HORRIBLE CRIME IN THE MOUNTAINS OF KENTUCKY.

Cincinnati, March 8.—The Equippah, a Canadian engineer, Mr. Okill, has devised a plan of approaching the North Pole by a series of sledges, to be pulled by a team of reindeer, which is 1,000 miles from the pole. The distance is 1,000 miles. This distance I would overcome permanently by building a system of relay stations twenty miles apart, and connected by a through telegraph line to Winnipeg. The sledges would be carried out by the government and would eventually pay, by the time they reached the pole, the cost of the expedition.
