family use : Strict attention should be paid to all parts of the cow-house; sound feed, cleanliness in the stalls, punctual feedthree hours, when the pressure ceased. I went on board the vessel and asked the sailing master if the vessel was making any more water than usual. He returned that she was not. I then went they cafnot afford to waste anything, to make this great error in some American farms right glaring. Currying cows as an act of cleanliness I would recommend, and the daily washing of the adder must be attended to by all means. All this kas considerable influence on the health of the cow, as well as on the productiveness of milk. It now and then happens that a cow, heretofore good, suddenly shows a decrease in her milk. This never should be a reason of neglecting her. On the contrary, she should have a very comfortable, clean, siry, but warm place, and the best of feed. She will soon recover, provided an actual disease has not set in. In the tending of calves in the cow-house, special regard should be paid to those which show the marks of future great milk productiveness, and as such are intended to be added to the stock of the dairy farm.

season of fresh fruits, red currants, gooseberries, or plums may be used instead of the dried currants.

containing boiling water, and put in the wax; cut into very small pieces into the mortar. When the wax has

vention adopted a report of a committee, defining as follows the standard of excellence in swine as relates to the interests of both farmer and consumer:

The hog must have a small, short head, heavy jowl, and thick, short neck; all seem tolerably well. Captain Tyson weigh from nine hundred to one thousand pounds, and will last, with constant use (not abuse) twenty to twenty five years.

head, heavy lows, and tolerably erect, but it is not objectionable if it droops slightly forward. He must be straight on When they left the Polaris all on board ly forward. He must be straight on the bottom, from the neck back to flank, let well down to the knees in the brisket, and possess good length from head to tail; back broad and slightly curved or arched from the shoulder to the setting on of the tail; ribs rather barrelled shuped; tail small. The ham should be long from the hock to the letting off at the loin, and be broad and full; shoulder not too large, and yet sufficiently to give symmetry to the animal; hair smooth and evenly set on; skin

The North Pole Expedition.

Return of Part of the Polaris CrewWhat the Survivors Say--Story of a
Captain.

The following statement was furnished a correspondent by Capt. Tyson
of the Polaris Expedition:
On the 24th of August, 1871, we left
Tessinsack and went through Smith's
Sound. We succeeded in getting as far
anorth as latitude 82 16, when we returned and wintered at Polaris Bay, latitude 81 38, longitude 61 44. We were cleanliness in the stalls, punctual feeding likewise; place the cows according to their temper, not two evil-disposed annimals together,—also as the one or the other loves a warmer or a cooler spot. The cow-house should be airy, but not exposed to draft. The strewing of straw should be attended to—the more the better for the cows, particularly in winter, when cold. The stalls must be cleaned three times a week, when the was buried on the 11th. The attack that carried him off was said to be aponentially and the put themselves in opposition to winter put themselves in opposition to the match. But this Romeo was no drawing-room lover. Desperately in earnest, himself, and confident of the fidelity of his Juliet, he bravely went to work to make a home for her. He already owned a quarter-section of land. Taking his axe he went to his "estate," and there cut down trees and hewed out logs that carried him off was said to be aponential. returned on the 24th, when he was taken more the better for the cows, particularly in winter, when cold. The stalls must be cleaned three times a week, and the feeding floors or troughs swept twice a day. In fact, everything in the cow-house should be calculated to make the animal feel comfortable in it. Perfect cleanliness throughout the cowhouse, to keep out the stench, should be the rule, else the milk will suffer from the rule, else the milk will suffer from the rule, else the milk will suffer from the rule all attention to an unpardonable neglect so often met with at cowhouses. I mean the perfect disregard of the valuable raanuring fluid which is produced in cow-houses and from dunghills, and which is so often left to run into a ditch or creek near by, instead of being caught in some vator vessel, and used as a most valuable manure. Yet every farmer knows that without manure worn land cannot be callivated. One must have seen European farms, where

which show the marks of future great which show the marks of future great milk productiveness, and as such are intended to be added to the stock of the fourteen cans af pemmican, eleven and a half bags of bread, ten dozen one and that the fourteen cans af pemmican, eleven and a half bags of bread, ten dozen one and that the fourteen cans af pemmican, eleven and a half bags of bread, ten dozen one and the fourteen cans af pemmican, eleven and a half bags of bread, ten dozen one and the fourteen cans af pemmican, eleven and a such are fourteen cans af pemmican, eleven and a half bags of bread, ten dozen one and the fourteen cans af pemmican, eleven and a half bags of bread, ten dozen one and the fourteen cans af pemmican, eleven and a half bags of bread, ten dozen one and the fourteen cans af pemmican, eleven and a half bags of bread, ten dozen one and the fourteen cans af pemmican, eleven and the fourteen cans af pemmican and the fourteen can be a second to t dairy farm.

