THAT scheme of plunder, forcing bond issues to maintain a \$100,000,000 gold reserve in the treasury, has only been made possible since the Harrison a iministration. It was evolved from a decision of Secretary of the Treasury Charles Foster, on Oct. 14, 1891. Whether that decision was the result of a disordered intelect, or a willful betrayal of the government's interests, is still a matter of speculation.

On the date indicated Foster instructed the assistant secretary of the treasury at Boston that the holder of treasury notes, issued under the act of 1890, had a right to demand their payment in gold. Gold is not specified in the notes. They are redeemable in "coin" either gold or silver. The option as to the particular kind of coin is with the government and not with the holder of the note. Foster's decision, however, made eoin mean only gold, and surrendered the option belonging to the government to the cre-

Since that time the government has issued \$262,000,000 of bonds to maintain the treasury gold reserve. Unless it should reverse its policy, which is not likely at present, it stands ready to create other bonded loans, without limit, to buy gold. Ou the other hand, the gold reserve is subject to constant rading and depletion, by means of treasury notes. The bond syndicates, composed of London and NewYork bankers and brokers, who ma de millions by "pinching" the government in its gold reserve, will, no doubt, as soon as the November election is over, if they can curb their greed that long, again immediately raid the has been suddenly rovealed to the Retreasury gold and force more bond

Since the inaugration of the presidential campaign, says the Westmoreland Democrat, elections have been held in five states. Although the official figures are not at hand, the approximate pluralities are as follows:

Dem. Plurality. Electors 45,(84) Arkansas. ...143,000 Total. Rep. Phyrality. Electors Vermont Total. ...53,0341

That the southern states above named should go Democratic is not surprising. The pluralities which they show, how ever, are largely in excess of what was generally expected. The same is true of the two New England states. They are and have been for nearly two score years reliably Republican.

Perhaps the most significant result in any of the elections thus far held is in the case of Arkansas That state is located in the southern centre of the great Mississippi valley. It is in that section, and not in New England, that the presidential election of this year will be determined. In Arkansas the state campaign was conducted on the one great national issue, finances. The remarkable plurality of 80,000, a Democratic gain of 40,000, plainly indicates what a strong sentiment prevails in the populous Mississippi valley from one end to the other for the free coinage of silver. That feeling has likewise taken a firm hold of the masses in the adjacent states of the middle west, reaching as far east as the Pennsylvania border.

The signs of the times are that the great uprising of the masses to right the crime of 1873, and re-establish the monetary system of the American constituand inder endence is only a question of tion, both silver and gold, will sweep with the Democrats it will go much claims to the fortune. He could not well do otherwise as the Democracy at Chicago practically unloaded him and his administration when they refused to endorse its policy. He was out in the cold. Washington, Letter

Washington, Sep., 11, 1896 -Bryan's enthusiasm has been on tap in Washington this week. The Arkansas election started the ball by putting all the Democrats in a jubilant humor, and the news which has been coming to Bryan headquarters has all been of a pleas ing name to his supporters. The local Democrats are fairly bubbling over in their enthusiasm while engaged in making preparations for the hig meeting they are to hold on the 19th inst., and which is to be addressed by Mr. Bryan Unless present anticipations fail to be meeting ever held in Washington.

Senator Faulkner said of the silver victory in Arkansas: "If it has any sigcandidates nominated and the princi- bruises. ples announced at Chicago meet the approval and command the support of the great agricultural and laboring classes so strongly represented in that state. It appears further that the great amount of campaign literature sent into Arkansas by the Republican organization had no other effect than to stimulate to stronger efforts tacse who are now realizing country must have relief from continually falling prices, resulting from the gold standard

He said. indiguant y: "There is not a particle of truth in this story. I am not a recent convert to free silver, but have been advocating it openly and above-board, as everybody knows who knows me, for years. I was in full sympathy with my party in Illinois at the time of the silver convention in that state over a year ago. Morever, I have never been an applicant for any promotion in the pension bureau since I secured my present position, nor have I expected any promotion I am now and have been for the free and unlimited coinage of both gold and silver at the ratio of 16 to 1. without awaiting the action of any other country, for the reason that I believe it to be economically, scientifically historically and legally right, and for the further reason that believe it to be for the best interests of the great majority of the people of this country. I am for free coinage of silver and for the election of Bryan, because I believe that the best interests of the country would be subserved by his election, and the restoration of silver to the position it occupied as primary money

n this country prior to 1873 Mr. James L. Norris, assistant treasarer of the Democratic national committee, and president of the Jackson Democratic association of Washington made a fiery speech before the latter organization this week, in which he said: If the candidates named by the true and only Democratic party at Chicago are to be elected we must waste no time in the states that opposed the war of 1812. There was the peace faction then, as there is the gold faction now: there was legalized state smuggling then defrauding the nation, as there is the illegal syndicate despoiling the federal treasury now; they had Quincys then who declared 'separation' of the states, we have a Morgan-Rothschilds syndicate; the pulpit then thundered against the war, as it thunders against genuine patriotism to day.

No utterance during the campaign has been more pleasing to the friends of Mr. Bryan than the words of Senator Teller in a speech at Morrison, Ill., which were telegraphed to Washington Senator Teller said: "I think I know the fight which ensued unmercifully every man in public life among the Democrats who had the slightest claim twenty eight stitches to bind his cuts, to a nomination, and I say to you here and since then he has been lingering benow, after an acquaintance of more than seven years with Mr. Bryan, and a pretty close acquaintance with him, too. that in the whole ranks of the Democ racy there was not a man better equipped and more worthy of nomination than
