urban bee keeper, who, with an eye to business, established an extensive apiary right alongside of a sugar refinery,

Tallow Growing on Trees. Mr. O. N. Denny, United States counsel-general at Shanghai, has sent to a friend in California, for distribu tion throughout the State, a package o seeds of the "tallow tree," which he thinks will flourish there, with the following interesting description of the process by which its fruit is prepared for use: The nuts grow in clusters and are gathered in November. When ripe the capsule divides and disclose usually about three kernels, covered paring the tallow the ripe nuts are put into a wooden cylinder with perforated bottom, and after ten or fifteen minutes steaming the tallow becomes so soft that it is easily detached from the albumen of the seed by breaking them with mallets. It is then separated from the seeds by sifting it through hot sieves, but, of course, it is discolored by mivitures with the brown tasts of the absolutely ugly," said she. "But still, in territory outside of their jurisdiction, and they afterward abandoned that allow becomes so soft and they afterward abandoned that it is easily detached from the policy. Still, most of the cloves now allows putit away this time o' year when there ain't no tea parties given."

"Into Maine? In midwinter?" there ain't no tea parties given."
