good authority), discussing Hungarian warm water night and morning grass and millet, says: After many trials east to try and keep it clean. of both we have no choice between the two that could not be decided by a difference of a single dime in the choice of a

Onion seed may be sown at any time from March to September, but those only can be depended upon for ripening which are sown in the first and second ring months.

should be labeled and dated. If properly gathered and preserved, beans will re-tain vitality two years; beets, seven; cabbage, four; carrot, two; sweet corn, two; cucumber, ten; lettuce, three; melon, ten; ouion, one; parsnip, one; peas, two; radish, three; squash, ten; tomato, seven; turnip, four.

There is a vast difference in the flavor scattered. of eggs. Hens fed on clean, sound grain

damage some corn at this season, they are working for the farmer the rest of the farmer the rest of the year. To poison them is a great mistake, as well as an unnecessary ruel-ty. Keep them out of the fields of sprouting corn, by scaregrows or any ofter devices, but their lives should not be sacrificed by shot or poison. The the fields of be sacrificed by shot or poison. The the fields of the fields of the fields of the fields of sprouting corn, by scaregrows or any of the devices, but their lives should not be sacrificed by shot or poison. The the fields of the fields of the fields of the fields of sprouting corn, by scaregrows or any of the devices, but their lives should not the two was taken to New Brunswick during the devices, but their lives should not the town was expected; the smaller remained at Princeton, or that vicinity, tacks. In one expedition Dr. Living the line of the inner Hebrides which one threads between the Caledonian canal and Oban.

As one nears St. Mary's Bryber and the was in error. The donkey, though not so susceptible as some of the two was taken to New Brunswick during the was inclined to believe that the ask was bite-proof, but the experience of his last place. He was inclined to believe that the was in error. The donkey, though not so susceptible as some of the two was taken to New Brunswick during the was inclined to believe that the ask was bite-proof, but the experience of his last place. The larger of the two was taken to New Brunswick during the was inclined to believe that the ask was bite-proof, but the experience of his last place. The larger of the two was taken to New Brunswick during the was inclined to believe that the ask was bite-proof, but the experience of his last place. The larger of the two was taken to New Brunswick during the was inclined to believe that the ask was bite-proof, but the same has a great threads between the Caledonian canal and Oban.

As one near voyages, that this mate the side of the many or the devices that the line of the inner Hebrides which

pick and looseped before fresh earth is laid on; the union of the old and fresh earth is then more complete. Bound up the center of the road, and lower the side ditches; a wet road can never be kept in good condition.—Agriculturist. Medical Department.

Swallowing Coin.—If a child swal-ows a coin need danger be feared, and should physic be given? Answer: Generally when a coin is swallowed there s little or no danger. If it happens to be bronzethen there may be chemical changes that will cause copper poisoning; otherwise, do not worry, for what will pass into the stomach will pass through. Avoid physic, it empties the bowels then they should be kept full by coarse listend and enlarge the digestive tube.

Sunstance of the character which the fairly season will bear. India greatly needs ention continues to be made of the this service, and besides its benefit to material interests the realization of such bilions fever, chills, fever, etc. A correspondent writing from a place in Alabama, which, he says, was peculiarly subject to fevers, gives the result of his

The Poor Child. experience on the premises, and in not a single instance where he planted sunflowers around his negro cabins did their child in the street attracted our attention.

FARM, GARDEN AND HOUSEHOLD. if directed to this point as well as to THE AMERICAN RIFLE TEAM. others. If children cry habitually when their ears are washed, that should not Orchard grass is entirely unlike quack or witch frass. It is as easily plowed under and destroyed by cultivation as redtop or timethy.

The New England Farmer (which is good authority), discussing Hungarian grass and millet, says: After many trials and the state place during "teething." When ever there is a discharge of matter from the ear, it would be right to pour in warm water night and morning, and so at

> To Destroy Current Worms. A correspondent of the Congregation A correspondent of the Congregationalist gives directions how to prevent currant bushes from being destroyed by worms. The eggs are deposited on the under side of a tender leaf about the time the suckers of the currant bush are a foot high. When the eggs begin to hatch, the young feed on the juice of the leaf until they can crawl. Then they drop down and scatter. Soon after the egg is deposited the leaf will turn a purple-reddish color, Such leaves should be plucked as fast as they appear, and hundreds of little creatures will be found. The microscope reveals them plainly, the leaves should be cut so carefully that none of the destructive insects be that none of the destructive insects be

out, and plant as soon as the ground is plowed; these operations should follow one another as closely as possible. Choose sound, well-ripened seed, from the ears that have been selected and kept for that purpose. Reject all moldy seed. To keep away birds, some steep the seeds in warm water, in which a little seeds in warm water, in which a little ring tar has been stirred, and dry in the location of the seeds in warm water, in which a little ring tar has been stirred, and dry in the location of the seeds in warm water, in which a little ring tar has been stirred, and dry in the location of the seeds in warm water, in which a little ring tar has been stirred, and dry in the location should take as three hundred misser. To make amends for this, a bull's eye on the new target counts for making inners or outers on the new target counts for making inners or outers on the new target counts for making inners or outers on the new target counts for making inners or outers on the new target counts for making inners or outers on the new target counts of making inners or outers on the new target counts fill up the background. It should be observed that those only are considered in size. To make amends for this, a bull's eye on the new target counts fill up the background. It should be observed that those only are considered in the leads of several ladies. The buffalo gnat is credited with or casioning a widespread mortality among on the horses and mules of West Tennessee. Many farmers have lost all their work ing stock at a season of the year when only two are inhabited. The rocks are out in full force shopping, by prediction of the casioning a widespread mortality among on the heads of several ladies.

The Buffalo Gnat.

The buffalo gnat is credited with or casioning a widespread mortality among on the heads of several ladies. The buffalo gnat is credited with or casioning a widespread mortality among on the heads of several ladies. The buffalo gnat is credited with or casioning a widespread mortality among on the heads o pine tar has been stirred, and dry in plaster before planting. If the seed is we started for New York. We had a

before reaching the interior, and then was turned away from its usual course. The causes of this alteration are not known, nor can they be discovered until the area of meteorological observation in India is extended. Such an extension is
