The Pittsburg Exposition.

What Decoration Day is to the G. A. R., Washington's Birthday to the Jr. the annual opening to the public of the means more to the general public-the season of pleasure, music, art and inthousands who go two and three times a week. One can't begin to see all the attractions of the show in one day, because there are the great musical con-certs by the most famous bands in the country, and the special attractions that are each of them after enough to It is the place of resort of all classes and conditions of people, and if the LX position, perchance, should miss a season. Pittsburgers would find a vod hard to till and out-of-town visitors one of their great annual attractions. The record of the Expesition the

eight seasons it has been opened bear out these assertions. It is a fact that the average attendance in round numbers has approximated 400,000 people each season of forty days, and of this averaged 45,000 annually. In other wo ds, that number of railroad ticket coupons have been taken in at the gate, though the total out-of-town attendance has been much targer.

The ninth annual Exposition this year opens on > ept 1, but a few weeks hence, and closes on Oct. 16, It is superfluous to say the big show will be greater than ever. Every year has been greater; but the truth is, this year there will be a greater variety of entertainment than has ever before been attempted. To be sure, the main building will be stocked with magnificent exhibits-many of them entirely newto please the ladies and their consorts. The concerts, with seating capacity for 5,000, will be held in this structure as of yore. The big machinery hall will Prosperity seems to have struck this have many new me hanical ideas, esthe merry go-round, the roller-coaster,

the steaml oat excursions and other outside attractions will receive generous support. The great foyer of the main ted with electricity and sheltered and bow-red with rustic d-corations, will prove one of the most attractive spots. It will be cool as a cucumber here, along the great lakes.

Then there is the cinematographe, the most wonderful and readistic photographic reproduction of moving scenes.
