The Potato in Its Native Country. An English gentleman who long re-sided in Chili obtained from different persons the following facts in relation

I got some valuable information from intelligent work and born and bred in the south, some of whom had wrought in the potato fields when young, and are now employed on the railway. One of them, Jose Maria Lorca, is from the island of Chiloe (south latitude forty-three). He thinks there are no good potatoes dut of his own country, and I believe there is some reason for his opinion. For, unlike the rest of Chili, the potato is there the staple article of food, consequently more attention is paid to the selecting of good varieties and to the best modes of cooking. He said: "Here in the North the people don't know what potatoes are not so good as in my country. There you have something worth eating—po-More in the first warm as more first that the strain property of the

chased silver.

A single wide ruche at the edge of the skirt is a favorite triuming for a finitials, and a commission of ten per cent. is charged. About 500 quarters of beef are here sold daily. There, too, are the long rows of slaughtered swine glistening in the gaslight like an array of ghos's, while on either side carcasses of mutton stud the stalls. These are fresh from the slaughter-houses, and will be gone before next day at 12 o'clock. Five hundred muttons are an average daily business. Here, too, are long rows of swine has lets, which bring ten cents each, and long the per constant of the skirt is a favorite triuming for the skirt is a favorite triumine. "Halt! he exclaimed, drawing tone of the sk

The Trial of Guiteau.

On the eighth day of the trial Mr. Scoville continued but did not finish his opening address for the defense. Mr. Scoville confined his speech mainly to showing that Guiteau was insane, and that insanity was hereditary in the famity. He gave an account of the Guiteau famity and stated that several of its members had died in insane asylums. The father of the assassin, he said, was weak-minded, but the prisoner himself had long been of unsound mind. He gave a sketch of the prisoner's life and of his percent peculiarities. Some of the statements made offended Guiteau's vanity, and he promptly pronounced them false. Others of he statements he approved warmly. Mr. Scotile revealed the fact that the prisoner had scently attempted to carry on a love correattempted to carry on a love corre-

amount of \$300,000. Report of the Director of the Mint,
Mr. Burchard, director of the United States
mint, eays in his annual report that the gold
and silver received and operated upon by all
the mints and assay offices, exceeding by more
than \$50,000,000 the received of any previous
year, amounted to \$226,225,522.46, of which
\$193,371,101.91 was gold and \$23,854,421.45
silver. This large increase was due to a continued influx of gold from abroad, over \$50,000,
000 deposited being from that source alone.
The gold coinage amounted to \$78,733,864, a dithe silver coinage to \$27,649,966. The base
metal and minor coins amounted to \$405,
109,95. In addition to the coinage the mints
and assay offices manufactured fine, standard,
sterling and imported bars to the amount of
\$100,750,649,94 in gold and \$6,642,232,35 in
silver.

The director estimates the production of the Report of the Director of the Mint,

silver.

The director estimates the production of the United States during the year to have been \$36,500,000 in gold and \$42,100,000 in silver, the saming value. United States during the year to have been \$36,500,000 in gold and \$42,120,000 in silver, the silver being estimated at its coining value. From the reports of manufacturers it is estimated that at least \$11,000,000 in gold and \$6,000,000 in silver were consumed in the making of jewelry and other articles. The specie circulation in the United States at the end of the fiscal year is estimated at \$440,000,000 in gold and \$171,500,000 in silver. On November 1 the amount of specie and bullion in the mints and assay offices, available for and awaiting coinage, was \$563,000,000 in gold and \$185,000,000 in silver. In view of the failure of the Paris conference, the director says it is a question for serious and carly consideration whether it is not desirable to suspend the further coinage of silver until, by international agreement, the unlimited coinage of silver and gold at a fixed ratio has been authorized by the principal commercial nations of Europe and America. The United States, he says, could not, single handed, sustain the value of silver should the silver coin now in circulation in Europe be demonetized. The world's production of gold for the calendar year 1880 is estimated at \$107,000,000, and of silver at \$75,500,000. H. R. STEVENS, Esq.:
