kerosene is good-both together are an honr. A mixture of the two, half and calf, is better than either separate, and I have a cow that got choked ment-pressing upward with the thumb got a piece of inch and a quarter rope hot meats. nd soaked it thoroughly in warm water, then in cold water to stiffen it, wound | Take a bias piece of unbleached mus cloths at one end and used that to push the turnip down. The trouble was soon the time of time of the mess. I prefer to effect dislodgment of the offending substance by pressure ap-plied externally. This is done by grasping the gullet just below the ob-struction and squeezing it upward. In most cases quick relief may be obtained by this method, and it has the merit of To whiten and soften the hands take

Soiling.

A correspondent of the Iooa Homehave five acres, about two and threehave a strip fourteen rods long and four rods wide that consists of timothy and dish. clover, which I cut twice and someimes three times a season. As soon as it will do to cut I feed it regularly to wide which I plant with sweet corn for to a two-horse planter, which makes the stalks about two inches apart in the row. I plant at three different times, so as to have it early and late. About the lat of July I commence to thin out, leaving a July I commence to the commence t I get over the piece, that which is left is nearly all eared out. Then I commence cutting it up clean. When I get it half cut up I plow the ground and sow with winter rye. I sow the balance as soon as the corn is off. This makes good pasture late in the fall and early acres, and have done so for three years past. I manure the ground high, and that is what makes good crops.

The search the early hatched patterns and early winter a search patterns and early winter and the search patterns and early winter and the search patterns and early winter and the search patterns and early winter and early winter and the search patterns and early winter and ear look well to the roosts and keep them in a cleanly condition. As the warm weather approaches a certain portion of the vermin leave the body and congression of the vermin leave the body and congression in the result of the measure of wisdom and ability of the grand old fellows of days gone by. It is an amiable fault, but still a fault; because the truth is not so. gate in concealed nooks and crevices of the roosts during the day time, and come forth to prey on the fowls at night. These roost lice are quite prevalent in neglected houses. It not thoroughly Happy is he who can command his destroyed, they prey on the fowls to a great extent, reducing strength and vitality, and in course of time remain on the body altogether. Remove them as soon as discovered, and give the fowls clean rooses. Exercise care concern. His conduct while under its influence renders him unamiable, and, of not become infested with vermin. I have seen young fowls drop the feathers to a certain extent in early winter from being troubled with body lice. The tail feathers came out and the whole plumage presented a ragged, dead look.

Workingmen's Libraries.

Workingmen's libraries are attracting some attention in England. At five manufacturing establishments libraries are maintained, the shelves containing from 690 to 5,500 volumes, and the ex by weekly subscriptions of half penny to one penny per week by the working-men. The first of these institutions was established in 1847, and for ten years it was without an imitator. The 1,500 books belonging to a Birming-ham manufactory have grown into high There are three classes of men—the favor, the issue in 1880 having been A failure establishes only this, that datasages in this system—the workman sees its workings, and can receive the books which he requires as he

thinking that leaves work for the day. Relf-Defense.

To a criminal neglect of preventive medication may be ascribed a majority of the allments which affect humanity. It is a well-ascertained fact, resting on the experience of over twenty-five years, that a course of Hostetter's Stomach Bitters will be a second or stomach bitters will be a second or stomach bitters will be a second or second Many men claim to be firm in their principles, when really they are only obstinate in their prejudices.

There never were in the world two opinions alike, no more than two hairs or two crains. The most universal or two crains. The most universal in such five years, that a course of Hostetter's Stomach Bitters will put even a naturally feelle system in such a state of defense that it will be competent to resist the most prevalent causes of disease, such as the malign influence of missans, unwholesome water, excessive heat, damp, cold, sudden changes of temperature, etc. Yet there are thousands of persons living in prevalent peril from one or more of these or two grains. The most universal quality is diversity.

Talent is the capacity of doing anything that depends on application and industry, and it is a voluntary power, while genius is involuntary.

In perpetual peril from one or more of these causes, who recklossly omit to avail themetalves of the absolute protection which this famous vegetable antidote affords. Intermittent and bilious remittent fevers, rheumstism, while genius is involuntary.

vival of the fittest. Doubtless this is so. So in the future there will be a The Norfolk Virginian, of January 16, 1881, refers to the remarkable cure effected by St. Jacobs Oil in the case of who have these traits death hath no permanent power .- H. W. Warren.

"They are not a beverage, but a medicine with curative properties of the highest degree, containing no poisonous drugs. They do not tear down an already debilitated system, but Five car-loads of dromedaries were recently shipped from Texas to Arizona, to be used in transporting United States
