

Summary of News.

Reports from the far West state that many persons have been forced to death. Reports from the far West state that many persons have been forced to death.

A Career Path of Romance.

There died lately at Bright Star, Hopkins County, Texas, a typical, typical, typical.

A Desperate Fight.

A band of Indians, about sixty in number, upon the Indian reservation at the ranches on Cienega de Saiz, about fifteen miles from an old San Antonio station.

The Secretary of the Interior.

The following is an abstract of the report of the Secretary of the Interior in Indian affairs, it seems that the tribes have raised agricultural products to the value of \$10,000,000.

Report of the Secretary of the Navy.

Secretary of the Navy Robert Taft, in his report to the Senate, says that the navy list, twenty-nine sea sailing ships, and the remainder side-wheel steamers, or sailing vessels with auxiliary engines.

The New Appropriation Bill.

The House of Representatives have been in Committee of the Whole on the Appropriation bill, reported at the last session. The bill provides that after the 1st of March, 1913, the House of Representatives shall consist of 281 members.

Farm, Garden and Household.

To Remove Grease from Coat Collars.—Wash with a sponge saturated with kerosene and water.

Insect Stings.—Salt is a cure for stings; sweet oil, powdered mallow, or onion, or powdered chalk made into paste with water.

Look out for Stragglers.—Have the horns and sheds in readiness, and be careful not to let the sheep be exposed to severe rain.

To Extract Grease from Payments.

Wash with a piece of flannel in spirit of wine, rub the grease with the flannel, and repeat the process once or twice, and the grease will disappear.

To Make Hair Water Soft.

Boil one pound of White Rock Potash in one gallon of water, and add a quart of a gallon of the preparation to a tub of water.

Fertilizing Hoes should be pushed forward rapidly, and sold early.

We are probably obliged to accept low prices this season. In our section we are feeding at a decided loss.

Milch Cows should not be allowed to suffer to decline in flesh at this season.

Little heat and a few extra rations will wonderfully, both in flesh and milk. Guard against cold storms on the one hand, and hot, close seasons on the other.

Sheep.—There is an increased and increasing demand for sheep and wool, and it may pay better to raise a poor flock of sheep than to dispose of them.

To Remove Starch or Rust from Flax Irons.

Have a piece of yellow brass tied in a corner of the cloth, and rub the iron with it. The iron is almost hot enough to use, but not quite, rub it quickly with the brass, and then with a clean coarse cloth.

Colorado Bees.—Gen. Cameron states that the yield of bees in Colorado is 175 tons per acre, and of cabbage 30 tons, which will sell at 5 cents per pound.

Statistics show that the harvest of 1870 was the largest ever known in South Australia.

Colonies, producing nearly 7,000,000 bushels of wheat, 1,000,000 of barley, 1,000,000 of oats, and 1,000,000 of clover.

To Kill Weeds.—Gypsum—Gypsum is the best of all weed killers.

It is possible to coax to the field a flock of poultry, they will take every worm that they see, and they will follow the plow very eagerly for them. Crows and skunks will more readily find worms when the ground is turned up and loosened.

How to Cure Hives.—The following recipe for curing 1,000 pounds of pork hams is the one used by the gentleman who was the first president of the State Agricultural Society of Maryland.

Take two and a half pounds saltpeter, powdered, one-half bushel fine salt, three pounds brown sugar, one and a half pounds molasses. Rub the mixture with a mallet; pack with care. Turn over once a week, and add a little salt. After being down for three or four weeks, then, or pack away in cool place in a cellar or in a cask.

Care for Horses Feet.—The feet are the most important part of the horse.

When that is out of order, the horse is nearly useless. It is a good idea to have a year's great deal of care and attention may probably be turned to the feet of horses. Wash with clean water, and give five cents worth of iodine. When a horse is brought in from work from the feet of legs should be washed with kerosene and rubbed dry. The horse should occasionally well tarred with common pitch. If any injury occurs from tar, wash with clean water, and give five cents worth of iodine.

How to Fatten Cattle.—Cattle should be fattened as early as possible.

As soon as the calves are born, they should be put on a good ration of food. They should be kept in a clean, dry, and comfortable place. They should be given a good amount of exercise, and they should be kept in a clean, dry, and comfortable place.
