Hoff heins' Patents. The No. 1 Machine has two Driving Wheels, Hinge Joint and Folding Bar, making it very convenient to move from one place to another; is very simple in its construction, extremely light draft and durable, cuts 4 feet 10 inches in grass and 5 feet 2 inches in grain; is a Selt-Raker and Side Delivery, and s capable of cutting a whole field without inding a sheaf, and does the most satisfactory work This Machine can also be used as a Hand Machine without injuring its qualities as a Resper. The Machine is warranted to cut Grass as well as any Single Mower that cuts the same width. It is a strong twohorse Machine-three or four can be used, if equired, in hilly ground. GREAT IMPROVEMENTS have been made for the coming season. The Machine is also perfectly balanced, no weight on the horses' necks in Mowing or who have used it in their practice, and given Beaping. No. 2 is a light two-horse Machine, and is it the pre-eminence over every other compound.

THE GREAT FEMALE REMEDY NATIONALSELF-DISCUARGING STREL SPRING TOOTH Horse Bake! Patented September 9th, 1862, and Re-issued December 6th, 1864. . This Bake is an Independent Steel Spring medical research, that acts so powerfully, Tooth Rake, and has proven itself to be the positively, and harmlessly, in cases of female most perfect HORSE RAKE now in use, irregularity, as does this medicine. In all Toold hase, and use proven heart and mind. most perfect HORSE RAKE now in use, with this Rake the Horse does all the work, both the Raking and Discharging, by the dri-rer moving a lever a few inches, which throws it in gear, and as the borne moves forward it traises the treth and discharges its load, and then shifts out of gear itself, the teeth drop-ping down ready to rake again. By this ope-ration it is easily understood that the Raker has hardly any work to do at all! Important imp. ovements have been made of late, making it very simple and durable in its construction.
