RADICAL HATRED OF CATHOLICS. The spirit of hatred toward the Cath-Church which was so rampant a few years since still exists. The other night the Badicals of Bellefonte had a procession to celebrate the victory in his State, and when passing the Catholic Church of the town they stopped and deliberately gave hideous groans same spirit which excited the Philadelphia riots. The will to burn the church in Beliefonte existed. Yet, strange to say, there are Catholics who vote with this despicable party. We have no doubt enough of them gave support to their mortal foo in this State to make up the insjority that party received at the recent election. some of these days they will see their folly, but it may be too late then for them to arrest the evils they have brought upon themselves.—Lancaster Intelligencer.

HON. HENRY D. FOSTER has been elected to Congress in the Westmoreland district, over John Covode, by forty-one majority. 8. As additional aid, it makes an absolute donation of 12,800 acres of land to the mile, lying upon such side of the road.

9. The bonds pay six per cent, in gold, and the principal is also payable in gold.

10. The earnings from the local or way busisiness were over Four Million Dollars has tyear, which, after paying operating expenses, was much more than sufficient to pay the interest. These carnings will be vastly increased on the completion of the entire line in 1839. n 1809.

11. No political action can reduce the rate of

interest. It must remain for thirty yearssur per cent, by many remain for thirty years— sur per cent, per annum, in gold, now equal to between eight and nine per cent in currency. The principalis then payable in gold. If a bond, with such guarantees, were issued by the gov-ornment, its market price would not be less than from 20 to 25 per cent, premium. As these bonds are issued under Government au-thority and supervision, upon what is very largely a Government work, they must alti-mately approach Government prices. Noothr corporate bonds are made so secure 12. The issue will soon be exhausted. The estes have sometimes been half a million a day, and nearly twenty millions have already been sold. About ten millions more may be offered. It is not improbable that at south time not far distant, all the remainder of the

bonds the Company can issue will be taken by some combination of capitalists and withbonds the Company can issue will be taken by some combination of capitalists and withdrawn from the market, except at a large advance. The long time, the high gold interest, and the perfect security, must make these bonds very valuable for export.

All the predictions which the officers of this Company have made in relation to the progress and fusiness success of their enterprise, or the value and advance in the price of their securities, have been more than comfrued, and they therefore suggest that parties who desire to invest in their bonds will find it to their advantage to do not once.

The price for the present is 102 and accraced interest at the rate of six per ceul, in currency from July 1st, and subscriptions will be rescrived in tectysburg by the FIRST NATIONAL BANK, and in New York AT THE COMPANY'S OFFICE, NO. 20 NASSAU ST.,

These ports have a foreign commerce of \$900,000,000, and an enormous domestic trade, beside which we have the immense internal commerce of the Empire, radiating from these points, through its canals and navigable vivers.
The cable being laid, this Company proposes erecting land lines, and establishing a speedy and tradiation to the communication.

ly means now of communicating information is by couriers on land, and by stoshers on water.

The Western World knows that China is a very large country, in the nain densely peopled; but few yet realize that she contains more than a third of the human race. The fact that he was the contains more than a third of the human race. The fact having purposes by the local magistrates make her population Pole Insulated and Borrier Millouis, and that is more likely to be under than over the actual aggragate. Nearly all of these, who are over ten pears old, by a only can but do read and write. Her civilization is peculiar, but her literature is an extensive as that of Europe. China is a hind of teachers and imales; and the latter dreery profilered facility for prox nrigg early information. It is observed in California that the Chinese finake great use of the felegraph, though it there transmits measages in English alone. To-day great numbers of face is seamers are owned by Chinese merchania, and used by them exclusively for the transmission of early intelligence. If the telegraph we province in erfactnee, it is believed that its business would pay the cost within the first two years of its successful operation, and would steadily increase thereafter.

No enterprise commends itself as in a greater degree remunerative to capitalisis, and to ony whole people.
