Should come to coldly meet and greet With careless clasp and loveless lips-If we, who in each other's life,

Live doubly every joy and pain Should come to coldly drift apart

And walk in self-wrapt ways again— If morn should lose her rose and gold,

And night the glory of her skies, And all things pale and fade, because We look no more with love's deep eyes-

If down the dreary, beaten way, Where other hearts, that loved, do tre With sad indifference-we, too, Should come to find our passion dead-

O God : I'd wish that we to-day Had said farewell, and in a breath While yet our hearts were fond and true

Had fiercely crushed our love to death. Emily H. Moore.

Farm, Garden and Household. EARLY LAMBS for the butcher mus have warm, dry quarters, and the ewes must be well fed. Nothing is better than clover hay and bran, with say half a pound of grain per day. Roots, of course, would be a great help. Water regularly. The lambs should have a ce, into which they can run through

meal and bran they will eat. GRAFTING PEARS ON OAKS .- W. G. Burke, Glen Mills, Pa., grafted a cion of pear on the root of an oak, and it grew ously, and bore fruit very early. Did the root sustain the cion formed roots of its own, or did it unite with it? A. S. Fuller said very likely doubted if any union was formed be-tween the oak root and the cion.

BONE-MEAL FOR COWS. -- HOR. Harris Lewis of the Farmers' Club to whom was referred the inquiry made a few weeks must further economize at points distant ago about cows eating rubbish, replied by letter, saying that bone-meal was needed. It might be fed to them in small one material for a lifetime. On sandy and, gypsum-would have a similar effect; ne hundred pounds per acre was the right quantity.

milk-pail is very properly being alto-together discarded by wise dairymen. Tin pails are easily kept properly. in pails are easily kept perfectly and this is now recognized as the chief requisite to success in making good cheese or butter. As soon as the milk is oured from the pail a thorough scalding and washing should be given to it, and a sweet and airy place sho not only for milk-pails, but for all utensils used in the dairy. Any foul odor or mold will affect, to a certain extent, even tin, while wood will very readily absorb

How to Preserve Meadows .- D. F. Easton asked the Club if bone dust, ashes, lime, and guano would keep a meadow fertile without barn-yard man-ure. Ex-Senator Geddes said if meadows were dressed occasionally with bone dust, and each alternate crop allowed to grow without cutting, and fall down and rot on the ground, they will remain in good order for many years; when they became sod-bound thay should be well.

"All and the Captain cried out wildly for one of the most famous of the mining of the took a look at the deserted and snow-ship, until she was conscious of being dragged ashore by somebody, as she only one story in height were covered to thought. She held her babe firmly their roofs with snow. The two story classical contents of the most famous of the mining one of the good order for many years; when they became sod-bound they should be well harrowed in the spring, and some fresh seed sown. J. Crane recommended ashes and plaster or lime occasionally with the in England which had been said to have been mown for centuries, which had no manure, but of late years a dressing of guano was applied.

THE FARMERS' CLUB.-Moles, according to Mr. Smith, might be destroyed by placing pieces of apples in their holes, on which arsenic had been sprinkled.

—Hams had been kept from flics, by the Chairman, by packing them in bar-rels with pine shavings between them. Mr. Geddes kept hams from the flies in dark smoke-he

conscious. A closer examination revealing the fact that the man was dead—two years, and a fine of from \$50 to \$1,000\$. Tozen to death while performing his into a room as a thing apart. Brides are divided into two classes—the serious customary rounds.—N. Y Paper.
