-Crippled engines are accumulating in the Altoona yards very fast, and unless the conditions of business will soon justify the work of pushing repairs on motive power the company will be in need of room at Altoona. Hundreds of locomotives needing only slight repairs are standing on the tracks among many others that are out of date and beyond the limit of usefulness and awaiting the orders to be scrapped. At one place in the Altoona vards over 150 engine tanks are standing, many of them needing only slight repairs.

-A dispatch from Greensburg, dated April 9, says: "The contract for the grading of 30 miles of the new Beech Creek Railroad, in Indiana county, was awarded yesterday. The road has already been built to Glen Campbell, and several routes have been surveyed from Saltsburg to Pittsburg, but none, as yet, has been agreed on. It is more than probable, however, that the one leading from Saltsburg to Latrobe will be selected thence connectng with the P. &. L. E. near West Newton. The Murrysville route, it is thought, will be abandoned, as the main object seems to be cut through the coke regions between Latrobe and West Newton."

Despise Not the Hen.

The Pittsburg Times philosoprer make this note about the hen and its work; According to the estimate based on the ast census and on careful independent investigation, the hen of the United states produces no less than 1,141,000,000 dozens of eggs per year, and her total contribution to the wealth of the nation in 12 nonths amounts to \$343,000,000. That neans over \$7 for every man, woman and child in the nation, and over \$30 for every family. It will thus be seen that the hen, who is now so busily laying the foundations for Easter indigestion, is a very im of the country, and that her departure from her sphere of activity would cause an aching void that would be hard to fill Just now, perhaps, owing to the early development of spring, the hen is somewhat not encouraging to the owners of bens

The Whole Big Show. Mr. A. J. Bailey and the Sells Brothers have provided themselves the kind of mer that never do anything by halves, conse quently the complete great Adam Fore paugh and Sells Brothers' consolidated shows will be here-every animal, every act every rare feature, and every unique and exclusive attraction. As a matter of sound business policy, as well as of common justice, our people are entitled to just as much for their money as those of any other locality, and they wi'l get it. All silly or false rumors to the contrary it may be stated right here that no tented show was ever divided, or ever will or can be. It is simply a preposterous and physical impossibility. The great amusement enterprise will, therefore, be in Johnstown on Thursday, April 22d, and in Altoona on

Friday, April 23d, just as advertised.

How to Tell Fresh Eggs. A correspondent of the Dukota Farmo asks, "Is there any sure way of distinguishing perfectly fresh eggs from tainted ones, or those that have been set upon by hens for several days? Candling is quite a sure method, but if there is a way should like to know it." The following reply is given: "To the experienced eye, the roughish, or granulated, surface of the perfectly fresh egg distinguishes it at once from the more shiny or polished surface of the egg that has been under the hen a day or two. We can pick out every fresh egg among a nestful of those that have been sat on for two days, even in the dark The secret is very simple. Just scratch over the surface with the finger nail; if it grates, the egg is fresh, but if the nail slides smoothly the egg is old. A little practice makes this a sure test,"
