The shaft was covered with grease and oil and when a gust of wind blew the dress of Mamie, the eldest, who is about ten years old, against the shaft, it stuck and in an instant she was drawn up tightly against the shaft and went whirling around. The other child was too young to give the alarm and there I was no person working on that floor. A dog that had been with the children set up such furious barking that it alarmed Mr. Allen, who was outside, and he hastened to see what was the matter with the dog. On reaching the scene of the accident he was unable to do anything but had to run to Engineer Silas Luther and have him stop the engine. By this time the girl had been on the shaft eight or nine minutes and gone around some eight or nine hundred times. She was unconscious when taken off but soon recovered. She is badly bruised about the feet and legs but no bones are broken and she is rapidly re-
