SHIREMAN'S MATIONALSELF-DISCHARGING STEEL SPRING TOOTH

Horse Rake!

Patented September 9th, 1862, and Re-issued December 6th, 1862. This Rake is an Independent Steel Spring Tooth Rake, and has proven itself to be the most perfect HORSE RAKE now in use. With this Rake the Horse does all the work, both the Raking and Discharging, by the driver moving a lever a few inches, which throws it in gear, and as the horse moves forward it raises the tooth and discharges its load, and then shifts out of gear itself, the tooth drepping down ready to rake again. By this operation it is easily understood that the Raker Archive in each class was awarded a Medal, and they were classed as follows: The best michines in each class was awarded a Medal, and they were classed as follows: The best michines in each class was awarded a Medal, and they were classed as follows: The best michines in each class was awarded a Medal, and they were classed as follows: The best michines in each class was awarded a Medal, and they were classed as follows: The best michines entered for the different Medical, and they were classed as follows: The best michines entered for the different Medical, and they were classed as follows: The best michines entered for the different Medical, and they were classed as follows: The best michines entered for the different Medical, and they were classed as follows: The best michines entered for the different Medical, and they were classed as follows: The best michines entered for the different Medical, and they were classed as follows: The best michines entered for the different Medical, and they were classed as follows: The best michines entered for the different Medical, and they were classed as follows: The best michines are claiming Medical, and most perfect the first and the ear or shelled.
