This dog tax law is simply a law the latter, if there are any premonitions at | giving dogs a license to kill sheep. What we want is a law to protect our sheep, not the dogs. No man wants his sheep killed by dogs at any price. I am surprised at Governor Pattison for putting his name to such tom foolery dog laws. Kill the dogs or keep them under a chain or muzzle, i they are worth keeping at all. I have no kent any dog for three years, and can't see any earthly use for a dog. The colt, the calf and the little lambs are all born with their eyes open and in a few hours are ready to flee with their dam's for life. But mite different with the "purp," as he can't see for nine days. Nature provides wisely. It gives you nine full days to kill him. A dog is a nuisance to cattle, they are a nuisance to hogs, they are a nuisance to sheep, they are a miserable nuisance in the house, and they are as often a nuis ance outside as otherwise. A number of dogs, or a cross dog at a place denotes that the owner has not taken the highest degree in the society of civilization. In nearly every local newspaper you will se the account of some innocent sheep being slaughtered by some worthless curs. have partly been fertilizing my farm with dogs for several years and I intend to continue. The question was asked a man once what his dog was good for, he couldn't say. Is he good to drive cattle? No. Is he good to drive hogs? No. Is he good to drive sheep? No. Is he agood watch dog? No. Well is he good for coons? Well I guess he must be good for coons for he is good for nothing else. To be governed by the amount of dogs in this part, there would be no less than five million dogs in the United States, counting ten dollars year each to feed them would make lifty million dollars worth of feed fed to dogs. and pigs. Our forefathers were not annoved in their day with bears and wolves making onslaughts upon their flocks, as the farmers are to-day with dogs. We are safe in saving that there are more wolves in the country now than there ever was as the dog and wolf are both members of the canine family, and in a number of instances, bear a strong resemblance and in herits a love for mutton. The law still remains \$12 on the scalp of a wolf. Why

> hould there then not be at least \$2 on th scalp of a dog, when tresspassing. John Rickets.

N. B .- It may be of interest to you to say we are still deep in the grocery business. It will surprise you to see the way we are selling goods in this department of our mammoth store. Some merchants say "I wonder where they can get goods to sell at those figures, as we can't buy them wholesale at the prices they are retailing for." Here is the the secret: We know where the goods grow-that is why

we sell so low. And when you come to town, Look for the Red Flag--That is the Place.
