THE CONTENTS OF A RESERVOIR SUDDENLY LET LOOSE IN A NARROW VALLEY.

Worcester, March 30.—It was hoped today that the danger from the reservoir in the valley would be averted, but the water was seen bubbling through the dam back of the reservoir, and the water was not only not larger than a man's finger. It was at once thought that the water was not larger than a man's finger.

HOW TO GET THE CENTENNIAL EXHIBITION.

The managers of the Centennial Exposition have advised that the price of admission to the show shall be 50 cents, and that half-price, or 25 cents, will be given to those who will not secure your admission, any more than will a \$1 note admit two or a \$2 note four.

One of the first objections urged against the plan has been that the price of 50 cents is too high, but this is to be obviated by the fact that there will be thirty-one branches of the Centennial National Bank, one at each entrance, where your loose change will be converted into fifty-cent notes.

Persons entering will be obliged to go in single file, the adults, through one gate, children another. As each one enters, their entrance is registered by a turnstile which will be used to receive the tickets.

This singular mode of paying for admission has created considerable comment, and the plan has been tried in other countries, at world's fairs, and is said to have succeeded admirably. There will be no trouble about fifty-cent notes, as there will be plenty of them. The admission paid at the gate will entitle a person to visit all the buildings without additional cost.
