For the Getty sburg Compiler. STOCK-BAISING .-- HORSES.

In order to make the raising of horses profitable to farmers, one of the most important questions for a farmer to ask himself is, "what kind of horses does the 20 00 market require, and is best suited to my hand?" Now, from our close proximity. to the large Atlantic cities, there are two binds of horses that will always be found horse, and the carriage or light-draught 20 00 horse; and as these horses are best adapted to this section of country, I propose to

allude to them at this time. The London dray horses, that have become so world-renowned, are only our ordinary stock, raised with great care purposely for that use, and are worth from five hundred to one thousand dollars a piece. These horses are now being equalled only in New York and other large cities of America. As I have told you, they are bred with great care, and are never crossed in breeding with other 1,000 00 stock. This is a very necessary measure 475 00 in order to improve your stock. Never cross your stock. Never put a Conestoga 11,763 68 mare to a thorough-bred stallion, and vice versa-the offspring of which will be neither the one nor the other, but in all probability a poor, blind, spayined, ring-boned, crooked-legged creature, unfit for any use. If this care is taken good colts will not be so much the exception

as they are. In choosing a brood-mare, always select one of dark color, broad across the hips, and if possible sound. In selecting a stallion, endeavor if possible to find one as near like her in color, character, size and blood, as possible; for, as I have before remarked, the heterogeneous mass of useless horse flesh upon the market is the result of bad selections in this matter. After the colt is dropped, the farmer must not leave it to care for itself, as is

SALT FOR GAPES.

Every one has had his say about gapes; now let a Buckeye tell you how we manage this matter. Formerly we fed the young brood with corn meal dough, losing more or less with the gapes July next, will immediately thereafter be closed every season. Latterly we have salted the dough, and now raise some two hundred chickens per season, without losing one from gapes or any other disease. The chickens are bright, vigorous and healthy, and always commence laying early in fall. Now we have some forty with him. hens, which give us an abundance of eggs. Farmers should not hesitate to adopt this plan.

Our local taxes are no exceptions. The State tax for this Commonwealth amounts sty ins increased in the same time from \$13 to \$17 in the thousand; and the same is true of all the cities and towns about us. The remedy is in the hards of the people, and if they do not exercise it they have no right to complain. But if they think that we have enjoyed as much as we can afford of such luxuries, we call upon them to kick over all platforms built upon abstract dogmas, and to choose

wind upon abstract togmas, and to choose servants who will act for the best interests of the country. We are on the wrong track. Let us change our course before the Ship of State is wrecked upon the breakers dead ahead?" The Age is entirely right in declaring that the "broakers dead ahead" are the Radical party, and its policy with rafer-ence to reconstruction. With ten States reduced to military Territories, the peo-ple ruled by the sword, business ruined, and capitalists prevented from operating in that fruitful and productive section for fear of confiscation and the bestow-Josh Billings says: Courtin is a luxury, it is ice water, it is the pla spell of
