NOBLE VETOES.

For the first time, in this state, has thieving been vetoed. Governor Pattison, last week, cut off appropriated steals for clerks and employes about the Senate and House amounting to \$42,000, and private charities amounting to \$50,-000. These are the noblest vetoes ever sent in to a legislature in this state, for which Gov. Pattison will have-as he deserves-the lasting gratitude of every honest'man, Democrat and Republican. The veto of certain sections of the appropriation bill strikes thieving Republicans and Democrats.

At the meeting of the Legislature, last January, the REPORTER published a list of items which we pointed out as steals -many of these, we are gratified to say now, are choked off by the Governor's veto, which shows that the REPORTER was correct in pointing out the steals. Brave, Gov. Pattison.

In another column will be found the veto of the steals intended for the Senate and House clerks and employes. Read it-it needs no further comment.

The New Hampshire Republicans are still divided on the election of a U.S. Senator, with no prospects of harmony.

CUTTING OFF THE SOFT THINGS.

Neither the Resident Clerk of the House nor Delaney will be given their \$1,800 appropriation each "for clerical and other services which may devolve npon them" in 1884. The Governor says: "The fact that the Librarian is made the custodian and distributor of supplies for the Legislature and departments does not call for his expenditure of \$1,200 for the year 1884. Both he and the Resident Clerk are given fixed annual salaries for the years when the Assembly is not in session, and the law did not deem that they were entitled to or should receive any compensation for years when it was not in session.

"The item of \$1,800 for Librarian for the recess ending December 31, 1883, seems to have been put into the bill at some late stage by amendment, being inserted above that part of section nine which required the Librarian to place 75 copies of the Legislative Record at the public bindery, to be bound for the use of the Senate and certain officers. Eigh-

teen hundred dollars is a large sum to give the Librarian for placing in or carrying to the public bindery 75 books. SOME MYSTERIOUS POINTS.

"This bill appropriates altogether to the two chief clerks and the resident clerk and librarian \$9,600 for services and expenses in a year when there will be no regular session of the Legislature, and for the entire recess, from the adjournment of the Legislature this year until its reassembling in the year 1883, \$16,000. The various methods by which this sum is distributed throughout this unless he can get their full face value, in field. Profs. Wolf and Bitner have not bill under various designations, such as taken io the field yet. Rev. Eyrie, of 'expenses,' 'labors,' 'services, 'express Chester county, Pa, delivered a practi-charges,' etc., is very puzzling and mysterious "I am unable to comprehend how any such sum can be needed or can be properly used in a period when no session is being held. The practice, under various forms of words, of making these offices perpetual, at large compensation and great expense, has in the past grown into a regular system. I feel disposed to see if it cannot be safely abandoned. Any trifling necessary service they may have been accustomed to perform in the past few years, when there was no session can, I think, easily and at very little expense be performed in other ways by those within the line of whose duties such services would legitimately fall." OTHER ITEMS CUT OFF. The Governor vetoes the \$2,635.46 appropriated the Commissioners of Public grounds and Buildings for a deficiency in 1881 and the \$1,900 which the Legislature would give ex-Secretary of Internal Affairs Dunkel to reimburse him for the purchase of furniture and repairs in 1880. These items, the Governor says, should not be in "a bill to provide for the ordinary expeases of the govern-ment for 1883." He will not allow \$1,-000 in addition to the amount already granted by law for postage, express charges and other incidental expenses of the State Treasurer, Auditor General and Attorney General. He vetoes the \$2,000 for balance of salary due Dr. Diller Luther, secretary of the State Board of Charities, because the law requires such an appropriation to be made in a sepa-rate bill. He will not allow \$1,000 for has vetoed items amounting to \$42,130 supplies for the Senate and House from in the general appropriation bill. The managers of some of these public and charitable institutions have the unparalleled gall to send as twenty or thirty lines of local notices with request to repeat them day after day, and then call on us to purchase a ticket; othduring the recess. Librarian Delaney cannot have \$1,200, "or so much thereof as may be necessary," for "postage, la-bor, express charges, etc.," for 1884, when if his past enstom be continued. At a certain "professor's" artificial eg, arm, nose, and eyebrow factory recently a number of young women were working at small tables, each table covered with little instruments and things, the likes of which I had never seen before. At one table two girls were threading needles with fine, silky hair, and sewing them in little squares on a thin transparent gauze.

"These girls," said the professor, "are making some of those beautiful arched eyebrows you may sometimes see in ballrooms. These sewed on the net are the less expensive kind, and are only used on special occasions. The real brow is very expensive, and can only be made by a person of great skill." I begged him to explain the operation of

giving a person eyebrows who was born without them, and, leading me into an elegantly-furnished parlor, in which was a large dentist's chair, he continued:

"The patient sits here. In this cushion to.my left are stuck a score or so of those needles you saw being threaded. Each stitch only leaving two strands of hair, to facilitate the operation a num-ber of needles must be at hand. As each thread of hair is drawn through the skin over the eye it is cut so that

Fooling Immigrants.

