

Cambridge Freeman
PUBLISHED WEEKLY
CAMBRIDGE, PA.,
OCTOBER 3, 1894.

—Now that the time will soon come to hand for setting up stoves it will be interesting for housewives to know that the mica or insulating lights in stove doors, if soiled from smoke, may be made bright and equal to new by cleaning with salt mixed with vinegar.

—The registration of voters of Fayette county has closed and the books show about 1,000 more voters in the county than ever before the total being 19,203. The increase is due to the importation of the colored men into the region and the naturalization of foreigners.

—Last Saturday afternoon, while W. R. Simpson, a Mt. Pleasant hotel proprietor, was taking some money from the till, a man named Shanfer reached over his shoulder and grabbed a handful of cash. He then made a dash for liberty but was captured and locked up.

—Ruben DeHaven, who was struck by an engine at Lilly one day last week and reported to have been cut in two, it seems escaped being fatally hurt. He was taken to the hospital and the wound was supposed by some of the passengers who witnessed the accident to have been killed but they were mistaken.

—William Armstrong, a brakeman on the Beech Creek railroad, had his left arm caught between the bumpers while coupling cars at the Reilly mines, near Portage, Pa. The arm was crushed and the member broken below the elbow. He was taken to Patton where Dr. Wardell gave him the necessary medical attention.

—The Italian who was arrested a couple of weeks ago charged with committing an assault and battery with intent to commit murder on Miss Bush, of Blacklick township, had a hearing on the charge on last week before Squire Jones, of this place, and was positively identified by Miss Bush. He was committed to jail to await trial.

—A horrifying accident befel a little child of Mr. and Mrs. John C. Mammola, on Wednesday afternoon. The child, one who was about 10 months old, and after an hour's search was discovered in the water closet vault dead, having smothered to death. The mother is almost crazed over the fate of her child and refuses to be comforted.

—James McCullough, aged thirty years, of Pine Creek township, Jefferson county, committed suicide Monday night by taking poison. He had been drinking hard for several days. When he went home he informed his wife that he was going to kill himself, and immediately put the poison into execution, dying before a physician could be summoned.

—Grant Woods, a citizen of Johnstown, on Tuesday last while out in the country gathering chestnuts, fell from a tree to the ground, a distance of thirty feet. He was picked up unconscious and remained so for several hours, but recovered from the effects of bringing him to. Besides being badly shaken up, he has three ribs broken and a wrenched back.

—On Wednesday night of last week a dwelling owned by Miles Whigley and occupied by Mrs. S. Lamb, in Mahanoy, caught fire while the latter and her family were at church, and together with her contents was burned to the ground. Besides the clothing and furniture, \$100 in money in a trunk on the second floor was consumed by the flames.

—Joseph Lomas, a Hungarian by birth, who resides at Kittanning Point, while walking on the railroad track near Glen White was struck by a car, knocked down and had his right arm crushed by the wheels on Wednesday. He was taken to the Altoona hospital, where the doctors amputated his arm. He is 29 years of age and single.

—Mr. John Ricketts, of Reade township, spent a short time in town on Wednesday evening and Thursday morning. Mr. Ricketts is one of the democratic nominees for assembly, and his plain, honest manners captivate all whom he meets, as they show he is a man of the people, and one whose heart will be with the people if he is sent to Harrisburg.—Hastings Tribune.

—Attorney General Hensel has instructed Superintendent of Public Instruction Richard Schaeffer that school boards issuing bonds containing the words "free from all taxes," are required to pay tax on the bonds. He says this form of bond establishes a contract between the board and the owner of the bonds to relieve him of any tax on them, and that the board is liable for the state tax.

—The Democrats of Lilly, had a large and rattling Democratic meeting on Wednesday evening, held under the auspices of the new Democratic club. Dr. A. R. Kriels was chosen chairman; Aaron Leahy, Esq., vice president, and Fletcher C. George, secretary. The meeting was addressed by Thomas J. Burke, of Altoona, candidate for congress; J. F. McKenrick, Esq., of Ebensburg; Hon. L. D. Woodruff, Robert E. Cresswell, Esq., and T. J. Hoel, Esq., of Johnstown.

—On Wednesday forenoon Mrs. Cornelia Porter, of this place, took her brother, Mr. Randolph Myers, who has been an invalid for several years, out for a drive. On their return, when Mr. Myers was being assisted out of the buggy, the horse started, and one of his legs got between the spokes of the wheel of the buggy, and before the latter could be stopped, one of the bones in his ankle was broken. Mr. Myers has been sick for several years and this additional misfortune is a severe one.

