Mr. C. H. Draper, of No. 223 Main street, Worcester, Mass., volunteers the follow-

ing:
"Having occasion recently to use a remedy for kidney disease, I applied to my druggist Mr. D. B. Williams, of Lincoln Square, this city, and requested him to furnish me the best kidney medicine that he knew of, and he handed me a bettle of Hunt's Remedy, stating that it was considered the best because he had sold many bottles of it to his customers in Worcester, and they all speak of it in the highest terms, and pronounce it always relia-I took the bottle home and commenced taking it, and find that it does the work effectually; and I am pleased to recommend to all who have kidney or liver disease the use of Hunt's Hemedy, the sure cure."

Mr. Ceorge A. Burdett, No. 165 Front street, Worcester, Mass., has just sent us the following, directly to the point:

humanity is subject to sooner or later, I read carefully the advertisement regarding the remarkable curative powers of Hunt's Remedy, and as it seemed to apply to my case exactly, I purchased a bottle of the medicine at Jannery's drug store in this city, and having used it with most beneficial results in my own case, my wife and son also commenced its use, and it has most decidedly improved their health, and we shall continue its use in our family under such favorable results."

Mr. George W. Holcomb, druggist, 129 and 131 Congress street, Troy, N. Y., writes

'I am constantly selling Hunt's Remedy for diseases of the kidneys, liver, bladder, and urinary organs, to my trade and friends, and find that it gives general satisfaction to all who use it.

Of half the infirmities which mar comfort and aggravate one another is a lack of physical energy, "A B Cs." When he returned home he easily remedied at the outset with a reliable invigorant. As a means of checking premature decay, Hostetter's Stomach Bitters is unrivalled. The functions of digestion and assimilation, always imperfectly performed where there is a loss of vigor and bodilly substance, are aided; nervousness and falling off of appetite are speedily remedied through its agency. Constipation and the Bitters, and the kidneys act more effectively in straining impurities from the blood when it is resorted to as a digretic. Rhenmatic complaints are averted, fever and ague cured and prevented, and the silments to which the aged are specially subject are mitigated by it. Persons who experience difficulty in sleeping soundly, will find that a wineglassful swallowed before retiring will facilitate repose,

In our advertising columns will be found the card of the largest dealer in Auction Goods on the Continent. His purchases are made chiefly at Auctions, at Sheriffs', Marshals', Assignees' and Bankrupt sales, and in any quarter where the need of money compels parties to dispose of their goods. A circular of 16 pages is issued by this house, containing a list of their special bargains, all purchases being made for "spit cash" and sales on the same terms enable the proprietor to offer all goods at figures at least ten per cent, below the lowest market quotations. We call the attention of our readers to this circular, and recommend Mr. Rouss, No. 241 Br. adway, New York City, as a merchant of unquestionable standing and integrity.

It is stated that sackcloth or canvas can be made as impervious to moisture as leather by steeping it in a decoction of one pound of oak bark with fourteen pounds of boiling water. This quantity is sufficient for eight yards of stuff. The cloth has to soak twenty-four hours, when it is taken out, passed through running water and hung up to dry. The flax and hemp fibers, in absorbing the tannin, are at the same time better fitted to resist wear.

Consumption Cured.

A new steel is said to have been produced at Sheffield, England, which is expected to be of incalculable value to the manufacturing and vailroad world. It is said to be made "by adding from 7 to 20 per cent, of the ordinary ferromanganese of commerce to iron either wholly or to a good extent decarbonized and refined and treated by any of the ordinary processes, or to steel produced by such processes," It is stated that a of manganese was bent double when cold, and was sufficiently hard to turn iron; that an axe containing the same percentage, and which had never been hardened or tempered, cut in two a bar of iron half an inch square. A correspendent of "The American Manufacturer," giving these facts, says that the steel is capable of being hammered or rolled the same as ordinary steel, and skowed no magnetic qualities. If these accounts are in any measure correct, the discovery is likely to prove of great economic importance.
