THE commissioners of Chester and Delaware counties jointly decided a few days ago not to enforce the compulsory education law for this year. THERE appears to be a great demand in England for California redwood, and while in California the wood is very common and is used for building fences and barns, in England it commands a fancy price. Last week a ship took aboard at Oakland a cargo of more than 1,000,-000 feet of redwood, and another ship was preparing to take on an even larger load. The shipments were a novelty and a speculation, and if they bring good returns the California lumbermen will have a new avenue of profit opened

The real friends of the gold standard should bend all their energies to the task of educating and encouraging both parties so that the money issue, which is in fact a commercial to permit the organization of national and not a political question, shall be definitely disposed of after the manner which the honor of the nation demands.

> THE alarmists who are warning the American people against the cheap manufacturers and cheap labor of Japan, says the Philadelphia Record, are very careful to deal in generalities. They tell us that labor is cheap; that men and women work for ten cents a day, and that their wages are paid in silver; but they omit to state, what is the fact, that in all manufacturing operations in Japan it takes from ten to twenty operatives to accomplish the work of one American workman.

A FEW days ago the United States senate passed 75 private pension bills in 60 minutes There has been a great flood of private bills of this character at this session. The general pension laws meet almost every deserving case; and a private bill generally indicates that the applicant has been rejected by the pension office authorities as not coming under existing laws, which were made to cover almost every rightful case. A tendency is noted these days for making liberal allowances by private bills in the way of pensions for the families of deceased officers. They are given much Imore by these bills than the regular statutory allowance, and much more than goes to the widows of private soldiers who died in the service or fell in the battle. It is impossible that the senate in passing 75 of these bills in 60 minutes should give them the investigation and consideration that should be exercised in voting away the people's money. Some of the cases, no doubt, are meritorious. Others are not, but rest for success on the work and influence of the member championing the bill. Of course there is the usual log rolling in this sort of

The opinion of one of Pennsylvania's ractical steel makers, who is at present n Washington, on McKinleyism is enitled to weight. This gentleman, Mr. James Andrews, of Allegheny, said: The necessity of a high protective tariff seems to have gone by, for in many lines we have reached a point of cheapness in production that approximates he cost of production in any of the European countries. Take steel, for instance. I remember when, as an apprentice, I was employed in the first plant that smelted steel west of the Alleghenies and that it sold for 44 cents a pound, owing to the marvelous improvements in machinery and better transportation facilities. We have much the dvantage ef Eugland, for ores lie near the surface and can be mined at a trifling expense, whereas they have to go to great depths for their ores and fuel. We can bring the Lake Superior ores to W. T. Only this week Mr. Gorman got up and made a few remarks against the idea of abolishing postmasters at county postoffices which are in the vicinity of large cities and placing the offices under clerks from the city offices Note the result. The senate added an amendment to the postoffice appropriation bill limiting the postmasters who may be abolished to those who preside over postoffices which are within five

miles of the corporate limits of cities. As a rule Democrats in congress do not seriously regard the stories concerning Senator Tillman's candidacy for the, Democratic presidential nomination which his departure to make some speeches in the west have given circulaion, but personal friends of the gentlemen say that he really intends to be a candidate if the silver men control the Chicago convention. Well, anybody enough to nominate is quite another hing. Many Democrats in congress hink that Senator Tillman's declaration of his intention to bolt the Chicago convention if it does not adopt a platform n accordance with his views is of itself enough to bar him from receiving any nonors at the hands of that convention.
