THE wool trade is growing with marvelous rapidity. In a letter to Assistant Secretary Hamlin of the treasury department at Washington, Mr. S. A. D. North, secretary of the National Association of Wool Manufacturers of the United States, after commenting on the ucrease in the value of wool, adds, Wages in the woolen and worsted industry in the state of Rhode Island will be increased from 74 to 12 per cent this

This is the second increase that has occurred in the wages of operatives in that section within the last 60 days. The other was from 10 to 15 per cent. and in all cases the advance was voluntary. Simultaneously with the first increase in Rhode Island, equal improvement was made in the wages of all other New England woolen, worsted and cotton operatives. It is to be hoped that Tung peninsula. the others will follow in this base.

These signs are not indicative of rum either of the wool growers or manufacturers. On the contrary, they show a betterment in all branches of the trade reformers that the removal of the duty on wool would not only add to the value of the fleeces, but increase the business of the manufacturers. Those who labored to excite the fear of the woolgrowers have no doubt by this time discovered the groundlessness of their fears.

Foreign investors are not drawing away our gold by sending back Amerian securities. In a very few days we hall be large shippers and sellers of ommodities, and in answer to the crop exports the tide of gold will set this way. The immediate steps taken by the government bond syndicate to fill the gap made in the treasury gold by deposits in excess of withdrawals is also an exceedingly reassuring occurrence.

#### Lives Lost in a Storm.

San Francisco, Aug.—Widespread destruction and appaling loss of life were caused in Japan by a fearful storm on July 24 and 25. The nurricane swept across Kiusha, passing along the shores of the Island sea, crossed over the central districts of the mainland and emerged into the Pacific ocean. Its track was everywhere marked by a great loss of life and destruction of property, and as the catastrophe was followed by a heavy rain storm, inundations added their devastating effects to the navoc wrought by the wind. It is calculated that over 1,000 people were killed or drowned. Ujina, the town that served as a military basis during the recent war, felt the full force of the tempest The place was completely swamped by the sea, and over 150 boats were smashed.
