THE decision of Judge McIlvaine, in the Washington county court, regardance to the owners and lessees of oil and gas bearing territory. The facts in the case were these. Ten years ago a natural gas company took a 20-year lease on a piece of land, drilled a well, and produced gas. In two years it was exhausted and no more wells were drilled. After allowing the land to lie idle eight years, the company began to deepen the original hole, in the hopes of finding another pocket of gas. The lessor held that the long abandonment had worked a forfeiture of the lessee's rights; he sued for demages and an order restraining the lesse from trespassing on his laud. The court decided that the lease holds good and that the lessor has the right to operate until the expiration of

The omission was not discovered until next morning when all efforts to open the safe proved futile. An expert was sent from the safe-makers in Cincinnati. He said the only way to get the safe open was to start the clock. This he did by getting a large piece of timber and with six men, using it as a battering ram, they pounded on the door until the iar started the timepiece. MAY SURPRISE WEYLER

Return To Havana.

Let the Captain-General Talks About the Rebels Being Pacified In That Province-Another Train Blown Up by the Insurgents-No Compromise.

#### [Copyrighted.]

HAVANA, Feb. 10 .- The various reports and statements of Captain General Weyler announcing the pacification of the province of Pinar del Rio and the almost complete disappearance of the insurgents in that part of the island, are far from being borne out by facts. As intimated in these dispatches when the Spanish commander made the remarks cited, if Pinar del Ric was as quiet as he alleged it to be what has become of the arms, horses, amunition, stores, etc., of the 7,000 men whom he admitted were under arms there.

As a matter of fact, the insurgent forces in Pinar del Rio seem better off, more thoroughly equipped and disciplined than at any previous stage of the campaign. In support of this assertion statements have been gathered from the most reliable sources, showing there are 5,000 men in the field.

In addition to these forces is a strong body of insurgents, which seems to have mysteriously disappeared from the neighborhood of Havana. The whereabouts of this force is causing the Spanish staff considerable anxiety.

The friends of the insurgents intimate that a big surprise is being prepared for Captain General Weyler when he tries to return to Havana,

On Feb. 1 the insurgents destroyed by dynamite a culvert between Taco and Bacanagua, Pinar del Rio, and wrecked a train. The culvert was totally destroyed, and one passenger on the train was killed. The engineer, two firemen, a captain of the artillery volunteers, Suarez and five soldiers of the batallion of Asturias were seriously wounded; two of them have since died of the injuries thus received.

Advices from Remedios say that General Maximo Gomez has removed from the district of Santo Spiritus to La Siguanea, which caused rumors to be circulated of a probable conference between the generals and eventually of the conclusion of peace. But those reports have since been denied from insurgent sources. Rebels do not want a A number of Spanish generals will

return to Spain, which seems to indicate that they have given up the fight.
