The Chester county board a few weeks ago prepared to apply it, but when the question | dangerous competitor as to whether the county or districts were liable arose, not seeing their way clear in the matter, the commissioners decided to ignore the act for this year, or until something definite could be decided upon regarding payments for the taking of the census.

THERE appears to be a great demand in England for California redwood, and while in California the wood is very common and is used for building fences and barns, in England it commands a fancy price. Last week a ship took aboard at Oakland a cargo of more than 1,000,-000 feet of redwood, and another ship was preparing to take on an even larger load. The shipments were a novelty and a speculation, and if they bring good returns the California lumbermen will have a new avenue of profit opened

> THE alarmists who are warning the American people against the cheap manufacturers and cheap labor of Japan, says the Philadelphia Record, are very careful to deal in generalities. They tell us that labor is cheap; that men and women work for ten cents a day, and that their wages are paid in silver; but they omit to state, what is the fact, that in all manufacturing operations in Japan it takes from ten to twenty operatives to accomplish the work of one American workman.

A FEW days ago the United States sen ate passed 75 private pension bills in 60 minutes There has been a great flood of private bills of this character at this session. The general pension laws meet almost every deserving case; and a private bill generally indicates that the applicant has been rejected by the pension office authorities as not coming under existing laws, which were made to cover almost every rightful case. A tendency is noted these days for making liberal allowances by private bills in the way of pensions for the families of deceased officers. They are given much imore by these bills than the regular statutory allowance, and much more than goes to the widows of private soldiers who died in the service or fell in the battle. It is impossible that the senate in passing 75 of these bills in 60 minutes should give them the investigation and consideration that should be exercised in voting away the people's money. Some of the cases, no doubt, are meritorious. Others are not, but rest for success on the work and influence of the member championing the bill. Of course there is the usual log rolling in this sort of special legislation.

All of which is nuts for the Democrats-President Cleveland must find the numerous attempts that are daily made by newspaper men anxious to earn their salaries to tell what he is going to do about those Cuban resolutions, sent to him this week, a source of constant amuseble for the president to do anything that will miss all the theories which have been put forth. Somebody will doubtless be able to say "I told you so," but it will not be because they had advance information. All that is known is that the president is considering to determine whether there is any thing in the situation to call for any action on his part.

The opinion of one of Pennsylvania's practical steel makers, who is at present n Washington, on McKinleyism is entitled to weight. This gentleman, Mr. lames Andrews, of Allegheny, said: The necessity of a high protective tariff seems to have gone by, for in many ines we have reached a point of cheapness in production that approximates the cost of production in any of the European countries. Take steel, for instance. I remember when, as an apprentice, I was employed in the first plant that smelted steel west of the Alleghenies and that it sold for 44 cents a bound. Now it is made for one cent a pound, owing to the marvelous improvements in machinery and better transportation facilities. According to Senator Smith, of N. J. the Democrats of that state have no candidate to urge before the Chicago convention, and are perfectly willing to upport the man chosen by the convention. Mr. Smith thinks the Democrats can carry the state this year if no mistake is made in the platform adopted at Chicago, no matter who heads the presidential ticket.

The man who thinks that Senator Gorman does not still wield a powerful influence in the senate is not a close observer. Only this week Mr. Gorman got up and made a few remarks against the idea of abolishing postmasters at county postoffices which are in the vicinity of large cities and placing the offices under clerks from the city offices: Note the result. The senate added an amendment to the postoffice appropriation bill limiting the postmasters who may be abolished to those who preside over postoffices which are within five
