ler year to show itself on every crop that is put in the land.

The Conowago Phosphate contains a large percentage of Annionia and Phosphoricacid, which are essential clements to vegetable food. They either enter directly into the plant or prepare the atkatics in the soil to do so. The base of the conowase Phosphate is PURE RAW BONE, completely and thoroughly dissolved without the use of any volatile agents of the Conowase Phosphate is that it will dissolve the sand in the soil and set the silien free to be absorbed by the soil and set the silien free to be absorbed by the growing plant, which is a very important ingradient in gly ing firmless and strength to the stake and grain. It self prevent the falling and lodging of crops that are incred up by a wet and warm senson, and will greatly facilitate the ripening of the grain and sector of against the view for the grain and sector of against the view for the grain and sector of against the word why we are not arrant to place it beside the best in the court. country.

Let all the farmers and planters make up their minds that they will try the Great Conowago Phosphate this init.
