

A MAN FROM ALASKA.

Mr. John Morton's Account of His Eight Years' Residence on a Polar Island.

A Journal reporter interviewed Mr. John M. Morton, who has recently returned to the city after a lengthy absence in Alaska, where he has been occupied in his official duties under the United States government.

Mr. Morton has spent eight years in the Territory of Alaska, and he has had better opportunities of becoming acquainted with that almost unknown region than most men who have sought to learn its resources and future possibilities. He has been officially connected with the islands of St. Paul and St. George—two of the Aleutian group—and his duties, in connection with these islands, were to act in behalf of the government in enforcing the terms of the lease under which these islands are held for twenty years by the Alaska Commercial Company. In regard to these islands, the inhabitants and their principal occupation.

The population of the island of St. Paul is about 240 natives, and that of St. George 100. There are not more than 1,000 people upon the entire group, and those who live upon the two islands named are unquestionably much better off and in a higher condition of civilization than the natives of the rest. There has been a marked improvement in their condition during the last seven years. When the contract of the United States government came into existence, these people lived in mud tents, partly dug out, and so low that they were obliged to crawl in and out of the entrance. Their dwellings had no ventilation whatever. Under the conditions of the lease the company is compelled to do certain things for the natives, and the natives, in turn, have been required to do certain things for the company. All the men are employed in the seal fisheries, which require less than two months of the year. They drive the seal in shore, kill and skin them, and salt and otherwise prepare the skins for shipment.

For this purpose, they rarely last more than six weeks, each man receiving \$400 as \$600, and all the rest of the year they are idle. The company also furnishes the people with fuel, salt fish for winter, and sufficient salt in barrels with which they can preserve the fish of the seal for winter consumption, this being their principal article of diet. All the money the people have to spend is in the purchase of goods and other things as they may desire to get from the company's store.

They need a great deal for dress, as they can obtain only a few articles of clothing, but as a matter of fact most of them buy their clothes, and dress quite stylishly for the place. It is not the people themselves, however, who would save money or waste it on finery and trinkets. The company's store keeps a good assortment, and the natives are of opportunity to spend money there if they are inclined. But many of them are getting quite rich. Some of them I know have as much as \$200, and some as much as \$500, and there are no class of laborers getting more money with less work than these natives engaged in the seal fisheries.

The company has a school, eight months in the year, and has built each family a comfortable frame house, thus bettering their condition in every respect. Last year a church was erected at a cost of \$10,000, for which the people contributed out of their own pockets. They paid of the whole amount. They are devout members of the Greek church, and attend to their religious duties with great regularity.

One stipulation of the lease is that not more than 100,000 seals shall be killed in any year, and as the lease extends over twenty years, and the company expects to renew it at the end of that term, it is as much to their interest as it is to the government, that the seal fisheries should be properly managed. Last year the full number of seals has been killed, but in 1876 and 1877 only 75,000 seals were caught each year, the reason being that the sealers had become somewhat reduced. This year both the demand and the price improved. There is no danger of killing the seal to such an extent as to endanger the stock, as the sealers have adopted, as there is taken to catch only the young males from two to four years of age. They never kill a female seal, and yet an old male seal will produce several million seals around these two islands—more than all other parts of the world combined—the reproduction is more than enough to perpetuate the stock.

Company pays to the government yearly about \$300, and this amount may be said to represent about all that Alaska contributes to the United States. The rest of the country, which is of vast extent, covering nearly half the continent, is practically unproductive, but at the same time, pine and yellow cedar timber upon the mainland will become valuable as the demand for that extensive natural resource will be developed; their existence in some localities is already known. The temperature on the islands is not so high as that of extreme cold as in other parts of Alaska. Last winter was the coldest I have known, and the thermometer never more than 22 degrees below zero. Strong winds and frequent storms prevail, however, ten months out of the year, and this makes the islands much colder than would otherwise be the case. The two months of summer, June and July, are usually wet, but this is the only time in the year when there are no wind storms. There is but little moving about in the long winter, and the half dozen white people on the islands are engaged in their usual occupations as they can follow to occupy their time. —*Indianapolis Journal.*

Eggs. As foot-eggs are exceedingly nutritious, they are easy of digestion, and when the shell is broken, they may be said to contain in themselves all that is required for the construction of the body. It has been found that the eggs that they may be served in about 600 ways, although it is generally found that the more simply they are prepared the more they are approved.

For instance, turtles' eggs are in general considered that the eggs of the common tortoise of the plain are the richest and sweetest flavor. An ordinary hen's egg is less than one and a half to two and a half times as nutritious as the egg of a turtle. In fact, it is hard for a man to digest them. It is hard for a man to digest them. It is hard for a man to digest them.

There is nothing anything you wish to say, but the sentence is passed upon you. The prisoner looked wistfully toward a discolored state, the fatty matter of the egg is accumulated in the yolk, which contains relatively a smaller proportion of nitrogenous matter, and a larger proportion of fat. It is said that raw eggs are more easily digested than cooked ones. A hard-boiled egg is a decided resistance to gastric solution.

An Honest Boy's Reward. John McNulty, a thirteen-year-old lad, came to the attention of the Boston Board of Police, containing \$300, there being two \$100 greenbacks and a treasury note for \$100. He said he had found the money in the street. He left the station to wait the owner's claim. The owner appeared the next afternoon in the city of Boston, who identified the package and its contents. Learning that the boy was not his father, and that Mrs. McNulty (who has five other children besides the one that found the money), is sick and a widow, Mr. Waterhouse resolved to reward the boy's honesty with a substantial token of approbation. He accordingly issued the chief of police \$100, with a request that he place in some bank for the lad's benefit. The chief deposited the generous gift in the Savings Bank in the boy's name, to be paid to him when he should come of age.

