

The Centre Reporter.

CELEBRITY HALL, Pa., June 15, 1882

Moore, once carpet-bag governor of South Carolina, has pleaded guilty to petit larceny in New York and was sentenced to the penitentiary for six months. Oh, Moses!

The journey horsehoofers of Chicago have gone on a peaceable strike to the number of 350, the bosses having refused the use of machine-made horse-shoes.

A subscriber down in Lancaster county wants the *Reporter* to tell him how Gen. Beaver is getting on. He will, to be brief, Gen. Beaver is Don Cameron's man for governor and now find out what sort of a fellow Don is and you have all you need.

At Harrisburg, on Monday last week, nineteen mutual assurance insurance companies were dissolved, leaving forty-four still in operation in the State. The latter associations have engaged counsel to represent them at a hearing to be fixed by the Court. Some of them will make a determined effort to establish their claim to continued existence.

Democratic county nominations, of good sound, consistent men—men of good integrity—are just as essential this year, as a state ticket of the same character. Don't forget this for the people will vote for them.

Two years ago the rats set up a great howl over congressmen elected from the south by these ballots—a carpet bag investment—and it was made an excuse to put out democratic members. The other day, Low, rat of Alabama, was put in and Wheeler, dem. put out. In this case the ticket elected Low, the rat. Tissue ballots are all right when voted to help the radicals.

The iron interests are in a pinch which threatens widespread distress, and this in the face of promises not to frost that Hancock's election would produce the great iron interests and produce just what it seems the election of the republic ticket must have brought about. The *Pittsburg Post* speaking in this regard says, during the last Presidential campaign a number of our iron manufacturers counteracted to assure their employees and the public that if Hancock was elected the mills would close for want of business, the iron trade would be ruined and of course the working men would be without employment and reduced to beggary. Hancock was not elected, mills have closed for want of orders, the tariff has not been reduced nor disturbed, one hundred thousand men are without work who have been engaged in this industry with no immediate prospect of the mills resuming or the trade reviving. It is not honest nor decent in manufacturers to make such promises and then to break them.

The Huntington county Independents have captured the county organization, and intend to go on and nominate a ticket within the party organization, and if the stalwarts do not like it they have the privilege of becoming kickers.

There is little old wheat in the market. The crop prospects in the west and south are improved and will be early. New York and Pennsylvania crops are late but promising.

A decidedly novel application of electricity is reported in the French papers. The shop of a victualler at Carosse was recently struck by lightning. Among the contents was a tin of wine, so sour as to be absolutely undrinkable even by Frenchmen. When, in the course of repairing damage, the cause was examined the shattered cask, the remaining contents were found to be very palatable. The scientific friend, and now it is reported that by sending a weak current of electricity through the wine, the sourness will not only be restored to soundness but will be meliorated into a body and flavor such as has been heretofore supposed to be impossible to confer. That ordinary Malaga raisin water could be chloroformed into fine old Madeira has long been believed in some parts of the country, and it is a matter of dubiety that an aspiring new settler at Newport, Rhode Island, was kindly assisted by an accomplished friend to fill his cellars with precious old brands produced in the *grande vin de France*. The wine of the carter can be matched by exposing a lot of "little blue wine" to a sharp thunder storm, the point will soon be reached where the wine is as good as new. The wine which turns up in a recent number of a London society journal, "new rich," to its critical guest: "There, my boy, there's a glass of claret you don't often see—I bought it in the same count. I left it of, cost me £20 for the entire stock. The guest sniffed and tasted. "I don't know," he said, "What an enormous stock of it you must have, old chap!"

