbered largely, and becoming dismayed, broke and fled

In the several boarding houses in Hareigh, Lattime and Hollywood there are a number of wounded men, but it is impossible to obtain the exact result of their injuries or names.

precipitately.

Almost a Lynching.

Sr. Louis, April 17.-Early this evening Andrew Gallagher attempted to entice an 11-year-old girl named Ida Widner into a hotel near the corner of Ninth and Chestnut streets. She refused to listen to his entreaties and when he attempted to grab her she screamed. Instantly a crowd assembled, Gallager was seized and one man, who afterwards turned out to be Ida's father, cried,

A rope was procured and the crowd with Gallagher in their midst started for heard over 60 miles. the corner, where there was a convenend having been placed around Gallagher's neck, two loads of policemen arrived, and after a brief srtruggle they captured the prisoner and placed him in

Washengton, April 17.—The treasury department was advised this afternoon that during the day \$1,750,000 in gold Southern points. Already 800 negroes | had been withdrawn from the New York | sub-treasury for shipment to Europe by steamer sailing to-morrow. The day begun with \$1,790,540 in free gold in the treasury. Deducting the amount taken out there is now left \$40,560 of free gold in the treasury. Treasury officials are encouraged to hope that by Saturday, the next shipping day, the free gold may be increased to a sufficient sum to meet the export demand. Mr. Jordan is expected to assume charge of the sub-treasury next Wednesday and near Blairstown, N. J., gave birth to four talk on the situation.

Bynamite Outrage at Sharpsburg.

Pittsburg, Pa., April 17.-An explosion occurred at the Vesuvius Iron Works, Sharpsburg, late Saturday night, which wrecked the battery of boilers, local option meeting a few nights ago said: but resulted in no other damage. The explosion was caused by a dynamite cart- ley? Just give Becker a dollar and he'll ridge mysteriously placed on the coal bring you all the beer you want." stack. It is believed that an attempt was made to blow up the mill. Since the feeling against the negroes is very bitter. There are one bundred and fitty men, mostly colored, working near the injured is providential. A thorough investigation is being made.

Late last night Stewart went to the house and upon obtaining admission forced his way into Miss McDonald's room. He asked her for an explanation. She told him she knew nothing of the trouble. Drawing a revolver Stewart shot the girl dead. He at once gave himself up and was taken

Fire in a German Palace.

BERDIN, April 18 .- A fire broke out last night in the eastern wing of the Hohenzollern Palace at Sigmaringen and did an immense amount of damage before the flames were extinguished. The Palace stands on a rock rising abruptly from the Danube, and it was extremely from the Danube, and it was extremely difficult to get sufficient water to the high altitude of the palace. The fire burned throughout the night, and that part of the structure known as the Furstall other potatoes which have been served enbau was completely gutted. The Palace contained a great number of priceless; works of art, and many of these were