F. D. Curtis—The only fault with this article is it does not go fare nough. The stables should be cleaned not only once a week, but once a day, and then the control of the cleaned in the control of the c

made ourselves as comfortable as we ty-first, Thirty-second, Thirty-eighth, could. We were ten white men, two into the mortar. When the wax has melted, take it out of the mortar, and add the oil by degrees, beating with the pestle until it is cool; then mix the rosewater with the mass. Ii it is desired to be colored, rub up a little carmine with the oil before mixing it with the wax.

To Clean Merino.—Grate two or three large potatoes; add to them a pint of cold water; let them stand for a short time and five with which to warm our scanty allowance of food through the darkness of the Arctic winter. In the latter part of February we lived principally upon birds, and in March commenced to catch seals. Through that month we supported ourselves on bears' and seals' flesh, wasting neither skin but of late years had been a Democrat for a short time and five all wax from the sequence of five children and fiv

pint of cold water; let them stand for a short time, and pour off the liquor clear, when it will be fit for use. Lay the merino on a flat surface, and apply the liquid with a clean sponge, till the dirtis completely extracted; dip each piece into a pailful of clean water, and hang it up to dry without wringside. It will then appear almost equal to new.

Parlor Puddings—Slice a penny loaf into a pan, put in with it half a liquid water; let them stand for a short time, and seals' flesh, wasting neither skin nor entrails. We collected enough food in this way to last us until the middle of May, had we not been driven to sea by a strong westerly gale in the latter part of March, our floe piece being then reduced from five miles in circumference to about twenty yards in diameter.

We left the piece on the first of April, and a Revenue Reformer. His last days to last us until the middle to by a strong westerly gale in the latter part of March, our floe piece being then reduced from five miles in circumference to about twenty yards in diameter.

We left the piece on the first of April, and abandoned nearly all of our meat, a large amount of ammunition clothing, skins and other articles, taking a loaf into a pan, put in with it half a lord was an effective debater.

tude 53 35 north, longitude 55 west, or near Wolf Island, and about forty miles from land. The Polaris is now without towards the other end, and it explains towards the other end, and it explains

shoulder not too large, and yet sufficiently to give symmetry to the animal; hair smooth and evenly set on; skin and small, well set under the body, and the space between them wide; a good depth between the bottom and top of carcass. He must possess a good, quiet the flat of the space between them wide; a good depth between the bottom and top of carcass. He must possess a good, quiet title bay to the northeast of Northumberland Island. I saw the vessel in the harbor there; her sails were furled, no smoke was issuing from her smokestack that I could see. I then attempted to bring my boats across the floe in an easterly direction, hoping to find water and reach the shore. I succeeded in dragging one boat across, took the water and attempted to reach the shore some distance below the knee as he does feet in length or around the leg below the knee as he does feet in length or around the hand will be should be suffered as he does feet in length or around the leg below the knee as he does feet in length or around the leg below the knee as he does feet in length or around the leg below the knee as he does feet in length or around the leg below the knee as he does feet in length or around the leg below the knee as he does feet in length or around the leg below the knee as he does feet in length or around the leg below the knee as he does feet in length or around the leg below the knee as he does feet in length or around the leg below the knee as he does feet in length or around the leg below the knee as he does feet in length or around the leg below the knee as he does feet in length or around the leg below the knee as he does feet in length or around the leg below the knee as he does feet in length or around the leg below the knee as he does feet in length or around the leg below the knee as he does feet in length or around the leg should have less the does to the hond the hond the hond that I took to be Northumber as the ment, in a speech to the populace about the seeks since, spoke of the two seeks since, spoke of t as he does feet in length or around the body, and the depth of the body will be from the northeast, and snowing very fast and drifting. I was driven back on Expelling Fites from Rooms.

It is stated that if two and a half pounds of powdered laurel leaves are macerated or boiled in two gallons of water, until their poisonous quality is extracted, and with the solution a whitewash is made, by adding as much quicklime as can be slacked in it, and if a room be whitewashed with this preparation, flies will not settle on the walls for six months.

