

THE CENTRE REPORTER
FRED. KURTZ Editor
Centre Hall, Pa., Jan. 7, 1875.

TERMS—\$2 per year, in advance, 25¢
postage included in price.
Advertisements 2¢ per line for three
months, and for 6 and 12 months by spe-
cial contract.

The bill for entertaining King Kalakaua, at Washington, foots up \$30,000, and the house committee on appropriations has agreed to report it in favor of passing. When Capt. Cook visited the Sandwich Islands, the Cambods killed and ate him; wonder that king calicoe wasn't afraid the Washington cannibals would do the same thing with him.

If the democrats of the senate and house, at Harrisburg, should find it necessary to have a compromise candidate for United States Senator, the choice could fall upon none better and more generally satisfactory than Judge Orvis. We think, however, that Mr. Wallace's chances are as good as to settle the matter in his favor.

A man down in Georgia committed suicide one day, week before last, by shooting himself. He first made a will, giving minute direction about his burial, the disposal of his effects, etc. In his bequests he left the pistol with which he shot himself, to Robert Toombs, with the request that he make the same use of it as he did, and rid the world of his presence. This was about the coldest suicide we have yet read of, and we suppose Bob Toombs will be slow to claim that pistol.

The state legislature assembled at Harrisburg, Tuesday, 5th. As we go to press, we have little intelligence of the first days sittings, presume, however, that the House organized by electing Mr. Patterson, democrat, of Alleghany, as speaker, and Mr. McGowen of Philadelphia, as chief-leader, as these gentlemen seemed to have the strongest support. The election of U. S. Senator will take place on 19th.

If any one in Centre county should inform the chief of police, of New York, that he had shot a bungler, who died half an hour thereafter, and that he had made a statement connecting himself with the Kite abolition and that his name was Persimmons, the said chief of police would telegraph back something like this, "All right, we know Persimmons was one of them, and have been searching for him all along, and would have nabbed him some inside of a week, had you not headed us off by shooting him."

The honest men are not all dead yet, and there is still hope for the country; they have one left in Baltimore, in Ex-Governor Bradford, who declines the appointment of appraiser of merchandise at Baltimore, on the ground that he has no knowledge of the practical details of the office, and that the duties should be discharged by one who has. Now if all office-holders and office-seekers were as Sandif in confessing what a government we would have.

Grant knows how to smoke a cigar and run a navy, and can push along the latter double as fast as under a democratic administration. His naval expeditions during the last five years are greater than the same expenditures have been in ten years under a democratic rule, as the following little table shows:

	THE DECEMBER	THE JANUARY
Total... \$21,781,229.87 (\$1800)....	\$7,400,724.99	
1871... 19,431,057.21 (\$1800)....	\$8,880,381.88	
1872... 21,240,909.99 (\$1820)....	\$8,918,424.10	
1873... 23,528,100.00 (\$1820)....	\$10,700,068.32	
1874... 20,085,87.42 (\$1840)....	\$10,700,068.32	
Total... \$116,619,912.87 (\$1850)....	\$34,372,244.43	
1875... 14,053,294.34		
1876... 14,693,957.00		
Total... \$116,559,206.89		

Tens \$560,061.11 more were paid by Grant's administration to keep up a worthless navy for five years than the Democrats paid to keep up a good navy ten years.

Gov. Hartman, says the Patriot, has published his proclamation announcing the redemption of \$1,230,186.57 of the public debt of the state of Pennsylvania. This falls a little short of the promise of peaceful revolution, and in two years that work will be accomplished.

Grant knows how to smoke a cigar and run a navy, and can push along the latter double as fast as under a democratic administration. His naval expeditions during the last five years are greater than the same expenditures have been in ten years under a democratic rule, as the following little table shows:

The recent elections have given unmistakable indications that the people of the Union are resolved to restore republican government to the Southern States by peaceful revolution, and in two years that work will be accomplished.

Resistance to the national authority represented here by a large portion of the army and a naval fleet, sustaining a majority in that body. Will Congress and Grant dare sustain further usurpation in this down-trodden state? Gov. McEnery sent the following to the N. Y. Herald:

NEW YORK, Dec. 25, '74.—The wrong just perpetrated by the returning Board against the people of Louisiana, and the threats of threatening the integrity of republican institutions in the United States, is a mere crowning infamy than the action of the Lynch Returning Board, or the party reverting to the Government, which is to guarantee interest at five percent required to ead a vote at all stockholders' meetings equal to the total share represented. The company is to mortgage its property, now valued at \$30,000,000, to the Government with all that it may have after requiring, and to pay all interest as it matures, and also the principal by means of a sinking fund, a deficit of which works a fore-gone of the mortgage, the property reverting to the Government, which is to guarantee interest at five percent required to ead a vote at all stockholders' meetings equal to the total share represented.

The Company is to mortgage its property, now valued at \$30,000,000, to the Government with all that it may have after requiring, and to pay all interest as it matures, and also the principal by means of a sinking fund, a deficit of which works a fore-gone of the mortgage, the property reverting to the Government, which is to guarantee interest at five percent required to ead a vote at all stockholders' meetings equal to the total share represented.

The Company is to mortgage its property, now valued at \$30,000,000, to the Government with all that it may have after requiring, and to pay all interest as it matures, and also the principal by means of a sinking fund, a deficit of which works a fore-gone of the mortgage, the property reverting to the Government, which is to guarantee interest at five percent required to ead a vote at all stockholders' meetings equal to the total share represented.
