REMINISCENCES OF ROCHESTER.

The Falls of the Genesee and Sam Patch's Fatal Leap---One of its Business Houses and its great Magnitude.

The present floods, which are either devastating or threatening the country in every direction, are justly cause for apprehension. No matter whether they come suddenly or by slow degrees, they are, in either case, a great evil and much to be dreaded, and yet America will always be troubled by these spring overflows. Pro-bably one of the most disastrous that was ever known, occurred in Rochester, N. Y., about twenty years ago. The Genesee river, just above the falls, where Sam Patch made his final and fatal leap, became completely blockaded by ice, forming an impassable dam, and the water coming down the Genesee river overflowed the principal portion of the city of Rochester. This catastrophe would have been repeated the present year had not the energy and foresight of the city authorites prevented it. The writer happened to be in Rochester at that time and was greatly interested in the manner in which this great catastrophe was averted. Every few moments, a roar like the peals of thunder or the booming of cannon would be heard, and in order to see this ice blasting process, the writer went to the top of the new Warner building, which overlooks the Genosee river. From here he was not only enabled to see the process uninterruptedly, but also the magnificent building which has just been completed. This is unquestionably the finest building devoted to business and manufacturing purposes in America, being entirely fireproof, eight stories high, and containing over four and a quarter acres of flooring. Mr. Warner treated your correspondent very courteously, and in the course of the cenversation said:

"We are doing a tremendous business and are far behind in our orders. This is the season of the year when people, no matter how strong their constitution may be, feel, more or less, the pain and Indisposition, the headaches, colds, neuralgia, rheumatism, dull pains, sore throats, coughs -all the 1,001 ills that flesh is heir to come this time of the year, if at all. It is natural, therefore, that we should be very busy. This is specially true of our Safe Rheumatic Cure, and it is crowding us very sharply for a new remedy."

"Singular, but I had forgotten that you do not advertise to cure all diseases from one bottle, as is done generally by many other medicine men, but I supposed Warner's Safe Cure was for the cure of rheu-

"And so it has been until our remedy which was especially for rheumatism and neuralgia, was introduced. We have been three years perfecting this new remedy. Study first taught us there were certain powerful elements in Warner's Safe cure, better known as Warner's Safe Kidney and Liver Cure, that made wonderful cures in chronic and acute rheumatism, but during our investigation, we learned of a Safe cure, we have produced our Safe Rheumatic Cure, and the cures it is effecting are simply wonderful, and 1 do not doubt it will become as popular as our Safe Cure."

"You seem to talk freely in regard to your remedies and appear to have no secrets, Mr. Warner.'

"None whatever. The physician with his hundred calls and one hundred diseases, is necessarily compelled to guess at a great deal. We are enabled to follow up and perfect, while physicians can only experiment with their hundred patients and hundred diseases. With the ordinary physician, the code binds him down, so that give it to the other physicians, which, of photographed instantaneously. course, discourages investigation to a great extent. This is why the great discoveries in medical science of late years have been made by chemists and scientists and not by physicians, and it in a measure accounts for the great value of our remedies, also for the remarkable success of all those doctors who make a specialty of one or two diseases."

"And you find that you are curing as great a number of people as ever before?"
"Yes, a far greater number. We never sold so much of our medicine as now and never knew of so many remarkable cures.'

The writer departed after the above interview, but was greatly impressed, not only by the sincerity of Mr. Warner, but the vastness of all he saw. Mr. Warner's medicines are used throughout the entire length and breadth of the land, and we doubt not the results they are effecting are really as wonderful as they are related to be.

So small would be the money outlay, so inconsiderable the labor required, to insure for the next generation a wealth of timber land equal to that of which we have the benefit, and shade and shelter trees in even more adequate supply, that it is a great wonder to us, amid all the forcible facts brought forward against the rate at which forest destruction is going on, there has been no more general movement in favor of tree planting. In Germany and Austria for upward of half a century, the num-ber of trees planted hrs borne a good proportion to those annually cut down, and it is certain that this is the case now, year by year. In France, Italy and England, also, tree cultivation is now general, and is held to be a most important matter of public concern. But here, with the characteristic improvidence which has come to be considered a marked feature of American character, we are destroying our great virgin forests with a rapidity never before equaled in any other country, and without taking any measures to insure their future growth.

"Do you think it wrong to patronize the horse cars on Sundays, dea-con?" asked Mrs. Goode. "Decidedly!" replied the deacon; "decidedly wrong, Mrs. Goode; it's a desecration of the day, ma'am. I never take a horse car on Sunday, ma'am. I consider it wrong, decidedly wrong. I walk, ma'am, and receive my reward in an approving conscience, not to speak of the fact that I have saved five cents, ma'am,"

He who is not content with a little, will be content with nothing.

In the Austro-Hungarian Empire there are 241 irsn mines and only seventy-seven are actually at work giving employment to 4510 workmen. Throughout the Empire there are 175 blast furnaces for iron smelting; out of this hands employed was 8105.

It has been found by R. Kish and P. Miquel that the superficial layers of the soil are exceedingly rich in microscopic organisms, or bacilli, Miquel considers that these bacilli play an important part in the decomposition of or- affected my voice. I tried Dr. --- 's reganic matter and in the formation of assimilable plant food.

