

The Centre Reporter.

FRED. KURTZ, EDITOR.

ENTER HALL, Pa., April 25, 1878.

The Pittsburgh Telegraph an independent republican paper pays our Senator the following compliment:

Senator Peale, of the Thirty-fourth district is a candidate for re-election. As the Democratic majority in the right wing of the party will, of course, be returned—Senator Peale has shown such genuine earnestness in ferreting out the secrets of the "tax-grabs" that honest citizens, regardless of party, will rejoice at his continuance in a seat which he has not dishonored.

The democrats of the House of Representatives at Washington, turned off doorkeeper Polk, because he was guilty of dishonest practices. That's the way to do—the only way the party can make itself strong is to throw its black sheep overboard, and refuse to have them in its party.

Thus the democrats did with Tweed in New York. The party did itself great credit by having him and his ring brought to justice. Democracy means honesty, and it means to carry it out.

A despatch from Pottsville announces threatened trouble in the quietest country of Schuylkill. The despatch says, April 17, that the scarcity of work since last February in western portions of the Schuylkill mining region is causing much distress amongst the working people there. Dispatches from Donaldson and Tremont state that a large meeting of miners and laborers was held in the woods this afternoon at which they demanded bread or work.

The Belletfonte Republican favors the re-election of Col. Andrew Gregg by its party as county commissioner. As we can not get over having a mixed board, we think the Republican pays the Col. one deserved compliment—he has made an efficient commissioner.

The workings of the Moffett Punch is thus spoken of by the Lexington (Va.) Gazette:

The Moffett register has been in operation in Lexington for nearly four months. The amount of tax for that time is \$940.

This is a monthly average of \$235, or an average of \$26 for each register, the whole number of registers being nine.

The cost of the liquor thus sold and taxed amounts to \$59,797 a year. This is about four per cent, on all the taxable property, real and personal, of the whole county. It is more than double the whole county levy (exclusive of railroad tax) for roads, schools, and carrying of the county Government. It is about thirty per cent. on the taxable property of the Lexington district.

Now, here is scope enough for readjustment. If we can stop this drain upon our wealth, all other burdens will be as a drop in the bucket. If the people of the whole State of Virginia drink whiskey as we do, the Moffett register will bring into the Treasury \$1,500,000; if the money paid for the whiskey were applied to the debt, we would wipe it out—consols, coupons, peeler, and all—in three years.

Senator Bussey has been censured by the Democracy of York county for giving a casting vote in favor of the Bank Commission bill. For all of which the York Democracy deserve thanks.

The radical organs are sneering at the democratic house at Washington because it is attempting to inaugurate an era of economy. Let 'em snar, the party can stand radical snarls, and we know the country can stand democratic economy. The house two years ago saved 40 millions by cutting down extravagance appropriations, and had not the republican senate stood in the way, the saving would have been 60 millions. Expenses must come down. The people are too much oppressed to stand extravagance any longer. We must begin to economize in salaries, government expenses, &c., &c., as well as in our own private affairs. Economy is the watch-word of democracy.

Judge Bradley of the Supreme Court of the United States, who became conspicuous by reason of his prominent connection with the Electoral Commission, is getting into trouble. Certain charges against him are under investigation, and it is now known that his conduct has been developed to justify his impeachment. It is notorious that he was appointed an Associate Justice of the Supreme Court in place of an understanding that he would vote to reverse a former decision of that tribunal on the legal tender question, and it would not be surprising therefore if it should be found that he was corrupt in other matters. The induction says, the Philadelphia Record, appears to be unfavorable to his judicial virtue.

It is gratifying to us, as it must be to Senator Peale himself and his constituents, to know that he is receiving praise from the leading journals in different sections of the state, of all parties, for being a senator true to the interests of the people.

The taxpayers of the country through the blundering of Treasurer Muser in the last two years, lose the benefit of some \$30,000 in taxes on unclaimed lands; now we wish to ask the Treasurer how he can saddle the expense of his unlawful advertising, which the court set aside, upon the county to the amount of \$300? What do the people say?

It is said that "Grow's friends anticipate such a contest between Hoyt and Wickersham in the republican state convention that Galusha may come in as a compromise." But it is to be noted that Hoyt and Wickersham will not have enough strength in the convention to make a respectable fight. Hoyt's real competitor is Billy Armstrong, who will go to the republican convention backed by the nomination of the National party. Don't forget it.

Now see here, that won't do! If there is to be any such thing as a compromise candidate, let it be understood that General Beale is held in reserve for that—*the* radical wire-workers understand that distinctly from this on, so no other word "Grow's" over it.

Chicago last week scored 34 bank ruptcies.

Mrs. Tilden has confessed. It is Hayes' turn next.

Another Mollie has been found guilty of murder.

We opine Tilton is about the first man that was happy to have his spouse confess she was guilty of adultery.

Severe floods in Cuba cause much suffering.

The senate passed the repeal of the bankrupt act only 6 senators voting no.

The railway interest of the United States represents between five and six thousand millions, which is controlled by only a few men.

HOW IT AFFECTS TAXPAYERS.

Treasurer Muser in his spiteful work of advertising this unclaimed lands contrary to law will deprive the county for a time of the benefit of the taxes on these lands amounting to some \$18,000. This is nice business, and all arising from stupid official cussedness and inefficiency and littleness. As the treasurer goes into this unwarranted proceeding knowingly, we think the tax payers of the county should not tolerate the outrage, but use every lawful means to make him do his duty according to law. What say you tax payers, will you allow yourself to be trifled with in a matter of some \$18,000? This is only a repetition of Mr. Muser's blunder of two years ago, when by a similar unlawful proceeding the tax-payers lost the benefit of some \$12,000, because he persisted in advertising contrary to law. If tax-payers are willing to put up with such malfeasance then they should not grumble when taxes are oppressive on account of a stupid treasurer's blunders.

The democrats of the House of Representatives at Washington, turned off doorkeeper Polk, because he was guilty of dishonest practices. That's the way to do—the only way the party can make itself strong is to throw its black sheep overboard, and refuse to have them in its party.

Thus the democrats did with Tweed in New York. The party did itself great credit by having him and his ring brought to justice. Democracy means honesty, and it means to carry it out.