I was driven back on the ice again and compelled to haul my boat out. Night closed on me and carried us to the southwest. In the morning we we were about thirty miles southwest of where the slrip went in harbor. A heavy sea was running, which broke wash is made, by adding as much quicklime as can be slacked in it, and if a room be whitewashed with this preparation, flies will not settle on the walls for six months.

A stand drifting. I was driven back on the ice again and compelled to haul my boat out. Night closed on me and carried us to the southwest. In the morning we we were about thirty miles southwest of the Kaiser's boyonet must have dissipated it long ere this.

Down in the Sea.

At 550 fathoms down in the sea there is a perfectly uniform temperature, the limit and compelled to haul my boat out. Night closed on me and carried us to the southwest. In the morning we we were about thirty miles southwest of the Kaiser's boyonet must have dissipated it long ere this. would come to our relief, I gave myself

once a week, but once a day, and then the wiredows should be opened to let in a little fresh air and sunshine. In short, a man chould treat his cow-stable just as he would his bed-room. I go further; I take pleasure in giving my cows a good currying. Cows kept in a stable, especially, need this treatment—it is as necessary to them as washing is to a human being. I have especially noticed this treatment at Beacon Stock farm, on my late visit there.

Dr. Wheeler—I thought stl farmers practiced this with all stall-fed animals. I am certain it is greatly totheir benefit.

Fractical Recipes.

Baked Batter Pudding with Suzt.—To a quart of milk mixed in by degrees, or a pound of four, add two eggs, four large spoonfuls of beef suet, shred fine, half a pound of currants, a teaspoonful of grated ginger, and a little salt. An hour and a half will bake it in a brisk oven. In the season of fresh fruits, red currants, gooseberries, or pluns may be used interest of the stable such as the single came on the morning then bring them on their keel. The isee grew firm. In the morning, knowing that I had not provisions enough and other articles of food, clothing, compasses, &c., on the press and Member of Congress, died in the morning, knowing that I had not provisions enough and other articles of food, clothing, compasses, &c., on the morning, knowing that I had not provisions enough and other articles of food, clothing, compasses, &c., on the press and Member of Congress, died in the morning the press and Member of Congress, died in the morning the provisions cough and other articles of food, clothing, compassed, &c., on the following sea in the morning the provisions cough and other articles of food, clothing, compassed, &c., on the press and Member of Congress, died in the provision senough and other articles of food, clothing, compassed, &c., on the provisions cough and other articles of food, clothing, compassed, &c., on the provisions cough and other articles of food, clothing, compassed, &c., on the provision to the fermin

season of fresh fruits, red currants, gooseberries, or plums may be used instead of the dried currants.

LIP Salve.—Take two ounces of oil of sweet almonds, half an ounce of white wax, and half an ounce of white wax, and half an ounce of rosewater; set a mortar in a vessel containing boiling water, and put made ourselves as gooseberries, or plums may be used instead of the dried currants.

In the morning the member of the New York Legislature, southward very fast. We saw no more land for many days, bad weather continuing all through the month of November. We built snow houses and containing boiling water, and put made ourselves as gooseberries, or plums may be used instead of the dried currants.

In 1847, Mr. Brooks was elected a member of the New York Legislature, southward very fast. We saw no more land from 1849 to 1853 he was a representative in Congress from New York city, serving on the Committee on Public Lands. He was elected to the Thirty-seighth.

dried. Bake in cups, saucers, or in patty puns, well buttered, for an hour Turn them out and serve them up with white wine sauce.

Gus Stract. —Pound two ounces of fine white gumarable to powder; put it into a jug, and pour on it a pintor more of boiling water, according to the degree of tenacity required; cover the jug, and let it remain for the night. On the following morning, pour the lough and better the night on the absolute, cork it, and keep it for use a clean bottle, cork it, and keep it for use a lean bottle, cork it, and keep it for use a pint of starch which has been made in the usual manner, will give to shirt fronts, wristbrads, collars, etc., a fine gloss which not only enhances their appearance, but tends to preserve them for a longer period than ordinarily.

In the out and serve them up with white wine sauce.

