The Republican party leaders waived the bloody shirt until it was threadbare; they cried for protection until the workingmen were tired of being duped; now they are tearing their hair and uttering the calamity howl although the country is every day making strides to renewed prosperity which was banished by Republican legislation which only inured to the benefit of corporations and trusts. The leaders must believe that the people have no intelligence, that they read nothing, know nothing, and that they can be fooled all the time.

Rothrock says:

"The reason more prompt means are not taken by the authorities to suppress forest fires in the state is simply because it is to big a problem for the counties. The law requires the county commissioners to appoint persons to 'ferret out' those who start fires, but it also provides that such service shall be paid for by the counties themselves. This is a gross injustice; first, because it places the heaviest burden on the weakest counties, which have the largest woodland area and the smallest population from which to raise taxes; and, secondly, because the state at large is as much interested in the suppression of these fires as the

Washington, D. C., Sept. 29, 1894,-Chairman Faulkner, of the Democratic congressional campaign committee, consented this week for the first time to give out his estimate of the result of the congressional elections. He figures, after making a most liberal allowance for doubtful districts-too liberal many Democrats think-, that there will be in their candidates for the state ticket and the next house 190 Democrats, 156 Republicans and 10 populists. As instances of his liberality in making allowance for doubtful dist icts it may be mentioned that he only claims the election of nine Democratic representatives in Illinois, while the estimate of the Republican campaign committee concedes the election of all Democrats in that state; ne only claims 5 in Louisiana, while the Republicans concedes 6, in South Caromaking up his figures. He prefers unoverestimating it, and has no desire to encroach upon the bluster and bragging

which has been such a marked feature of the campaign on the Republican side. Senator Hill is just the sort of man who makes strong friends and bitter enemies in his own party, but the bitterest of his enemies will concede that he has a wonderful hold on the Democratic voters of New York, which he has demonstrated time and time again. Cirumstances having made it necessary that the Democratic candidate for governor of New York should be a man who could bring out the full Democratic vote of the state, which is always a majority, it logically followed that Senator Hill was that man. For that reason Democrats in Washington, whether they be his friends or his enemies, were and are confident that he will be elected. He has never been defeated by the voters of New York and he will not be this year. There is much disappointment over Senator Hill's nomination, but it is confined to the Republicans who were not counting upon such a formidable antagonist. A member of the cabinet was asked by a personal friend how he supposed President Cleveland would regard the nomination of Senator Hill, and he quickly replied: "Why, just as all other good Democrats do; as the best you to give earnest attention to general that could possibly have been made unorganization and special organization in der existing circumstances. The President wishes New York to be carried by the Democrats, and I know he believes that with Senator Hill at the head of the ticket it will be." "But what about 1896?" queried this inquisitive friend. "Let us win the campaign of '94' replied the member of the cabinet; "then we can begin to discuss the probabilities

Nothing around that establishment has of the men worked under. It made a better done. It is certain that the pubc printer will be enabled to devote that he has heretofore been compelled to waste in listening to the friends of those working on time who wished to get transferred to the piece department, beise they could make more money. The new tariff abrogated all the recicity treaties made under the McKinlaw, and the formal notice served on the -tate department by Brazil of s intention to abrogate the reciprocity treaty between that government and the S. on January 1, 1895, was merely a ompliance with the expressed terms of the treaty, which were that either ntry should give the other three months notice. So far as this country was concerned, the treaty was abrogated the day the new tariff became a law. Mr. Mendonca, the Brazilian Minister, when asked what effect he thought the abrogation of the treaty would have upon the trade relations of the two untries, said: "The rates will not be materially raised by Brazil against this intry, and I am expecting this country to make large increase in sending manufactured woolens to Brazil as a re sult of the new woolen manufacturing induced by free raw wool in the new tariff law. Outside of these items few changes will occur by the termination of the reciprocity.

An Express Held Up.

Phenix, Ari., October 1.—The Southrn Pacific east bound express was held up two miles east of Maricopa late last night by three men, two of whom were masked. They boarded the train as it was leaving Maricopa, capturing the head brakeman. He was compelled to turn on the air brakes and stop the train. The engineer and head brakeman with pistols at their heads, were compelled to go back to the express car and induce messenger to open the door. One of the bandits was then put in the car and searched for valuables while the others guarded each side of the train. The amount taken is not known, but it is supposed to be small. The trainmen were then marched away a short distance and liberated, the robbers mounting their horses and striking southward. Sheriff Drais, of Pinal coanty, and Sheriff Murphy, of Maricopa, were at once telegraphed for. Drais sent a posse from Cassa Grande to the scene of the robbery, while Murphy sent several posses out to intercept the fugitives. Sheriff Murphy reached the camp of the suspected men, seven miles east of the city, about 8 o'clock this morning. The enly occupant was Frank Armour, a cowsoy, who commenced shooting as soon as the officers came in sight. The officers returned the fire with shotguns, mortally wounding their man. The The robbers' horses, badly jaded, were found near by, as well as their rifles, but the confederates had disappeared. Deputies and posses are in pursuit and it s expected they will soon capture them. The men are undoubtedly the same who robbed the Columbus stage several weeks ago. the throes of death and destruction. The wind was terrific in the extreme, trees, telegraph, telephone and electric light poles were uprooted and carried a distance of two hundred yards. The roofs of about thirty of the largest buildings in the city were torn from the house and hurled against buildings on the opposite side of the street, leaving the occupants and property within the mercy of the drenching rain which began to fall in torrents shortly afterwards.

At 11 o'clock to night a message was received from the insane asylum, situated two miles from this city, and the state penitentiary, just west of the Union depot, calling for a corps of physicians and other assistance. It is reliably stated that a number of patients at the asylum are fatally injured and great pleased with Senator Hill's nomination damage was done to the building. Reports from the penitentiary say six convicts were badly injured by falling timbers, two of whom will die.

The wagon was on its way to the powder company's wharf, and it seems miraculous that the powder did not explode, in which event the train would probably have been wrecked. The driver, George Lutton, was brought to this city and placed in the hospital. He was unable to give any information about the accident.
