THE state treasurer reports the amount in the general fund at the beginning of the new year \$2,186,515. Since the close of 1890 the revenues have been steadily decreasing and the amount now as it appears, for a large sum is due to Philadelphia, to be returned for state personal taxes. Within the next month sufficient revenue will probably come in to enable the state treasurer to cancel all indebtedness, but he will be compelled to borrow nearly \$3,000,000 from the 1896 account to square up the accounts of the last year.

On Wednesday, eighty one years ago, General Jackson defeated the flower of the British army under General Packens ham at New Orleans. In that remarkabattle the British loss was 700 killed. 1,400 wounded and 500 taken prisoners. Among the dead was General Packenham, the British commander. The American loss was only 8 killed and 13 will not make this country any less dewounded. A MORE important issue than that over the Venezuelan boundary may soon be raised between the United States and Great Britain, if recent reports from Nicaragua are confirmed by later developments.

The substance of these reports, sustained by important evidence, is to the effect that British interests are reaching out for the control of the Nicargua canal, and that the Nicargua government is being urged to annul the charter to

the existing American corporation. The reports of British intrigue in Nicaragua which have been sent to the state department are likely to receive very serious attention before the transmission of the report of the Nicarguan commission to congress, and it may give a sensational turn to the special message of the president on the subject, which is expected in the near future.

There has been a considerable change of opinion as to the attitude of England towards the Venezuelian boundary commission, the membership of which could hardly have been improved. Instead of being violently opposed to the commis sion as many suppose it would be, it seems, from trustworthy information, that the British government while not officially recognizing the commision, proposes to unofficially assist it in every way possible to get at the actual facts as to the true boundary between Venezuela