Michael Gelbschnabel and Peter Faselhans are natives of Markstadt, Mecklen burg. Both are, moreover, fools. They made up their minds to emigrate to which port the German steamers start. They purchased their tickets and were just about to go on board when a shabby looking man offered to sell them some American greenbacks fifty per cent, cheaper than they could be purchased in this country. Gelbschnabel was rather wary about entering into the transaction, while Faselhans jumped at the stranger's offer. Finally Faselhans induced his friend to invest in the greenbacks

The following day the steamer start-ed, and the two friends felt happy over their good luck. Their glee, however, changed to sorrow when, upon arriving at New York, they discovered that they had exchanged their good German money for the advertising cards of a large London fancy goods store. At first they were speechless with astonish-ment, but soon Gelbschnabel opened his mouth to remind Faselhans that he had been the cause of his (Gelbschnebel) purchasing the bogus money. Faselhans repudiated the insinuation, and hence the trouble begun.

"You have no idea," commented one of the officials, "to what extent such advertising cards are passed for legitimate money. They are very poor imitations of the same, but are nevertheless unbesitatingly accepted by immi-grants. Owing to the frequency of such cases in this country a law has recently been passed prohibiting the imitation of United States currency in any form or shape whatever."

It is surprising that notwithstanding the frequent hints given by the public press that journalism is a matter of business make daily contributions of time, labor and space, to an amount which, if any other private citizen were asked to make, would cause him to inquire if the world judged him a millionaire. No merchant thinks of giving away his wares to every solicitor that calls upon him. Queen Vic and Her Gillie.

Somebody, whom the Cincinnati Times-Star characterizes as "an unusually interesting correspondenti" sends to that paper the following statements, which it prints under the head of "special letter by cable:" "There may be more than grief in the long protract-ed mourning of the royal widow. Still, when it takes the form of constant companionship with the gillie, John Brown, an account of some invisible likeness to the Prince Consort; undetected by any save her, it is difficult to believe that this form of homage can be agreeable to "my sainted Albert." Nor is it likely that in the abode of bliss he can derive any special comfort from seeing his royal relict cling in her daily walk to the ungraceful fashion of hooped skirt and tained in his life-time. The obstinacy of the Queen is proved by the open, persistent favoritism shown to this same John Brown. Incomprehensible and meaningless. It goads almost to madness her immediate entourage, and every open or tacit opposition only causes it to be more manifest that proudest of proud women has been made by a preconcrted plan to see this servant of hers in the most degrading state of drunkenness, almost at her very feet, and yet with an infatuation stronger even than femininity, her manner to him re-mains unchanged, and she gave no sign that could give a clue to her secret thoughts. Ladies in waiting of exalted rank have rebeiled openly against the breach of etiquette his familiarity has created, and refused to be made a party to it. A Discriminating Butler.

There are some find minds left here-One of these belongs to the butler of a friend of mine, whose faculty of discriminating was only equaled by his love of rule. My friend is an eminent surgeon, at the head of his branch of the profession, very wealthy and fond of entertaining his friends. His butler was of the old and faithful retainer variety and knew his work perfectly. When his master told him he was going to have company to dinner he coolly asked who the people were. Then he would recol-lect that Mr. X. liked codfish or Mr. Y. currry, and debate the menu by items. The only difficulty was about wine. The master has a magnificent cellar and likes to give everybody the best of every-thing, but the butler did not see things in that light. When his master had ordered certain wines from choice bins his zealons custodian would say: "Ard-ly, sir, I think, the '40 or '47 port to night. The company won't understand it, sir. Something fruitier would suit as quite as well." This would occur whenever no special connoisseurs of port wine were coming, and was well enough, but sometimes the butler went too far. One day the eminent surgeon was giving a dinner to his assistants and dressers at the hospital, and ordered a fine dinner with the best wine. The port was protested against. "For them young gents, sir?" was asked in an appealing tone. This point was yielded, under W. W. Belford, of Milton, in and the victor then objected to the the latest improvements in cutting, champagne:

"Perrier Jouet tres sac would be quite throwed away, sir. There is some of that lot you bought the other day would do just as well."

"But what the devil," roared the master, "am I to drink? I can't give my guests wine I won't drink myself." "Which you might pass it, for once." was the reply: champagne ain't good for you, sir, leastways every day." --This was trop de zele, and my surgeon friend parted with his chief butler, to my profound recret. for the news my profound regret, for the new man knows not Joseph and will allow all the best bins to be wasted on women and boys, instead of reserving them for viveurs accomplis.-London Cor.
