he Commotion Caused by the Statement of sional circles and on the street. Apparently it caused more commotion in Rochester, as the following from the same paper shows:

Dr. J.B. Henion, who is well known not only in Rochester, but in nearly every part of America, sent an extended article to this paper, a few days since, which was duly published, detailing his remarkable experience and rescue from what seemed to be certain death. It would be impossible to enumerate the personal inquiries which have been made at our office as to the validity of the article, but they have been so numerous that further

they have been so numerous that further estigation of the subject was deemed an nvestigation of the subject was deemed an editorial necessity.

With this end in view a representative of his paper called on Dr. Henion, at his residence on St. Paul street, when the following nterview occurred: "That article of yours, loctor, has created quite a whirlwind. Are the statements about the terrible condition you were in, and the way you were rescued such as you can sustain?"

"Every one of them and many additional ones. Few people ever get so near the grave as I did and then return, and I am not surprised that the public think it marvelous. It was marvelous.

order, but I did not think it meant anything serious."

"But have these common ailments anything to do with the fearful Bright's disease which took so firm a hold on you?"

"Anything? Why, they are the sure indications of the first stages of that dreadful malady. The fact is few people know or realize what ails them, and I am sorry to say that too few physicians do either."

"That is a strange statement, doctor."

"But it is a true one. The medical profession have been treating symptoms instead of diseases for years, and it is high time it ceased. We doctors have been clipping off the twigs when we should strike at the root. The symptoms I have just mentioned or any unusual action or irritation of the water channels indicate the approach of Bright's disease even more than a cough announces the coming of consumption. We do not treat the cough, but try to help the lungs. We should not waste our time trying to relieve the headache, stomach, pains about the body or other symptoms, but go directly to the kidneys, the source of most of these ailments."

directly to the kidneys, the source of most of these aliments."

"This, then, is what you meant when you said that more than one-half the deaths which occur arise from Bright's disease, is it, doctor?"

"Precisely. Thousands of so-called diseases are torturing people to-day, when in reality it is Bright's disease in some one of its many forms. It is a hydra-headed monster, and the slightest symptoms should strike terror to every one who has them. I can look back and recall hundreds of deaths which physicians declared at the time were caused by paralysis, apoplexy, heart disease, pneumonia, malarial fever and other common complaints which I see now were caused by Bright's disease."

If you want to know more about it go and see Mr. Warner himself. He was sick the same as I, and is the healthiest man in Rochester to-day. He has made a study of this subject and can give you more facts than I can. Go, too, andree Dr. Lattimore, the chemist, at the University, If you want facts there are any quantity of them showing the alarming increase of Bright's disease, its simple and deceptive symptoms, and that there is but one way by which it can be escaped."

which it can be escaped.

Fully satisfied of the truth and force of the doctor's words, the reporter bade him good-day and called on Mr. Warner at his establishment on Exchange street. At first Mr. Warner was inclined to be reticent, but learning that the information desired was about the alarming increase of Bright's disease, his manner changed instantly and he spoke very earnestly:

"It is true that Bright's disease has increased wonderfully, and we find, by reliable statistics, that in the past ten years its growth has been 250 per cent. Look at the prominent men it has carried off: Everett, Sumner, Chase, Wilson, Carrenter, Bishop Haven and others. This is terrible, and shows a greater growth than that of any other known complaint. It should be plain to every one that something must be done to check this increase or there is no knowing where it may end."

"Do you think many people are afflicted with it to-day who do not realize it, Mr. Warner?"