—Adam Volenberg and Michael Molzin, two miners, while at work in the Mill mine at Johnstown, were caught under a fall of coal, the former killed while the latter escaped with a few slight bruises. Molzin was working near a car at the time the accident happened and when the crushing mass fell the car held the weight from him and saved him from the fate of his companion. The deceased was a widower aged forty-five and had been in this country only a few months. He leaves six children in Germany.

—A New Coke Process
The Cambria Iron Company will soon commence the erection of retort ovens at Johnstown to manufacture coke under the Otto-Hoffman process, the patents for which were recently purchased by the Otto Coke and Chemical Company, the Cambria Iron Company being the principal party in the new company. According to the statements of a leading member of the Cambria Company, coal from their mines near Conemaugh was shipped to Germany, where it was found that it made the best brand of coke when handled by the Hoffman process.

The experiment was in operation at the time of the death of James J. Frohneiser, in Germany, who was there superintending it. After a little delay the experimenters of the Otto-Hoffman process, who are now in this country, have completed the purchase of all the patents of the new process for the United States and Canada. This system will revolutionize coke-making, as it gives a very high grade of metallurgical fuel from inferior coals.

A Decision Affecting Breweries
The Altoona Tribune of Monday says: C. W. Mellor and F. L. Stich, the Altoona members of the Columbus Brewing Company, of Ohio, who were returned by the Constable of the Second ward for selling liquor to several landlords in the city without license, must stand trial for that offense in the county court. Such was the tenor of the decree filed by Judge Bell on Saturday morning to quash the indictment because no preliminary hearing had been granted the accused.

—The citizens of Patton will again vote on the question of issuing \$100,000 of school bonds for the purpose of paying for the school building recently built in that town. The Patton people voted on the question at the last spring election when the proposition was carried by a vote of 204 to 55, but several informalities in the submission of the question make it necessary to again vote upon it, which will be done at the general election.

—Wheat sold in Chicago market on last Friday for 50 cents, the lowest mark ever reached. This is hard on the producer, but we assume the consumer will not feel grieved at the market price. As the latter can be country by the millions and the former only by the hundreds, there will hardly be any great riots in this country this year. The wheat market like the former market is over-stocked, hence the wonderful decline in values.

—Quite a grist was run out of the naturalization mill on Monday. Seventeen residents of Gallitzin, Cambria county, formerly subjects of the German Empire, Denmark and the Swiss republic, were admitted to the privileges of American citizenship. His honor said that he did not countenance the practice of Cambria county residents coming into Blair county to be naturalized, but would permit the Gallitzin applicants to take out their papers on the grounds of the greater convenience to them of appearing at Hollidaysburg instead of Ebensburg.—Altoona Times.

—Some one who wants to explain what editorial "we" signifies, writes us a variety of meanings, varied to suit the circumstances. For an example: When you read that "we expect our wife home to-day," we refer to the editor-in-chief; when it is "we are a little late with our work," it is the editor-in-chief; when it is "we are having a boom," the town is meant; "we received over 70,000 last year," it embraces the nation; but "we have log choppers in our midst," only means the man who takes the paper and does not pay for it is very ill.

—A shooting affray occurred on Thursday afternoon of last week at Kittanning Point, where a force of men are employed in making a new reservoir. A colored man named Alexander Johnson has a shanty there, and when he came home from work he found it occupied by Jim Dodson, Nora Johnson and Reese Nurse. Johnson was jealous of Dodson, who was paying attention to his wife, and an altercation ensued in the shanty, which ended by Dodson drawing a revolver and shooting at Johnson five times, one of the shots taking effect in the back. The wound is not believed to be fatal. Dodson fled.

—Jacob Nolan, of Fourteenth ward, Johnstown, returned home on Saturday after spending a month in an involuntary guest ofarden Young, in jail. In an interview with the Altoona Courier he states that he is not pleased with the management of the jail; there are no printed bills of fare to order from, no napkins furnished, vermin are plentiful, grub scarce, and the food is poor. He says that he is a Republican of twenty years standing, there is too much expense in the coffee, Jacob says he is now done voting the Republican ticket, and for that much he should be thankful. Some men, from abandoning thinking and new intelligence, abandon the Republican party, but there are a vast number, who, like Jacob, could be benefited by a month in jail.

