SUGAR is going up-the rich trust is gaining millions of dollars by the increased price, while the consumer is paying a cant or two more on a single pound. Tois is the kind of prosperity which the Republican party brings the poorer classes.

SENATOR GORMAN seldom talks for publication, but it may be safely stated that he is preparing to make the fight of his life to restore Maryland to the Democratic column, and that he is absolutely confident that he will succeed and be re-elected to the senate.

The woman was also an employe of the place, and unrequited love is said to have prompted the shooting.

How badly off the protectionists are for evidence of the benificent effects of their darling tariff bill is evident from the undisguised glee with which they point to an upward flutter in the price of wheat. There is no more relation of cause and effect between the tariff bill and the price of wheat than there in behand. tween this year's apples and last year's horse races. Yet the protectionists catch at upward wheat prices as drowning men catch at straws.

THE potters of New Jersey and East Liverpool are asking a restoration of the old wage scale. It is not unreasonable. As tariff rate were advanced on the pretense that it would be done, why not keep faith? The duties on common yellow and brown earthenware are advanced 25 per cent above the Wilson rates, while plain white china is advanced 50 per cent. Earthenware not decorated is advanced 33 per cent. Let wages go up correspondingly. The advance was seured on the plea that they would.

And they did it within a week after the signing of the tariff bill, too. Worse, even, than that; they did it the day after Mark Hanna announced the actual appearance of universal prosperity. them were those whose nominations had failed to be acted upon by the senate He added to their disgruntlement by amending the civil service rules so that no office holder in tee classified service can be removed except for cause and upon written charges, and then only after failure to make a satisfactory defense He pleased some of the Republican congressmen by excepting from the civil

service rules some of the confidential employes in each of the internal revenue and customs districts, but offended oth ers by extending those rules to the smaller Custom houses that were left out by Mr. Cleveland. lows: B 84 Hanna and Mr. McKinley are

said to be "on the outs," and the big b ss left Washington without saying good bye to the man he made president and whom he has been bossing. There are different stories as to the cause of the strained relations, but it is safe to say that they will be patched up by the time Mr McKinley gets to Ohio, where he expects to be during the latter part of August As soon as he takes time to think, Boss Hanna will realize that he will need Mr McKinley in his business before that Ohio campaign is ended, and if necessary will pocket a snub or two to

get his active assistance. Mr. McKinley appointed F. V. Pow

deply to be commissioner general of Immigration before he left on his vacation. This appointment was made necessary by the failure of the senate to act upon Powderly's nomination for this position, and a bargain made before Mr. McKinley's election. It has been hinted by personal friends of Mr. Mc-Kinley that he will be rather glad than otherwise should the senate reject Powterly's nomination next winter. In giving him the recess appointment the bargain that put Powderly on the stump for Mc. Kinley has been lived up to. If the senate declines to let him stay there. Mr. McKinley will have another good appointment at his disposal.
