Golden Moments. Oh! there are golden moments in men's lives en, unlooked-for as the little clouds All gold, which suddenly illume the gates

Oh, pray for them! They bring No increase like the gains of sun and showers; Only a moment's brightness to the earth, Only a moment's gleam in common life -Yet who would change them for the wealth

Name the seaves on all the trees Name the waves on all the seas, All the flowers by rill that blow All the myriad tints that glow, Winds that wander through the grove-And you name the name of love: Love there is in summer sky

The Pall Mail Gasche relates the following ack clams, the latter, when bound in waters used for steam driving, often containing pearls which find a ready sace at a high price. A few of these are quite large, and should be worth considerable... Moref of (N. B.) Times.

Remarkable Trees.

Referring to big trees, the American Rejeter tells us that a grove of trees in Cattornia, consisting of 1,880, contains not one which measures less than six feet in diameter. A rare and magnificent white oak is to be seen in the Quaker burying-reround in Salem, N.Y. It is more than 200 years old, and is remarkable for its enormous branches, which have a spread of 119 feet. A remarkable chestnut tree is growing on a farm in Berks Pa. It is nearly forty to the circumference at the base, and the top of the tree can be reached by steps fastened between the limbs. Most remarkable of trees with a history is a makes a play room for children has been built for h if a century. The tree is seven feet from the ground to the branches a play room for children has been built for hi if a century. The tree is seven feet from the ground to the branches, five in number, all of which are very large and average thirty feet in length, covering a space of ground sixty-three feet in diameter. It is more than four and a half feet in diameter, and has yielded an average of thirty bushels of appies each year. A sprout from this apple tree stands thirty-two feet from the parent stem, but is forty, and has yielded an average of thirty bushels of appies each year. A sprout from this apple tree stands thirty-two feet from the parent stem, but is forty, and has yielded an average of thirty bushels of appies each year. A sprout from the length, covering a space of ground sixty-three feet in diameter, and has yielded an average of thirty in the proposition of the constitution of Merada, fought a decided to the firm, except in cases of special partnership.

To shine with hope, while hope's afar, And sing of love, when love's unheard, - The Spectator

Before the Day-Break. Before the day-break shines a star That in the day's great glory tades;

That her pale-gleaming la np upbraids

Before the day-break sings a bird

Too loud for her is the day's a ir,

The woodland's thousand-tengr Ah! great the honor is to shine And rich the prize to rank divine Among the world's loud choristers

But I would be that paler star,

And I would be that loneller bin