To Extend the Beech Creek.
The Vanderbilt interests are going to extend a line from the Beech Creek railroad terminus at Mahanoy to connect with an extension of the Buffalo, Rochester and Pittsburgh at the same point in Indiana county. The Buffalo Courier is authority for this statement, and says further that for two or three days last Du Bois has been visited by various interested railroad officials from the east and north, and yesterday they assembled again. In the afternoon they were standing in the R. R. & P. yard the officials' car of the Fall Brook road, the officials' car of the Beech Creek and the officials' car of the R. & P., which had brought out here General Magee and G. R. Brown, president and general manager of the Fall Brook and other officials of the line; General Manager Layton and Superintendent Palmer, of the Beech Creek, with others, and President A. G. Yates, Superintendent Matthews and George E. Merchant, assistant to the president. Chief Engineer Hoyt, General Patton, A. E. Patton, Hon. S. P. Elliott, and others of the R. R. & P. They congregated at Du Bois for the purpose of advancing the plans for building and did not hesitate to discuss openly the fact that construction had been decided upon and would be put through with not a little of the vigor which is a characteristic of the combination that has been building up the system competing with the Pennsylvania in the central and western part of the state.

The construction of the proposed extension will make the Beech Creek a great trunk line and a short route through the state from Pittsburgh to the sea board.—Lock Haven Express.

Rev. Jones' Lecture.
The lecture last evening in the G. A. R. Hall by Rev. E. M. Jones on "Handel, the Musician" was one of the most popular of the season. The speaker reviewed at length the life of the composer, and his great gift of genius, in such a manner as to thoroughly delight his audience. He was heard with interest and far attention, and a half and heartily applauded.—The Press, Union, N. Y.

One of the most entertaining and instructive lectures we have recently heard the pleasure of listening to was given last evening at the Baptist church by Rev. E. M. Jones. His subject was "Handel, the Musician." It was a most eloquent effort on the part of the orator and the audience enjoyed every word.—Edgewood Light, New York.

At the Baptist church, Ebensburg, on Tuesday evening, October 2nd, Doors open at 7:30. Lecture at 8. Admittance, 25 cents; children, 15 cents.

A New Coke Process
The Cambria Iron Company will soon commence the erection of retort ovens at Johnstown to manufacture coke under the Otto-Hoffman process, the patents for which were recently purchased by the Otto Coke and Chemical Company, the Cambria Iron Company being the principal party in the new company. According to the statements of a leading member of the Cambria Company, coal from their mines near Conemaugh was shipped to Germany, where it was found that it made the best brand of coke when handled by the Hoffman process.

This system will revolutionize coke-making, as it gives a very high grade of metallurgical fuel from inferior coals.

A Decision Affecting Breweries
The Altoona Tribune of Monday says: C. W. Mellor and F. L. Stich, the Altoona members of the Columbus Brewing Company, of Ohio, who were returned by the Constable of the Second ward for selling liquor to several landlords in the city without license, must stand trial for that offense in the county court. Such was the tenor of the decree filed by Judge Bell on Saturday morning to quash the indictment because no preliminary hearing had been granted the accused.

—The citizens of Patton will again vote on the question of issuing \$100,000 of school bonds for the purpose of paying for the school building recently built in that town. The Patton people voted on the question at the last spring election when the proposition was carried by a vote of 204 to 55, but several informalities in the submission of the question make it necessary to again vote upon it, which will be done at the general election.

—Wheat sold in Chicago market on last Friday for 50 cents, the lowest mark ever reached. This is hard on the producer, but we assume the consumer will not feel grieved at the market price. As the latter can be country by the millions and the former only by the hundreds, there will hardly be any great riots in this country this year. The wheat market like the former market is over-stocked, hence the wonderful decline in values.

—Quite a grist was run out of the naturalization mill on Monday. Seventeen residents of Gallitzin, Cambria county, formerly subjects of the German Empire, Denmark and the Swiss republic, were admitted to the privileges of American citizenship. His honor said that he did not countenance the practice of Cambria county residents coming into Blair county to be naturalized, but would permit the Gallitzin applicants to take out their papers on the grounds of the greater convenience to them of appearing at Hollidaysburg instead of Ebensburg.—Altoona Times.

—Some one who wants to explain what editorial "we" signifies, writes us a variety of meanings, varied to suit the circumstances. For an example: When you read that "we expect our wife home to-day," we refer to the editor-in-chief; when it is "we are a little late with our work," it is the editor-in-chief; when it is "we are having a boom," the town is meant; "we received over 70,000 last year," it embraces the nation; but "we have log choppers in our midst," only means the man who takes the paper and does not pay for it is very ill.

