FRIDAY, - - - - - APRIL 9, 1897.

Bills have been introduced in congress for the erection or statutes in Washington of Samuel S. Randall and Wm. D. Kelley, at a cost of \$50,000

Congress and McKinley together should be able to give that promised wave of prosperity a boost which will result in its getting a decisive move on itself. We are still waiting.

H. CLAY EVANS, of Tennesee, recently appointed commissioner of pensions, after an interview, with Fresident Mc-Kinley, told some senators that the civil service order will be revoked, which makes the appointment of pension examiners contingent upon their passing s civil service; examination.

The flood situation in the Mississippi delta is unparallelled. In the delta proper five counties are for the most part under water, and at Rosedale, Miss. the river is 50 miles wide. It is estimated that 300 towns and cities are under water. 10,000 people are rendered homeless, and desolation is the only term expressive of the condition of that portion of the Mississippi valley.

THE new ballot law now pending in the legislature provides a simple form of ballot for the unwieldy one we are compelled to use in Pennsylvania. It was prepared by the ballot reform association of the state. It does away with party columns and groups the candidates for each office to be voted for, requiring the voter to mark every candidate for whom he wishes to vote. No name appears more than once upon the hallot, although all the party designations for each candidate are printed. The directions about voting are simple and easily understood, and independent voting is made just as easy as straight party voting. Any man who can read his ballot can find the names of the candidates of his choice, and those who cannot read can be assisted by someone

THE Australian ballot system, says the Philadelphia Record, has been willfully twisted out of shape for partisan purposes in nearly every State of the Union where it has been adopted. It intended to furnish the voter an opportunity of free choice and security against observation. It has been so amended and bedevilled as to make it a perplexity and a defeat of free choice except under conditions of difficulty. House bill 231, now under consideration in the Legislature, embodies an effort to give the people the advantages of the Austrrlian system in its simplicity without the intricate, bothersome and cumbersome modifications imposed upon it in our present law. No white man in the Legislature can afford to vote against bill 231. Such a vote bespeaks an opponent of fair elections, fair play and honest politics.

ISOLATED local elections, says the Pittsburg Post, are of little value as indicative of the political drift, but be come of importance when occuring in a great numbers in widely separated states. They all tell the same story of reaction against the Republican party. A week or two ago the town elections in New York and some parts of New Emgland showed great Democratic gains. The elections this week in Ohio, Indiana, Michigan and Illinois are even more decided. Large Republican majorities in important cities have been reversed or greatly reduced. It is admitted they indicate an agrgessive opposition, a getting into good form as to organization, and equally a weakness and falling of on the Republican side.

This is not difficult to account for. A party new in adminstration always loses when it comes to apportioning the spoils of victory. But there is a more significant lesson in the recent election. Republican pledges of the great things theladvance agent of prosperity would do have turned out a bitter mockery. Times are not improving with the great producing class. Wages are on the down grade. Products are falling in price. It is clear the purchasing power of the people is at its lowest ebb. And all the remedy the NcKinley administration and the Republican party has to propose, with that disturbing element an extra session in progress, is a monstrous bill to increase the taxation of the and in consequence in the return of rassed business, Currency reform of McKinley is now discharging the duties pretense of international bimetallism. sustaining the basic principle of the free coinage party, is simply making converts to the right side, who look through the pretense and grasp the essentials of renewed prosperity. On the other hand, the gold Democrats and independents are insulted and humilated by the revival of McKinley taxes in a more odious and oppressive form than was everdreamed of. It was not for this they changed their party relations.

We believe the reaction against the Republican administration and party will gather accumulating force. The falling in prices. congressional elections next year, like the election of 1890, following the Mc-Kinley tariff, will show the return of a large Democratic majority to the lower house. The Democratic party is pulling itself together, full of hope and determination. The divisions of last year are disappearing and great multitudes, realizing the shallowness of Republican pledges and the enormity of McKinley remedies, are gathering about the old camp fires. Hence the sweep of Demoeratic victories at the spring elections.

