

Love's Farewell. Since there's no life, come let us kiss and part. Nay, I have done you no more harm than you have done me. I have done you no more harm than you have done me.

Paras, Gardens and Household. GRAVES.—It always has been the case that the cold and cold winds blowing from the north of the grapes has been backward on account of the consequent diminution in the total amount of the established quantity of heat necessary for an early and prolific maturity.

Eggs for Animals.—Fresh eggs, according to the country farmer, afford great nourishment for weak animals. It tells of a colic which to all appearances was nearly dead, the breath of life being barely perceptible.

Horse Collars.—How to fit a new collar to the shoulder of a horse is a subject which is not generally understood. It should be of the proper size; just before putting it on the first time, immerse it in water, letting it remain about a minute, and immediately remove it.

Hess.—W. H. White describes in the following paragraph his successful treatment of a case of tetanus of the jaw following form: I took them and made corn meal and red pepper lake pills as large as I could roll up in their mouth and passed down by the throat.

New Notice to Many Cases. We notice that in many places, this season, the corn blight is attacked by a minute insect, very similar to what is described in the following paragraph.

Workmen.—A correspondent desires us to give him the best remedy that has been used for the following one which appeared not long since in the Connecticut Farmer. It takes a piece of shod with burning coals.

Farming Tools.—In regard to the number of times per year the plow should be used, when put up for fattening, my experience in the matter is this: When horses are made as they should be, after putting them in the stable, they will be somewhat plentifully for six or eight days, they will then bear full feeding, and they should have all that they can eat and drink.

Wanted by a Cloud Burst.—On a late Sunday, a cloud burst on the upper waters of a branch of the Connecticut river, which was the first of the season since the pike in Carroll county, and the waters came rushing down in a volume four or five feet deep, taking the bridge over the river in its way.

Wanted by a Cloud Burst.—On a late Sunday, a cloud burst on the upper waters of a branch of the Connecticut river, which was the first of the season since the pike in Carroll county, and the waters came rushing down in a volume four or five feet deep, taking the bridge over the river in its way.

A Melancholy Story. Anna Solomon, aged twenty eight, a comely looking woman, committed suicide by taking arsenic on the 10th of June. Deceased was married about three years ago to a pedlar named Israel Solomon.

Herding in California. The ranches from which I write—the Tejon it is called—seems to me, as I have said, the finest property in California.

German Courtesy.—No one can help admiring the simplicity, kindness, and honesty of the Germans. The universal respect for the rights of man is a very different thing from the politeness of the French.

Weekliery of New York Market. READERS.—The market for State and Western flour is a shade firmer.

Weekliery of New York Market. READERS.—The market for State and Western flour is a shade firmer.

Weekliery of New York Market. READERS.—The market for State and Western flour is a shade firmer.

Weekliery of New York Market. READERS.—The market for State and Western flour is a shade firmer.

Weekliery of New York Market. READERS.—The market for State and Western flour is a shade firmer.

Weekliery of New York Market. READERS.—The market for State and Western flour is a shade firmer.

Letter from Dr. Livingston. The following is Dr. Livingston's letter to his brother in Canada: Dear Brother, Nov. 16, 1871.

Nightmare and Dreams. There is one curious and difficult inquiry to which no satisfactory reply has yet been given. It is in regard to the States in a singular manner.

In an Asylum. At the time of the Bloomington Lunatic Asylum investigation, the New York Tribune published a series of articles in which it is alleged some persons were sent to asylums, etc.

South African Diamonds. A miner who has just returned from the diamond fields in South Africa says: "A large portion of the diggers are Cape Coloreds and Natalians."

RAILROAD BONDS.—Whether you wish to buy or sell, write to Geo. W. HASKIN, No. 7 Wall Street, N. Y.

A New Epoch in Medical History.—"Reason and chance," says Flury, "led me to the discovery of the vitamins."

THE RISING STAR. For Beauty of Polish, Saving Labor, Cleanliness, Durability & Cheapness, Unequaled.

At the time of the Bloomington Lunatic Asylum investigation, the New York Tribune published a series of articles in which it is alleged some persons were sent to asylums, etc.

A Large portion of the diggers are Cape Coloreds and Natalians. Dutchmen, Englishmen, Australians, and of course Americans. There is a sprinkling of Frenchmen, Italians, and Spaniards. Those who do well are generally Americans and Americans, who have had experience in mining in California and Australia.

A Large portion of the diggers are Cape Coloreds and Natalians. Dutchmen, Englishmen, Australians, and of course Americans. There is a sprinkling of Frenchmen, Italians, and Spaniards.