—A shooting affray occurred on Thursday afternoon of last week at Kittanning Point, where a force of men are employed in making a new reservoir. A colored man named Alexander Johnson has a shanty there, and when he came home from work he found it occupied by Jim Dodson, Nora Johnson and Reese Nurse. Johnson was jealous of Dodson, who was paying attention to his wife, and an altercation ensued in the shanty, which ended by Dodson drawing a revolver and shooting at Johnson five times, one of the shots taking effect in the back. The wound is not believed to be fatal. Dodson fled.

—Jacob Nolan, of Fourteenth ward, Johnstown, returned home on Saturday after spending a month in an involuntary guest ofarden Young, in jail. In an interview with the Altoona Courier he states that he is not pleased with the management of the jail; there are no printed bills of fare to order from, no napkins furnished, vermin are plentiful, grub scarce, and the food is poor. He says that he is a Republican of twenty years standing, there is too much expense in the coffee, Jacob says he is now done voting the Republican ticket, and for that much he should be thankful. Some men, from abandoning thinking and new intelligence, abandon the Republican party, but there are a vast number, who, like Jacob, could be benefited by a month in jail.

To Extend the Beech Creek.
The Vanderbilt interests are going to extend a line from the Beech Creek railroad terminus at Mahanoy to connect with an extension of the Buffalo, Rochester and Pittsburgh at the same point in Indiana county. The Buffalo Courier is authority for this statement, and says further that for two or three days last Du Bois has been visited by various interested railroad officials from the east and north, and yesterday they assembled again. In the afternoon they were standing in the R. R. & P. yard the officials' car of the Fall Brook road, the officials' car of the Beech Creek and the officials' car of the R. & P., which had brought out here General Magee and G. R. Brown, president and general manager of the Fall Brook and other officials of the line; General Manager Layton and Superintendent Palmer, of the Beech Creek, with others, and President A. G. Yates, Superintendent Matthews and George E. Merchant, assistant to the president. Chief Engineer Hoyt, General Patton, A. E. Patton, Hon. S. P. Elliott, and others of the R. R. & P. They congregated at Du Bois for the purpose of advancing the plans for building and did not hesitate to discuss openly the fact that construction had been decided upon and would be put through with not a little of the vigor which is a characteristic of the combination that has been building up the system competing with the Pennsylvania in the central and western part of the state.

The construction of the proposed extension will make the Beech Creek a great trunk line and a short route through the state from Pittsburgh to the sea board.—Lock Haven Express.

Rev. Jones' Lecture.
The lecture last evening in the G. A. R. Hall by Rev. E. M. Jones on "Handel, the Musician" was one of the most popular of the season. The speaker reviewed at length the life of the composer, and his great gift of genius, in such a manner as to thoroughly delight his audience. He was heard with interest and far attention, and a half and heartily applauded.—The Press, Union, N. Y.

One of the most entertaining and instructive lectures we have recently heard the pleasure of listening to was given last evening at the Baptist church by Rev. E. M. Jones. His subject was "Handel, the Musician." It was a most eloquent effort on the part of the orator and the audience enjoyed every word.—Edgewood Light, New York.

At the Baptist church, Ebensburg, on Tuesday evening, October 2nd, Doors open at 7:30. Lecture at 8. Admittance, 25 cents; children, 15 cents.

A New Coke Process
The Cambria Iron Company will soon commence the erection of retort ovens at Johnstown to manufacture coke under the Otto-Hoffman process, the patents for which were recently purchased by the Otto Coke and Chemical Company, the Cambria Iron Company being the principal party in the new company. According to the statements of a leading member of the Cambria Company, coal from their mines near Conemaugh was shipped to Germany, where it was found that it made the best brand of coke when handled by the Hoffman process.

The experiment was in operation at the time of the death of James J. Frohneiser, in Germany, who was there superintending it. After a little delay the experimenters of the Otto-Hoffman process, who are now in this country, have completed the purchase of all the patents of the new process for the United States and Canada. This system will revolutionize coke-making, as it gives a very high grade of metallurgical fuel from inferior coals.

Exposition at Pittsburgh. Excursion Tickets via Pennsylvania Railroad.
For the industrial Exposition at Pittsburgh the Pennsylvania Railroad Company will sell, on October 4, 13 and 18, excursion tickets from stations on the Pittsburgh division between Pittsburgh and Conemaugh, and from stations on the Southwest Pennsylvania division to Pittsburgh and return, at half fare, with price of admission to the exposition added.

These tickets will be good only on any regular train leaving stations at or before noon on the day of issue, and will be good for return passage until the following day inclusive.

The art display at the Exposition will be increased, and, in addition to many other interesting features on the program, music will be furnished by the celebrated Innes band of sixty pieces.

Miscellaneous Notices.
