

Farm, Garden and Household.

Parm Notes and Gossip.

Sulphur of calcium dug in around the roots of grape vines and it has a powerful effect in destroying Phylloxera.

It is said that a sprinkling of red pepper will do all that runs to and fro about cabbage and other plants, and also all kinds of fungi.

Wm. H. Dwyer, of Highland, Ulster Co., N. Y., is reported by the Syracuse Farmer to have this season, 1904, produced an average of 500 lbs. of raspberries, from half an acre of land.

Dr. Haxman tells us that the recent drought cost him at least \$3,000, but that he might have saved this money had he been provided with facilities for utilizing water that he runs to waste.

When time is spent in clover seed it has been measured, only accelerates the action of the manure. Mr. Laves even adds lime to nitric acid, and superphosphate of lime.

A member of the Wisconsin Horticultural Society dares to maintain that the money which has been invested in pear culture in that State is equivalent to \$5 for each perfect pear that has been produced.

A good garden will contribute no more to the food of a family than its humanizing influences are so great, that every man should study and strive to make the most of the limited space which he has at his disposal.

Here are a few of the reasons why horses are whipped: For stumbling, owing to careless and reckless driving; for slipping down on their heads; for shoes; for shy; when frightened; for any vigorous effort to relieve of torturing flies; for the breaking down of the vehicle; and for the blowing of the wind blows off the driver's hat.

A correspondent takes ground against high managers for horses, for the reason, as he says, that they are a source of thorax and windpipe, and create a tendency to heaves. His practice is to feed from a manger on a level with the feet, and not over 20 inches from them.

This enables the horse to eat according to nature, and not after the manner of the giraffe.

How to Take Care of Milk. Laura B. Boyce writes to the Farm Journal: "We had a set of Jersey cows put in on trial the 10th of June, and they are such an improvement on the old method the milk is so rich and so abundant as to make it almost impossible to take care of them."

On Weaning Lambs. Many farmers are in the habit of letting the lambs go down with their milk teats, but it is better policy, for it causes the ewe to become poor, and the lambs to be born down with their milk teats.

A Nevada Stage Robbery.

Four Brigands Make Postponed Passenger's Trip Open the Gate.

Our readers will remember, says a Nevada paper, the telegraphic accounts, three or four weeks ago, of the halting of a stage in Nevada by brigands, who robbed Wells, Fargo & Co's stage of a large sum of money.

A citizen of Davis, E. R. Bollen, Chief Engineer of the Davisport and St. Paul Railroad, was a passenger on the stage. He left Davis on the afternoon of the 12th, with three or four passengers, destination Downieville, Sierra County.

At Davisport, the Chief Engineer was met by a man named Colfax at 4 P. M., with thirteen other passengers, destination Downieville, Sierra County. They descended 1,000 feet, and then repeated the ascent, and just as the coach reached the last summit four men

descended from behind rocks, seized the leaders by the bit, and bade the driver "get down from here." It was some time before the driver could get down, but at last they were made to dismount.

The brigands could understand the interruption, but at last they were made to dismount. The brigands could understand the interruption, but at last they were made to dismount.

The brigands could understand the interruption, but at last they were made to dismount. The brigands could understand the interruption, but at last they were made to dismount.

That Troussers Leg.

It is a little singular how fashions come and go, says the Danbury News.

Many of them at the time appear in a paper of the genre, and they disappear and others come in their place, and we forget all about them.

We were looking over a fashion of the fashion of some years ago more popular than any other, which was in such general use and seemed so fitted to its purpose.

The trousers leg of the fashion was displayed in a shop window. It was considered as a freak, any way, but was rather a necessary adjunct of society.

It was a pair of trousers, the fashion of which was displayed in a shop window. It was considered as a freak, any way, but was rather a necessary adjunct of society.

Powder in His Pocket.

The Bevo River Reveille has the following account of a case.

A man named Henry, a native of Oregon County, lately employed by the Wells, Fargo & Co. Company, of Bath County, Ky., came near losing his life at Bath Furnace when he was found with a quantity of powder in his pocket.

Henry had a long time professed to possess the power to charm snakes, and had frequently exhibited to the people at the furnace specimens of the more harmless varieties, which he handled familiarly, and appeared in some degree to control.

On one occasion he appeared with a large rattlesnake from the mines with him, and the removal of its fangs. But the climax was reached when he came in from the mines with a large rattlesnake in his hands.

As the sequel proved, his fangs had not been removed nor its venomous powers and hateful disposition properly understood.

A crowd of workmen, mechanics, managers, clerks, and book-keepers, soon gathered about him, and he was surrounded by a circle of the foolish man.

The viper writhed and twisted in his grasp, and by his hateful looks alarmed the crowd. He was then seized by a young man, who was standing near by, and he started for the door of the mine.

This young man is coloring a blasting powder the other day; it might come handy to split an obstinate log he had at home.

When he started for his home, he was followed by a crowd of workmen, mechanics, managers, clerks, and book-keepers, soon gathered about him.

As the sequel proved, his fangs had not been removed nor its venomous powers and hateful disposition properly understood.

A crowd of workmen, mechanics, managers, clerks, and book-keepers, soon gathered about him, and he was surrounded by a circle of the foolish man.

Death of Mr. Sothern's Victim.

Actor Sothern's car difficulty in California, says the San Francisco Chronicle, has unfortunately ended fatally.

James Lawson is dead. Sad as the whole affair is, no one can be surprised at the result. He was suddenly and severely struck, while quietly expostulating with Lawson, a man over six feet two inches high, and most double his weight.

Even then, according to the coroner's evidence, although bleeding profusely from the mouth and nose, he kept on going, but refused to leave his car as ever in his determination to have his private car to himself.

A second time he refused to leave his car as ever in his determination to have his private car to himself. A second time he refused to leave his car as ever in his determination to have his private car to himself.
