The fact that the people of Crete wish to be united with Greece is probably one of the strongest reasons why the Powers of Europe will not permit, it. To let the people of any country choose their own government might be a dangerous precedent.

A CORRESPONDENT of the New York Journal, writing from Ohio says: "It | \$50,000; 35 per cent. doesn't take a prophet to foresee that the next Ohio Legislature will be Demo cratic. THE beavy Democratic gains noted in Ohio, Illinois and other western states in the April elections have been supplemented by similar gains in the May elections of Indiana. Almost without exception the Republicans showed heavy during that period when it was 45 per cent ad losses; and this was certainly the case where party lines were drawn. In many instances the Democrats made a clean sweep and there is no room to doubt the significance of the result. It means that there is an overwhelming re-action from last fall, and it should encourage local Democrats to bestir themselves. There is enough disgust even now among the men who were fooled last fall, to turn the tide in our favor.

SHOULD a man be paid for doing nothing-that is, for rendering no service in return for value received? In answer to this question every sensible person would say that he should not. There are 357 persons who are doing nothing, but, notwithstanding, are being paid out of the public treasury. They are the representatives in congress. For a month past they have simply met twice a week and adjourned. It is proposed that this farce and refined system of plundering ally understood by the women of this the people shall continue for the next | country. It is they who must suffer three months. In justice to many of the members, however, it should be stated that such action has been taken without their desire and in spite of their protests. The spectacle thus presented is a rather contradictory one as to our socalled system of representative rule. One of the worst schedules in the Dingley bill is that relating to cutlery -especially pocket cutlery. The duties on pecketknives range from 100 per cent to 300 per cent above present duties and are nearly double those in the McKinley bill. Why, you will ask, are these duties so extraordinarily high? there? Both questions are easily an-

It is unnecessary here to go into de-

Before McKinley's nomination one of the five or six large manufacturers of pocket cutlery, who was prominent in the trust, which raised prices an average of about 35 per cent under the McKinley bill, began to hustle for McKinley. He is said to have raised a among the 20 or 25 cutlery manufacturers. Just how the money was spent is that several McKinley delegates to St. Louis owed their presence there to this fund. The hat passer himself was one of the very few delegates from New York who was for McKinley first, last and all the time. He was one of Hanna's most trusted lieutenants. One of the two favors which he is said to have asked as compensation for his valuable services was the fixing of the cutlery schedule. This privilege, being an ordinary and expected one under the protection system, was readily granted by the

Washington, May 8th, 1897.-Killed by an overdose of tariff," may be the epitaph on the tomb of the Republican party, if the tariff bill which was this week reported to the senate is not radically changed in many of the schedules. It has started a fight among the Republicans that may result in killing the tar iff bill as well as the Republican party, although, of course, the chances are that the differences will be patched up in some way and a bill of some sort put through at this session of congress That the fight is now raging is shown by the open threats of the New England senators to stay in Washington all summer rather than see the duty on bides, which the senate finance committee has put in the bill, remain in the bill, and these senators are already trying to get Democratic senators to promise to vote with them to strike out the duty on hides when the bill is voted upon by sessions in the senate.