Guileau spends most of his time reading his Bible and a religious work which was given him by Mr. Griffith, of Baltimore. When he does not take his usual amount of exercise he says that it is because he feels lazy. So far from giving up mentally, his mind is bright and he is able to argue his case with considerable legal sharpness. In a conversation with a friend he said that he had been wrong in his recent moves in the case; that there is nothing that can be done about it, it has been ruled upon the judgment of the court. "Guileau says," if it is a matter of law, the question of jurisdiction has been settled, and there is nothing left of that question. "The only hope is in the grace court," he said. "I have told you, and I have told him to go to him and let all other things go." Mr. Reed was in the jail on 5th to secure Guileau's signature to several affidavits which he proposed to use in his former proceeding in Guileau's behalf. He declines to say anything with reference to the nature of these proceedings.

Chairman Lear of the late convention which nominated Beaver, has come out in rebellion to Cameron. He may kick up a row when that body re-assembles to nominate a congressman-at-large.

Guileau now places his last hope on the President and has permitted a minister to see him.

It is reported John Kelly will retire from politics which means democratic unity and success in New York.

At Cleveland the law troubles are threatening a riot; at Pittsburg there is no hope in the situation and the men are still idle.

The desire of the people is on the increase for Trunkley, for governor.

Lear, chairman of Cameron's convention, says he would vote for Trunkley.

The house has agreed to the senate amendments fixing the retirement age for army officers at 64 years.

Dyspepsia, the bug-bear of epicureans, will be relieved by Brown's Iron Biscuits.

LEARN TO COOPER.

Ex-Attorney General George Lear, permanent Chairman of the Regular Republican Convention of Harrisburg is in the south kind of a study of Cameron. He has written Chairman Cooper, of the State Committee, a long letter in reference to Cooper's call for the reassembling of the Convention, June 21, to nominate a candidate for Congress—namely, in the place of Thomas M. Marshall, declined. Gen. Lear says he will not attend the convention, that Cooper had no right to the signature and nomination of the State Committee, that the Convention is a defunct body, and a new one must be called, composed of delegates elected in the manner prescribed by the peace conference at the Continental Hotel and approved by the Harrisburg Convention. Lear severely criticizes the methods of Senator Cameron, and says the salvation of the party depends upon the reassembling of the Convention. Independent State Committees will agree to call a Convention in September, composed of delegates elected in the manner prescribed, for the purpose of naming a ticket to be supported by all Republicans.

SEVEN GIRLS AND THEIR DIAMONDS.

Seven young ladies were perceived in a horse car, of whom not one had a single diamond on her hand. They were all dressed in the latest fashion, and their right hands were all in the lap above the other. All of the seven bare hands had diamond rings on them, and whenever any attention was directed to the hands, the girls would turn their heads and look at the diamonds. The girls were all dressed in the latest fashion, and their right hands were all in the lap above the other. All of the seven bare hands had diamond rings on them, and whenever any attention was directed to the hands, the girls would turn their heads and look at the diamonds.

THE NEW SILK INDUSTRY.

The greatest incentive to engage in silk culture is the knowledge that the silk market for \$10,000,000 worth of goods, which American manufacturers are obliged to import from foreign countries, is now in the hands of the silk culture industry. The silk culture industry is now in the hands of the silk culture industry. The silk culture industry is now in the hands of the silk culture industry.

THE REFUGEEES IN TURKEY.

A Constantinople correspondent sends the following interesting news: A party of providing an asylum for the Jewish fugitives, who have fled from their persecutions and persecutions. Mr. Lawrence Opland and Mr. James Alexander have been named as the party.

THE BAD AND WORTHLESS.

This is especially true of a family medicine, and it is positive proof of the remedy indicated is of the highest value.

LOCUSTS IN ANGORA.

Last year the village of Angora, in Asia Minor, had a locust plague which had led to a repetition of the calamity which had led to a repetition of the calamity which had led to a repetition of the calamity.

BOY LYCHBED.

Phenas, Miss., June 9.—John Tribbett, the boy who murdered Washington and Frederick a few days since, was yesterday arrested and taken to the State Prison. He is now in the State Prison.

THE NATION.

Since its consolidation with the *New York Evening Post*, has increased its facilities for every department, enlarged its size to twenty-four pages, and added many able writers to its previous list. It is now pronounced by many of its readers to be better than ever before.

