How He Learned to Farm, That well known New York farmer. George Geddes, gives the New York Tribune some facts relative to how he rned to farm. It will be noticed that the North Atlantic," as Professor Verrill he had the advantage of large wealth: This letter, and the helplessness of the owner, brings to my mind the memits owner, brings to my mind the memwithout one or more individuals of the ory of days forty-five years ago, when I left a law office, having spent nearly all possession of the most complete specimen years ago, when I possession of the most complete specimen yet obtained, which Professor Vermen yet obtained, which Professor Vermen yet obtained, which Professor Vermen yet obtained which Professor Vermen yet obtained which Professor Vermen yet of the professor vermen yet of the professor vermen yet obtained which professor vermen yet obtained which professor vermen yet of the professor vermen yet obtained which professor vermen yet of the professor vermen yet

The common earthworm, though apt to be despised, is really a useful creature in its way. Mr. Knapp describes it as the natural manurer of the soil, consuming on the surface the softer parts of decayed vegetable matters, and conveying downward to the more woody fibers, which there molder and fertilize. They perforate the earth in all directions, thus rendering it permeable by air and water—both indispensable to vegetable life. According to Mr. Darwin's mode thus rendering it permeable by air and water—both indispensable to vegetable life. According to Mr. Darwin's mode of expression, they give a kind of undertillage to the land, performing the same below ground that the spade does for the gerden, and the plow for arable soil. It in consequence, chiefly of the natural ve been overspread with lime, burnt marl, or cinders, become in process of time covered by a finely divided soil fitted for the support of vegetation. This result, though usually attributed by farearthworms, as may be seen in innumerable casts of which the initial soil consists. These are obviously produced by the digestive proceedings of the worm, which take into their intestinal canal a large quantity of the soil in which they feed and burrow, and then reject it it in row, and then reject it it in the English cabbies, after all. Not long the so-called casts. "In this the English cabbies, after all. Not long the so-called casts."

There is a touch of gallantry about her, for sine were a support of the so-called casts. "In this the English cabbies, after all. Not long go over and above fast.

Well, about six bells in the arternoon windward,

weeds down. These tangled, luxurism tops-turvy wines, while they may produce abundantly, never produces go got and have some water in handy of the cabbies assembled outside the claim to give her an ovation when she came out. They had resolved to produce abundantly, never produces good to make the plants about four feet long, with some of the limits on didn't with the long to the cabbies were gould good stake can be made by cutting small bushes down, leaving them about the weekless. The water long to the cabbies were good to make the will be much earlier and fine the new will be will be much earlier and fine the new long that the long of and the fruit will be much earlier and fine then will be much earlier and fine the cabbies were good to make the will be much earlier and the provided by means that fine the health of our boats cleared away, so as to supply her at one, or, if they want to be took of, we can transfer 'me without delay.' Well, we washed the mass to busy to spend a list lide and Landersack fatally injured.

Tyrol, and Banat, with some loss of life and No. 2 Spring..... Tyrol, and Banat, with some loss of life and great destruction of property. Many bridges flax of Brabant costs, before it is yet made up into lace, \$1,200 per pound, and the process of manufacture more than doubles the value. Old lace is more variable in price, and some of it can be counterfeited by imitations. Of some varieties, however, the secret is lost, as of Point d'Argentan, which continued to be made on the banks of the Orne till the French revolution stopped the demand for a time, and gave the peasants

SUMMARY OF NEWS.

Items of Interest from Home and Abroad The British admiral in command in the Pacific has sent aid to the officers of the sunken United States steamer Saranac....The potato my days in schools, to manage nearly all my days in schools, to manage nearly all nowever, was sufficient to show that the my days in schools, to manage nearly all nowever, was sufficient to show that the my hands. I had been born and raised on a farm (just where I now live) and had spent my vacations and the summers of my sixteenth and nineteenth years at home, and had formed some ideas of farming as practiced in those days. I had held a plow some, and had formed some ideas of farming as practiced in that proportions reports had not been exagger, and the prospects and an unusual crop last year, has plenty of the single and unusual crop last year, has plenty of the single and the prospects and an unusual crop last year, has plenty of the single and the prospects and an unusual crop last year, has plenty of the single and the prospects and an unusual crop last year, has plenty of the officer twice. City Marshal Chas. Book for the uncoming crop are excellent. The loss on wheat in store on the officer two lived together in the utmost peace and tranquility. Some time ago a man calling himself is a land prospector, made his appearance in Keech's neighborhood, and held a plow some, and assisted in those days. I had been born and raised of the officer two lived together in the utmost peace and tranquility. Some time ago a man calling himself is a land prospector, made his appearance of the firm of the utmost peace and tranquility. Some time ago a man calling himself is a land prospector, made his appearance in Keech's neighborhood, and remained several days. He finally left, and premained several days. He finally left, and neither Keech nor his neighbors and the county of the practical to this town. This may have the firm of the officer two lived together in the utmost peace and tranquility. Some time ago a man calling himself is a land prospector, made his appearance in Keech's neighborhood, and remained several days.

The loss is said to fall largely upon the string of the officer with an unusual crop last year, has

o S30,000 at a time, and large sums are also expended for lace at Honiton, England. The following particulars in related the following particulars in related to the f her delicate fingers are better guides place among the merchants. The neighboring Sheep.

A Popular Book. Reports from agents thus far received by the publishers of the new book enti-tled "The Present Conflict of Science with the Christian Religion," show an average sale of five copies per day for each agent. This indicates a much larger sale than was attained by the author's former work, of which the extraordinary sale of 50,000 copies was made in a very short time. Dr. Morris already has a high reputation as an author, and his

Mr. Keech's neighbors immensately assembled and organized two pursuing parties, one under the command of Mr. Virgil Dupont, and the other under the command of the sheriff of St. John's county. They followed the murderer nearly fifty miles, sparing neither whip for spur, and finally came up with him or spur, and finally came up with him has been made, invests the crime with mysterious interest. His name is J. Smith Newton, and he says he was born in Buenos Ayres, of English parents. His mays that his purpose was not robery, but the hope of ultimate gain. He states that the woman known as Mrs. Ellen Keech was not the wife of Mr. Keech was not the wife of Mr. Keech was not the wife of Mr. Keech but his mistress, and that the real Mrs. Keech is a resident of Fond dund Lac, Wisconsin. Keech deserted his real wife, took up with the murdered woman, and field to Fforida. The prisoner was he was employed by Mrs.