We would remind Senator Stineman and Assemblyman Reese that people are getting tired working to pay officeholders at ten times their value.

As the executive, senate and assembly of this state are all Republican, any bill fixing the salary of the county treasurer that the managers of the party in this county see fit to fasten upon the people will be passed and approved without any question. The Republicans have it all in their own hands and the responsibility belongs to them, entirely. The present salary, as we have said before, is outrageous-the salary fixed by the proposed bill of Messrs Stineman and Reese is some better but the sum of near \$8,000 per year will still be a huge robbery of the people when the services rendered by the offi ial are taken into consideration, and a the Tribune, says, the bill should be amended or withdrawn.

Messrs. Stinenan and Reese have now an opportunity to "play fair" with the taxpayers and they are expected to do so. A little concession by the party managers, leaving the salary at nearly \$8,000 per year will not be thankfully received and will not be easily digested by the people. A bill fixing the entire salary of the county treasurer at not less than two or more than three thousand dollars per annum will give ample com. pensation for all the duties of the office and there will be no lack of candidates eager and anxious for the office.

THE sugar trust, from March 4 until April 2, according to elaborate tables in the New York "World," gathered from consumers \$625,000 of extra profit on the mere prospect of the Dingley bill becoming a law. Standard refined sugar has risen in that time 5 16 of a cent per pound. The sugar trust, according to the testimony of its officers, fixes the price upon refined sugar and hurt. puts out each year 2,400,000,000 pounds of the 3,000,000,000 pounds annually consumed in this country, or 200,000,-000 pounds each month. With the same increased margin of profit for refining, the sugar trust would sumer in a year twelve times as much, or \$7,500,000, or for the term of Mc-Kinley's administration \$30,000,000. That would build seven or eight firstclass armored battle-ships for the navy. For this, among other things, were protective tariffs invented.

lighest of all in Leavening Power.- Latest U.S. Gov't Report

Washington, April 2nd, 1897 -There is no limit to Republican audacity. Not only was the McKinley tariff bill number 2 put through the house-forced s nearer true-before an opportunity had been given members to go through even the farce of offering amendments to have them overruled by the chair, instead of being voted down by the members, to more than about one-sixth of the entire bill, but an amendment was forced down the throats of the Repulican members which is generally conce ded to be unconstitutional, and to be in direct conflict with a decision handed down by the U.S. Supreme court since the Wilson tariff bill became a av This amendment makes the duties which will finally be imposed by the bill go into effect April 1, although no one expects the bill to become a law for at least three months, and no one has any means of knowing how the duties will stand when the bill passes the senate. This amendment is a bluff and simply, intended to frighten importers into stopping importations which he bill is pending in the senate, It it works, the importers are a timid set, as there are no the amendment as worth the paper it is printed on

Mr. McKinley is still daily wrestling with the office seekers, but he isn't making many appointments and the few that be is making are unsatisfactory to the rank and file. He has sprung a new dodge on the senators and representatives. When he gets ready to make a personal appointment he lets the senators and representavives from the same state know his intention, thus giving them the opportunity to save their prestige by adding their endorsement. It may be imagined that this sort of thing isn't pleasant to the senators and representatives, but they are afraid to kick at this stage of the game. Representative "Champ" Clark, of

Mo., made a semi-humorous speech on the tariff bill, just before the gag rule under which it was forced through the house stopped all talk, which contained some very serious ideas. For instance ne said: "If this is not a sectional bill now does is happen that the Western farmers find their green hides not only on the fence, but on the free list, while the New England shoe manufacturer has a high tariff on his finished products? How does it happen that the cotton growers find their products on the fre ist while the cotton manufacturers have heirs on the protected list? I will tell you why. It was stated with brutal frankness by the gentleman from Indiana, the other day, that the Southern and Western people would have to vote the Republican ticket or what is equiva rest him. else be debarred from the benefits of your tariff legislation." Mr. Clark's concluding words were: "We may be fools and leather heads and all that sort of thing, but I tell you, gentlemen, the people living west of the Allegheny Mountains and south of the Potomac have got sense enough to know when they are sand-bagged and held up; and, the New England highwayman ought to