CENTRE HALL CARRIAGE SHOPS.

Manufacture and constantly keep on hand CARRIAGES, BUGGIES, SPRING WAGONS, SLEIGHS, and all kind of vehicles.

DISCIPLINE FOR ST. LOUIS WIVES.

In the complaint accompanying the suit for divorce which a St. Louis lady had begun to file, she stated that she had been married to her husband for five years, and that she had been married to her husband for five years, and that she had been married to her husband for five years.

CAUTION.

Be careful of the quality of the goods you buy. The quality of the goods you buy is of the highest importance.

THE GREAT BURLINGTON ROUTE.

ESTABLISHED 1852. SPECIAL NOTICES. THE GREAT BURLINGTON ROUTE. ESTABLISHED 1852.

ERRORS OF YOUTH.

A child who is not properly educated in the early years of his life will be a source of trouble and sorrow to his parents and to himself.

CHICAGO.

Chicago is a city of great beauty and interest. It is a city of great beauty and interest. It is a city of great beauty and interest.

MISDEEDS IN MISSOURI.

Miss Moulton Rob a Bank at Brookfield in Daylight. Kansas City, Mo., June 8.—Particulars received of an attack on the bank of Brookfield yesterday by six armed and mounted men, who rode into the town of Brookfield just as the bank was closing for the day, dismounted, and covering the clerks with their revolvers, demanded the safe of about \$5,000. They kept up a rapid fusillade with their firearms as they rode through the place. The men were all masked.

THE REPUBLICAN EX-GOVERNOR OF SOUTH CAROLINA.

Caroline gets Six Months on Charge of Swindling. Franklin J. Moses, the Republican ex-Governor of South Carolina, has been confined in the Tombs for the past three months awaiting trial for the charges against him for obtaining money under false pretenses, yesterday arranged for his release by the Court. General Sessions, on last February 17, Moses called on Dr. Nathan Bosman at his residence, 206 Fifth Avenue, and presented to him a check for \$10,000, which he said was a check on the bank of South Carolina, and that he was a son of the late Governor of South Carolina, and brother of Roland Steiner, both of whom are reputable and well-known gentlemen in Georgia. Dr. Bosman, believing the check bill here and his railway fare to Chicago, gave him a check on the Second National Bank of New York for \$10,000, and Dr. Bosman learned through Mrs. Roland Steiner that there was no such person as Dr. J. Steiner in Augusta and no relative of that name in the family. From that time Moses has been in the Tombs. Moses was arrested and identified as the man who called on him under the name of Dr. Steiner, and who had obtained from him a check for \$10,000. Moses was arrested and identified as the man who called on him under the name of Dr. Steiner, and who had obtained from him a check for \$10,000.

COAL BY WIRE!

Sir Henry Bessemer has made a proposal to the London public which, if adopted, would be a great benefit to the world. He proposes to transmit coal by wire. He proposes to transmit coal by wire. He proposes to transmit coal by wire.

THE PARASITIC NATURE OF TUBERCULOUS DISEASE.

Professor Tyndall has communicated to the London Times an account of results obtained by Dr. Koch, of Berlin, in the investigation of the etiology of tubercular disease, as set forth by him in an address delivered, March 21, before the Physiological Society of Berlin. It was the aim of Dr. Koch to investigate the nature of the tubercle bacillus, which previous experiments on inoculation and inhalation had proven to be capable of transforming and reproducing tubercular consumption.

THE PARASITIC NATURE OF TUBERCULOUS DISEASE.

Professor Tyndall has communicated to the London Times an account of results obtained by Dr. Koch, of Berlin, in the investigation of the etiology of tubercular disease, as set forth by him in an address delivered, March 21, before the Physiological Society of Berlin. It was the aim of Dr. Koch to investigate the nature of the tubercle bacillus, which previous experiments on inoculation and inhalation had proven to be capable of transforming and reproducing tubercular consumption.
