Ills name was placed upon the Roll of Nobles, and a gold medal with the following inscription—Dr. S. Cheopsus, the Public Benefactor—was pre-

sented to him by the Viceroy.

The preparation has been used in several epidemics of cholers, both as a preventive and durative measure, and with such great succes that it has been introduced into nearly all the

general hospitals of the old world.

The old saying that an ounce of prevention is worth a pound of cure, applies with marvellous force to cholera, and therefore any remedy that will protect us against this terrible disease should be treely and persistently

issed.

All pathologists now agree that the cholera poison acts on the system through the blood, and that any combination which acts on the system than the state of the system. and that any combination which acts on the excretory organs, and keeps them in working order, must prevent a sufficient accumulation of the poison to exert its terrible effects on the organism. This is true not only of tholers, but of nearly all other maladies, especially the different forms of fovers.

The Zingari Bitters is just such a remedy as the above conditions require. It acts on the the above conditions require. It acts on the organs of excretion and secretion, keeping up

perfect balance between them. This Bitters is composed entirely of roots and herbs, so nicely concocted that every organ is acted upon and put in tone. Its tasts is pleasant and its effects prompt and lasting. Numerous cases of the following diseases have been cured by it: Cholera, Diarrhoen, Typhoid and Typhus Fever, Fever, Ague, Neryous Debility, Anaemia, Female Irregularties, Dyspepsia, Flatalency, Colic, Scrofula, &c.
