THE REPORT OF THE PROPERTY OF

A Balky Cow Surrenders to Steam.

SUMMARY OF NEWS.

CENTRIES BATTE.

A Resulte India's Growthe Neary of the Colorate Control of the Section As in the the Section Associated Association As efficacy has been tested in many thousand cases making paper wheels for railway carriages.

This, nevertheless, is being done at Sheffield at this moment, and we have seen a sample of the work. The paper wheels have steel tires, made with an inside flange and cust iron boss. On each side of the boss and tire steel plates 3.16 side of the boss and tire steel plates 3.16 side of the boss and tire steel plates 3.16 side of the boss and the space beside of the sace between the sace of the catarable side of the boss and the space beside of the sace between the sace between the sace of the catarable side of the boss and tire steel plates 3.16 side of the boss and the space beside of the sace between the sace between the sace of the catarable side of the boss and tire steel plates 3.16 side of the boss and the space beside of the sace between the sace between the sace of the catarable side of the boss and tire steel plates 3.16 side of the boss and the space beside of the sace of the catarable side of the same of the catarable side of the sace of the sace of the catarable side of the

side of the boss and tire steel plates 3.16 inch thick are bolted, and the space between the plates is filled with compressed apper. The paper is composed of what are known as "strawboards," and these are made to adhere to each other by means of rye paste. The combined layers of paper are next subjected to hydraulic pressure to the extent of 2,000 and while experimenting with and among the natives, he accidentally made the discovery that consfort the space of four or five hours, and then dried in a heated air bath.

The final thickness of the prepared paper is about three and a half inches, and, as may be imagined, the quantity of strawboard packed into this concentrated space by the giant force of the hydraulic ram is something enormous. Still a certain amount of clasticity remains to the substance, and this—in

\$500 YEARLY PROFIT FROM 12 HENS.

The Important Question.

Of all loathsome diseases catarrh stands prominent. It renders its victim as disgusting to himself as to others. And the most humilating of all is the consciousness that his presence is offensive to those around him. If any disease deserves the name of universal, it is this. Dietetic errors and the follies which fashion imposes upon us tend to foster and discovered by Assignment of the following shifts.