FOR THE FAIR SEX.

Notes for and about Women.

The married women of Japan blacken their teeth to add to their attractiveness. The woman-suffrage question was first presented to the Massachusetts legislature in 1833, by Mrs. Abby B. Alcott.

Miss Martha Atalanta Lampkin, for whom the capital of Georgia was named, has been visiting the city. Its name was first Martinville and then Atlanta, and now Atlanta.

Worth, the famous Paris dressmaker, an Englishman by birth, gives to each woman employed by him a new dress every year, upon which he expends his grandest fancy and taste.

The costly display of bridal presents at some of the most magnificent weddings in New York, embraces many articles hired from the jeweler or the purveyor. Can vanity and fashion go further?

The municipal council of Paris have decided that part of the local commissioners to inspect factories shall be women. This is because half the children who work in such places are girls.

Florence Nightingale is sick unto death. Heres are mostly remembered for the blood they have shed. This cruel battle will be remembered for the human suffering she has alleviated.

Mrs. Graham, an old lady near Arba, Wyne county, Ind., had a child, a daughter, while in the barn yard, and before she recovered the horse had torn off an ear, very badly mutilated her shoulder, and she was obliged to wear a corset.

Mrs. E. R. Graham, editor and publisher of the *Church Union*, is constantly addressed as "Dear Brother Graham" by her correspondents, who are under the impression that she is a minister.

A woman in Ohio has just got \$5,000 from a man who was counting her for \$25,000. The man was a bachelor, and he had been married for a year, strikes the bachelor mind as rather a heavy punishment.

A Cleveland (Ohio) lady, Mrs. Cornelia E. Beaumont, has invented and patented an arrangement to keep small boats from capsizing and sinking. A woman who wears a corset, and who has water-mark around the outside of the boots. These tubes are filled with compressed air.

Fashion Notes. Mitts are of medium size. Sleeves are tighter than ever. Repp'd fabrics are in high vogue. Black dresses are the fashion. Only light furs are used for evening wear.

Watered silk—moire—is very fashionable. Gold brocade and ribbons are much worn. Medium-sized bonnets are not fashionable. Balayouses are seen on very short costumes.

All dresses of woolen materials are engaged in the seal fisheries. The company has a school, eight months in the year, and has built each family a comfortable frame house, thus bettering their condition in every respect.

Visite palette is the name of the newest set wrap. Toppies made of seal will be much worn. The seal is the most valuable of skins. Stockings are in more bizarre styles than ever before.

Sashes at the elbow and at the top are seen on many Parisian dress sleeves. All winter wraps and cloaks are very long, but very short jackets are also worn.

Striped gowns in pink silk and satin or silk and moire are very fashionable. The clan tartan and Scotch plaid costumes are the fancy of the passing moment.

Satin, velvet, moire, and gros grain are favorite combinations in composite costumes. Striped Pekins and striped moires are in demand for dresses of composite costumes.

Dresses, to be fashionable, must be very long in front, even when trained several million seals around these two islands—more than all other parts of the world combined—the reproduction is more than enough to perpetuate the stock.

Leather boots for country costumes, or "suits for the moorlands," are among the latest dress novelties. The talons is a new mantle which is simply a revival of an old style, with the only difference of a tight back.

The newest buttons are bullet-shaped. They are of colored pearl, jet, brass, and silver. The Japanese designs appear on the surface of silver and gold buttons or in ebony, gold, and silver buttons for short costumes.

Silk or spun silk stockings to match costumes are to be worn with black kid shoes, with a strap across the instep and a buckle on the heel. The large h-of-cape hats, which are to be worn in New York this winter, have the brim rolled up on the left and trimmed with plumes, some bending forward and some sweeping around the crown.

Burlington Hawk-Eyebrows. "You're an awful thing," said the boy to the dog. "You're too big to be a dog." "You're too small to be a boy," said the dog to the boy.

Some weeks ago the telegraph "fatally wounded" Sitting Bull, but the old man hasn't heard anything about it himself. "Chained in the market place he stood," says a heart-worn old Irishman.

Did you ever notice the innocent but very practical case and celerity with which the cat, when it is in the mood of coming down the street, places itself on the more inaccessible side of the tree box?

"What is the use of the world's so hard on rats because they desert a sinking ship. Does it never occur to you to think how awfully the sinking ship is on the water, and the rats if they would only stand by it?"

"What is the use of the world's so hard on rats because they desert a sinking ship. Does it never occur to you to think how awfully the sinking ship is on the water, and the rats if they would only stand by it?"

"What is the use of the world's so hard on rats because they desert a sinking ship. Does it never occur to you to think how awfully the sinking ship is on the water, and the rats if they would only stand by it?"

A Bear Story.

Notes for and about Women.

The wide stall is a luxury, and ought to be on every ten feet wide, if it is to be a stall for horses of great value; in such stalls they can get perfect repose by changing their position, recover from the fatigue of a long day's driving, and be ready for their task the next day.

The food best adapted to the horse is a mixture of the best quality, occasionally varied with a bran mash, or turnips or carrots as an alternative. The growth and development of bone and muscle depend upon the quality of the food, and it is important to select such as contains all the elements needed to form the bone and muscle of the horse.