Gus Stract. —Pound two ounces of fine whote gumarable to powder; put it is fine white gumarable to powder; put it is a load to be a condition of the day—what shall be done to save us from the ravages of the day—what shall be done to save us from the ravages of the day—what shall be done to save us from the ravages of the day—what shall be done to save us from the ravages of the day—what shall be done to save us from the ravages of the day—what shall be done to save us from the ravages of the dermany. In this combination elasticity, strength, pliability, toughness, resonance, lightness, durability, and beauty are individual qualities, and the general result is voice. There are also used of the metals, iron, steel, brans, white-metal and lead. There are in the same instrument of seven and a half octaves, when only the strength and corruption? It ought to be legislated against just as flercely and determinedly. That it may be shorn of much of its strength and corruption? It ought to be legislated against just as flercely and determinedly. That it may be shorn of much of its strength and corruption? It ought to woice. The two greatest causes are fined. The fined of the day—what shall be done t The National Swine-breeders' Conention adopted a report of a committee,

ompleted \$78. Lighter cloth at \$3 a yard is preferred by some ladies for summer wear. Glossy broadcloth and alcoholic drinks. It spoils every meal and kills sleep. It is the greatest enemy of the preacher, making people stupid and drowsy. The judge and jury in a court filled, as most are, with pestilential air, are as much under the influence of a deadly narcotic as the opium smoker. The peor of our cities suffer most. It is well to preach temperance to them, but isit not also of pre-eminent necessity to procure for them pure air and healthy to procure for them pure air and healthy sunlight? When we consider the almost universal fear of draughts which pervades modern society, it seems that nothing could be more timely than a

The Feet. The Journalist of To-Day. Fashionable Christianity in London is growing to be very amusing. People are now invited to prayer meetings precisely as they are invited to a social circle or an evening party. The Newcastle Chronicle prints, with the exception of names, dates, and places, the following transcript of a card, which it has received: "Mr. and Miss—propose (D. V.) to hold a Bible reading of oclock, when the company of friends is requested. Subject: Rev. II. Reading from half-past seven to half-past nine. Morning dress." Under such a prescription as to costume, one can prescription as men, but possessed with strange, invisible powers, which affect men's lives, faintly imagine the consternation which might ensue if a guest should arrive in a business coat or an afternoon gown. It also suggests the possibility that evening, and, perhaps, even fancy dresses, may yet be allowed at prayer meetings. A writer in another religious paper states that he recently got a card of invitation, which, as far as the body of it was concerned, might have applied to a dance or a card party, but in the corner were the characters "T and P." After a long study he discover and Prayers. He went; and when he found them handing Bibles round on a tray, like refreshments, he left discoverage and provisions of the law applicable to qual-bone-pinching boots, in order to display an abstract and brief chronicle of the footed, cramp their feet into thin soled, footed, cramp their feet into thin soled, to order to display an abstract and brief chronicle of the time, as the player used to be said to the term. Now this is very wrong. In cold weather, boots of good thick leati-beckens. The romance of yesterday, with its moving incidents and real figures, will engage the interest of vigorous writers as they engage that of the public, and, as fictitious situations and conditions, brilliantly written out for newspapers, will and Prayers. He went; and when he found them handing Bibles round on a tray, like refreshments, he left dis-Tea and Prayers. He went; and when he found them handing Bibles round on a tray, like refreshments, he left disgusted, without waiting for the Tea or the Prayers.

passions. As Congreve and Sheridan were, as Dickens and Thackeray were, the journalist may be, and partly is already; a man in whom apublic interest, great or less according to his genius, is taken; a man who, loving his fellowners. There is one great evil against which entirely obstructs the passage of the skin outward, and the moderate proposed in the proposed partly is already; a man in whom apublic interest, great or less according to his genius, is taken; a man who, loving his fellowners. There is one great evil against which entirely obstructs the passage of the carbonic acid gas from the moderate proposed partly is already; a man in whom apublic interest, great or less according to his genius, is the proposed partly in the proposed partly in the carbonic acid gas from the moderate proposed partly is already; a man in whom apublic interest, great or less according to his genius, is the proposed partly in the proposed partly in the proposed partly is already; a man in whom apublic interest, great or less according to his genius, is the proposed partly in the proposed partly in the proposed partly is already; a man in whom apublic interest, great or less according to his genius, is the proposed partly in the proposed partly in the proposed partly is already partly in the proposed pa taken; a man who, loving his fellowmen, has it in his power to be loved by them. The process is very simple. To be kindly, honest, fearless, capable, that is all; and I name kindliness first, because if a newspaper would be popular it must, like an individual, carry a palling statement; for it must be borne in mind that this is so much taken from the results of labor, and actually annihilated. The country is poorer by just so much every year. Of course, it as much every year. Of course, it is on much every year. Of course, it is on much accountable to much every year. Of course, it is on much accountable to much every year. Of course, it is on much every year. Of course, it is on much accountable to much every year. Of course, it is on the fearling of warm for cold boots or shoes. A change is often made from thick to thin-soled shoes, without reflecting upon the consended from thick to thin-soled shoes, without reflecting upon the consended from thick to thin-soled shoes, on the transfer purpose is often made from the changing of warm for the changing of warm for one poor beart that has sin one which it is seldom guarded. We mean the changing of warm for the changing of warm f