I have been a severe sufferer a long time with kidney troubles, causing severe pains in back and sides, and from the recom-mendation of the Chief of Fire Department, Mr. Ira Wood, formerly of Syracuse, who had used Hunt's Remedy with wonderful success, I commenced using it, and found speedy relief in a short time, and it has completely cured me of the pains in the back. I have recommended it to others in the department, that have used it with great success, and I do not hesitate to recommend it to any one troubled with kidney, liver or bladder troubles. H. KIRKLAND, Sup't Fire Alarm. Syracuse, N. Y., June 12, '83

I have been troubled a long time with kidney weakness, a great proportion of the time with severe pains in the back. Having heard Hunt's Remedy recommended very highly for troubles of the kidney and urinary organs by Ira Wood, ex-chief of the fire department of Syracuse, he having been cured of a severe case of kidney discussed. cured of a severe case of kidney disease lately by the use of Hunt's Remedy, 1 purchased a bottle and used it, and have not been troubled any since; and I know of many others here in Syracuse that have used it and recommend it as a great medium for the kidneys, and I do not hesitate to say that it is a remaakable medicine.

JACOB WOLFROM, Member of Syracuse Fire Department. Syracuse, N. Y., June 11, 1883.

"CHARLES, dear," said a charming little literary lady to her husband the other evening, "let me read you the opening chapter of my new novel." "Certainly, replied Charles. "I should listener. "Jest this: I was trying to be delighted." "Well, then sit still get in some old accounts on Lorain number only seventy-nine were in activity during 1831, the yield of iron being 479,639 tons, of which 337,843 was refined pig. Each furnace, on an average, was in blast for forty-three weeks during the year, and the number of know—" "Perhaps it was that delayed was 8105. icate, fashionable mauve ink?" "Now been lyin' in her grave ten years, and Charles, don't-" "Mebbe it was he himself had been dead one year! green ink, like Arnold's copying fluid?" Yes, sir; and I had handed the bill to "Why, you horrid creature, you! when lowa Times, writes that his little girl I speak of anything having an inky appearance, what impression does it like and asked if I had the brass to exhave on you?" "Same as a blotting pain-reliever, cured it completely, leaving no marks. By two applications of St. Jacob's Oil he cured himself of a torturing you are a brute!" and the little literary lady flounced out of the room, and Charles bawled back after her: "Como back, my love, I am sitting still."

From B. F. Liepsner, A. M., Red Bank, N. J. I have been troubled with Catarrh so badly for several years that it seriously medy without the slightest relief. One bottle of Ely's Cream Balm did the work. My voice is fully restored and my head feels better than for years.

The galvanic temperature coefficients of steel, rod-iron, and cast iron have been determined by V. Strouhal and C. Barus. For steel this coefficient diminishes as the hardness of tempering increases, while the specific resistance increases with the hardness. Glass-hard steel has about three times the specific resistance of soft steel.

A DEPUTY sheriff in East St. Louis fired a pistol at two fleeing thieves who were making off with a pair of stolen boots, and hit an old woman of seventy in the foot. He knew there was a pair of boots mixed up in the matter, and got as near to the facts as the police usually do.

An Undoubted Blessing.

About thirty years ago a prominent physician by the name of Dr. William Hall discovered, or produced after long experimental research, a remedy for diseases of the throat, chest and lungs, which was of such wonderful efficacy that it soon gained a wide reputation in this country. The name of the medicine is Dr. Wm. Hall's Balsam for the Lungs, and may be safely relied on as a speedy and positive cure for coughs, colds, sore throat, etc.

That reminds me of a familiar song, said the president of the punsters' club, pointing to a gilded owl which swung front of a taxidermist's shop. "How so?" inquired his private secretary. "Because it's 'Owl hang sign," my boy." The secretary was arrested on a charge of assault with intent to

LONG SUFFERING

From Stone in the Kidneys of one of Troy's Best Citizens-His Recovery through the use of Dr. David Kennedy's Pavorite Remedy (of Rondont, N. Y.)

It is by no means strange that Dr. David Kennedy should have received the following letter. By reading it you will see in one minute why James Andrews was thankful:

Dr. D. Ken DEAR SIR-Until within a recent date, I had for several years suffered greatly from Gravel, called by the doctors the Brick-dust Sediment. For about a year past this sediment has not passed off in the usual quantity, but has accumulated, causing me untold pain. Having heard of DR. DAVID KENNEDY'S pain. Having heard of DR. DAVID KENNEDY'S FAVORITE REMEDY, I tried it in my case, and after using about one and one-half bottles, I voided a stone from the bladder, of an oval shape, 7-16 of an inch long, and rough on its surface. I send you the largest piece that you may see of what it is composed. Since then I have felt no pain, I now consider myself cared, and cannot express my thankfulness and gratitude for so signal a deliverance from a terrible disease. You have my consent to use this letter, should you wish to cose, for the benefit of other sufferers.

Yours truly.

Yours truly,
James Andrews, No. 10 Marshal St., Ida Hill, Troy, N. Y. When we consider that the medicine which did this service for Mr. Andrews costs only one dollar a bottle. it would seem that persons afflicted in like fashion can afford the expense of testing its virtues. Get it of your drugglet, or address Dr. David Kennedy, Ron-

BAD, BAD, BAD BLOOD.

Some blood is bad because it is poor and weak. Some is bad because it contains impurities. Some men have such bad blood that the wonder is

it does not poison the mosquitoes who come to bite them.

The rich red color of good blood is owing to the iron which is present. Blood which has not enough iron in it is always unsatisfactory. The person in whose veins it circulates cannot be said to enjoy good health.

The efforts of expert chemists to produce a preparation of iron which can be assimilated with the blood have resulted in that perfect preparation which is an important part of Brown's Iron Bitters. It is the only one which freely enters into the blood. It is the only one which accomplishes the desired good.

Weak, poor, thin blood may be made rich and strong, and impure blood may be purified by the use of that Great Iron Medicine. Brown's Iron Bitters