Senator Hansbrough's measure entitled "a bill to prevent inventors and others from being deceived and defrauded by alleged patent attorney" is now before the the senate committee on patents, Washington, and is intended to put to a stop to a practice which makes the U. S. government appear in the eyes of some people as an abettor of a lottery scheme. It makes it unlawful for patent attorneys or solicitors to offer or award any price or premium, or chance to win one, as an inducement to lure in: ventors into entering alleged competitions of ideas, and provides as penalties fines of 500 to \$1,000 or imprisonment from six months to one year. The bill also directs the Commissioner of patents to prepare rules of practice for patent attorneys.

Senator Foraker has introduced a bill to permit pooling by railroads. This speaks for itself. Only last week the S Supreme court decided that railroad pooling was illegal, and now a Republican senator promptly comes forward with a bill to meet the court's decision and to legalize railroad pooli g, which is only another name far railroad trusts. It seems that all the campaign debts to corporations and trusts were not paid in the tariff bill.

The new Republican members of the senate did so much vigorous kicking that a Republican caucus has decided to try to fill the vacancies on senate committees. Whether they succeed will depend on how much they try to grab Senator Gorman, chairman of the Den ocratie steering committee, made them a fair offer a few weeks ago-that Republican vacancies be filled by Republicans, Democratic vacancies by Democrats and populist vacancies by populists. They have so far refused to accept that

### Avalanches in the Cascades.

Tacoma, Wash., April 4.--An unprecedented heavy snowfall is causing tremendous avalanches, which are sweeping down the sides of the Cascade mountains during the spring thaws now in progress. On Friday Edward Graham and Daniel Shirley, miners employed at John D. Rockefeller's Monte Cristo mines were caught by an avalanche in Glacier Basin and killed. Both struggled hard to escape. They were burled hundreds of feet down the mountain side before being engulfed in an immense sliding mass, which packed them under eight feet of snow. A parly of men from the Mystery mine im-

Four hundred indictments are now pending in various Ohio courts against Lewis, although his arrest was made on a warrant charging but one forgery. The National Bank of Redemption of Boston will back the prosecution of the prisoner at the trial which is to be begun as soon as possible. When arrested at Ypsilanti Lewis was living with his family under the name of James Leache. He consented to return to Ohio without a requisition. When asked if he had anything to say Lewis replied: "Not now, but probably I will talk to you later.' Lewis was caught through his mail-

When arrested Lewis cooly remarked he was sorry he ever left home Lewis was arrested by private detective Kirby of Dayton, O., who has been on his track ever since Lewis' disappeared from Urbana. Lewis has been tracked all over the country, and once Detective Ralph Crawford of Cincin-

Lewis was a banker and broker at Irbana and was regarded as one of the shrewdest financial men in the state, The financial world was shocked when it developed that Lewis had forged thousands of dollars worth of Dayton city bonds and floated them. The upper crevasse, in Tunica county, is 2,000 feet wide, and so fools as we are, we have some rights that great is the outpour that water from below the break is being drawn up to and hurled out over the fertile valley through the crevasse. All of the country east to main line of Yazoo and Mississippi Valley road is flooded, and in many places the water has gone over the tracks, filling the Yazoo river. The fall in the main channel at Helena, Greenville, Vicksburg and Arkansas City is due to the filling up of the delta and the lower White river country. The supreme question is the duration of the flood. If the lower levees along Louisiana and Southeastern Arkansas should hold, which it is believed they will not do, the emptying of the delta and St. Francis basin will be slow. If they break and the river continues to fall at Cairo the upper St. Francis basin and the delta will be clear of water by May 5. If this should prove true there
