It was not the wind, for the breeze had strangely lulled. The trees scarrely moved, yet the water rolled up against the reservoir banks as if agitated by an unseen wheel. We all seemed conscious of the disturbance of the atmospheric conditions, and the leaves whispered strange confidences to the motionless boughs above our heads.

The men had all gone up to the reservoirs.

McCausland and I sat chatting together.

"I do not mind that," I replied. So it was settled. Fortunate it was that I did remain. As we were preparing to visit the sluices again we were startled by a vivid flash of lightning, which had hardly passed when the rocks rang out with a thou-sand thunder echoes.

This was the signal. The windows of heaven opened, and a perfect deluge descended upon the devoted valley. The little brooks leaped up and danced down the hill sides in white array. They waterfalls swelled themselves into cataracts, and foamed down to the streams. The wind rose from its sleep and forced great rolling waves across the coping of the reservoirs, and stones and grass became commingled.

Now the sluice valves were all opened, and the long imprisoned water gladly disshed from out its prison to meet its native riser once again. The channel of the Holmesdale, once more filled with water, divided on the hill. But I turned in and got some sleep in defiance of the elemental war without.

At five o'clock in the morning, as the gray light was struggling into life, McCausland came, fully dressed, underny room. I started up.

"Dress yourself as alleck as you can and come down stairs," to said. I began to ask questions. "Loseing time, there's a good fellow; I want your assistance." He left the room.

I jumped up at once, hurried to the window and looked out. Day was just breaking through the misty sky, and all the world was raining. The water was plashing from the caves, and mingled with the heavy drops, burst into a separate stream in every rut and furrow. The wind bast the tall trees and roared amid the branches. Ever and anon a sharp snap denoted a bough torn from its place and whirled to the soaking earth.

I dressed quickly and joined McCausland in the little parlor. He was studying a private copy of the railroad time tables, which as an official he always carried.

"Will you take the horse and ride down to Ammering junction with a message?"
His collected manner assured me. Was this all? A rile through the rain was not much. "Of course, I will go."

He grasped my hiand firmly. "Are you nervous?" he said, as he held it in his own steady grasp.

"Nonsense," I replied, laughing: "Il be ready in five minutes if it's inportant. Is the horse here?"

I ran up for my waterproofs. When I came down the horse was at the door and McCausland and mispecting him.

I mounted. "Now," I said, "for this great message, if you please."