The Earl and Countess of Coventry attended the meet of the North-Cots-wold hounds at Elmley Castle on the 3d of April. The hounds were going at a tremendous pace, and had absolutely coursed the fox for about two miles. The Earl was close up, and his wife following. On riding at a rapid gallop up to a fence, his lordship was horrified to the best vehicle for his overflowing wisdom, his exuberant wit, humor, and fancy, his amazing activity; and I wonder that a man of such varied and large resources, of such vigorous, current, and racy faculties as Dion Boneicault. quarry. The horse then broke away, leaving the Earl in the quarry. It is supposed that the Countess observed the horse running away without the the horse running away without the Earl, and for that reason she made for the same fence, cleared it, and met with a similar accident, with, however, a less favorable result, for while the gentleman was but a little shaken, it was at first thought the Countess was was at first thought the Countess was killed. Her horse was found to have broken his back, and was shot shortly of the brain, and some severe bruises about her head and face, the Course is none the worse for the accident.

practice? Surely not. Yet how literally they ar ometimes set at naught in the treatment of dy pepsia, liver complaint, constipation, nervous prostration and general debility. How often are powerful purgatives, emetics and salivants give in cases of indigestion, bilious colic and costive ness, when the disease has already robbed th ness, when the disease has already robbed the patient of strength he needs to combat with the attack. The absurdity of giving debilitating medicines to sick people who are too weak already, is so manifest, that it is astenishing how any sane

BOYS Sample and 34 Page Catalogue 6 cts. J JAY WOULD, 30 Bromfield St., Boston, Ms so manifest, that it is astenishing how any sane man can believe in such practice. The rational course under such directions are in a daminister a tonic and regulating medicine, and the experience of a quarter of a century has proved that Hostetter's Stomach Bitters is the most wholesome and efficient preparation of this class to be found in the medical repository. It is, however, something more than an invigorant and a regulator. Its properties as an aperient and anti-billous agent; its vitalizing and purifying effect upon the blood; its utility when given as an anodyne, instead of laudanum, or chloral, or digitalis, or some other superfying narcolic; its tranquillizing tendency in spasmodic affections, and an apalatability, as contrasted with the sickening pills and potions of the pharmacoporia, certainly entitle Hostetter's Bitters to be called the most comprehensive remedy in existence.

A Story of Belmont. A Mining Holocaust,

Speaking of bankers (says the New York correspondent of the St. Louis Globe), I am reminded, as the great and good Abraham Lincoln was so fond of furnished to the world the most appalling shipwreck of the century, now contributes another horror which, if far less the startly in the second of the startly in the second of the St. Louis Globe), I am reminded, as the great and good Abraham Lincoln was so fond of under the startly in the second of the St. Louis Globe), I am reminded, as the great and good Abraham Lincoln was so fond of under the startly in the second of the St. Louis Globe), I am reminded, as the great and good Abraham Lincoln was so fond of under the startly in the second of the St. Louis Globe), I am reminded, as the great and good Abraham Lincoln was so fond of under the startly in the second of the St. Louis Globe), I am reminded, as the great and good Abraham Lincoln was so fond of under the startly in the second of the St. Louis Globe), I am reminded, as the great and good Abraham Lincoln was so fond of under the startly in the second of the St. Louis Globe), I am reminded, as the great and good Abraham Lincoln was so fond of under the startly in the second of the startly in the second of the startly in the second of the sec ling shipwreck of the century, now contributes another horror which, if far less sappalling, is regarded as a terrible one, and creates a doubt as to the safety of the numerous coal mines which form the most important industry of the province. The village of Westville, in the county of Picton, 103 miles from Halifax, is one of the most extensive mining settlements in the province. Apart from the numerous prospecting operations continusally in progress, there are three large collieries in full operation, exporting large quantities of coal. Navigation having recently opened, and business becoming active, the workmen in most of the collieries demanded increased wages, and several strikes occurred. One of the largest mines, called the Drummond Colliery, owned by the Intercolonial Coal Company of Montreal, was, in consequence, closed up for some days. The difficulty was arranged and the men went to work again.

At half-past eleven in the morning a shot in the coal set fire to the slope, and half au hour afterwards a fearful explosion took place, caused by the accumulation of gas during; the time the
