A WRITER says: " Most soils need salt. it is indispensable to plum and pear against the tree; it had better be aphis neighbors were as bad as ever.

THE English adage that sheep pay twice is not so comprehensive as this adage, perhaps of Spanish origin: "The foot of the sheep is golden." Taking the two precepts together, sheep pay three times-once in the fleece, once in the carcass and increase, and once in the perfect distribution of manure and the improvement of the meadow : for. although sheep graze closely, they do not bite so close as the horse, nor gnaw the sward down, often into the roots. It is true that all sheep are not profitable as mutton producers, or rather some are more so than others. So certain breeds of sheep are specially profiable as fleece-producers, yet this does not invalidate, in any way, the genera statement of the three-fold value of sheep, as against other farm stock,

H. V. TRAIN announces his belief that when the cause and cure of sour honey is found the problem of wintering will be solved. He believes sour honey to be the cause of dysentery in bees, saying he never knew a case of disease unless there was sour honey in the hive, nor found sour honey unless the disease was present. He advocates the feeding of thick sugar or wellripened honey as being safe from souring.

CHICKENS when first hatched should not be hurried out of the setting nest. For twenty-four hours, at least, from the time the earliest commence to show themselves, it is better to leave them under or with the hen mother. They need no food from a day to a day and a half usually. When they get strong enough to venture from beneath their mother's wings, it will be time enough to remove the brood.

FALL ploughed ground is best for cabbages, not only on account of the extra pulverization, but because many Plant in rows far enough apart to admit of cultivation with a one-horse

THE youngest cow in the world, to Jones, of Cottage Grove Farm, Berkley into the custard. Heights, N. J. The Jersey Heifer, Galaxy's daughter (20,001), born on the 15th of December, 1882, had her first calf March 17th, when she was only came in when only I year and 5 months

THERE are so many useful purposes for straw that the wise farmer will parsley or celery. Garnish with waterscarcely need to have recourse to fire to get rid of it. It makes an excellent the grass has burned or dried out.

A Hog will live in a small box that he can crawl into to get out of the snow, but a hog or other animal that just lives is an expensive boarder for a man to keep. Six or seven months is time enough to make a nice piece of pork from any well lived weaned pig, and he who takes a year for it is pretty sure to throw away three or four months' feeding material.

PLOUGH up the old cow-yards, running the plough deep, and as many loads of earth as you can remove, so many loads of rich fertilizer you will peaches put in layers are delicious. have, An exchange has read of an enterprising genleman who manured ten acres of grass land with earth from under an old barn, and got enormous growths for several years after.

IT will surprise old-fashioned poultry growers to learn that the common hawk s regarded as a valuable bird. He destroys 100 field nice for every chicken, and if there is a air amount of shrubbery around the henyard, very few chickens will be ost by his depreda-

CREAM cheese is made by pouring cream into muslin, which is placed in a small box or wiker mould; here the cream coagulates by reason of its own accumulating acility, and forms itself into shape as thewhey drains from it, It is ready for consumption as soon as it is firm enough.

will do much to prevent injury by changing the frost to a fine dew. gypsum will at least help shield the plant from burning by the morning

In setting hens a larger number of in the cold water for two hours. Pour chicks will be secured when not over the boiling water on it, add the sugar ten eggs are placed under a hen than and lemon juice, strain through a nap-when more are allowed. Hens should kin and harden. be given only as many eggs as they can secure and comfortably cover.

the juice and rind of one large lemon. raw tomatoes sliced thin, Put this, after beating it well, into a

A PRETTY and not expensive cover for Perhaps a word here in referece to salt | a library table can be made of a square enough to hang over the edge five ruin." trees, they needing from two pints to inches all around. Out the edges into three quarts to each tree, or about six | teeth two inches wide and three inches bushels per acre each year, sown broad- long, leaving the sides straight, and of course." cast and not put in large quantities pointing them at the ends; work a daisy or star with gold-colored silk on plied at different intervals. In a neight the right side of every other scallop, borhood containing large orchards the then turn the cloth and work the same owners were quite discouraged about pattern on the wrong side of the altertheir apples. As they were very wormy nate ones, pinking the edge with a they were all more or less infected. single scallop, pinking fron. Turn the One of the owners resolved to kill or reversed teeth upon the right side, fastcure, and, owning a meat market, he ening, them down with the stitch had a large quantity of old salt and known as crow's foot, done in gold or brine. He applied it in the spring to blue floss in each pinked scallop. the orehards in quantities seemingly Bind the other teeth with silk galloon large enough to kill all the trees. Yet and sew a chemille or worsted ball upon his trees did better than usual, produc- each. Fit the cover at each corner by ing a large crop of sound apples, while cutting out a small square, or by slashing it and turning in a piece each side of the cut. Make eyelets on each side of the opening and lace together with small cord.

A common fruit and spice cake is made of one cupful of butter, two cupfuls of sugar; beat these to a cream, then add two well-beaten eggs, the whites and yelks beaten together, a large handful of currants, a quarter of a pound of citron cut in small bits, one teaspoonful each of grated nutmeg, cinnamon and cloves, half a cupful of sour milk with a quarter of a teaspoonful of soda dissolved in 1t, and three cupfuls of flour. This cake requires nearly an hour for baking in a moder-

VINEGAR is better than ice for keeping fish over night. Housekeepers who are obliged to be economical should have their fish sent home toward night, and then, by putting a little vinegar on the fish, keep it perfectly well even in very hot weather. Fish is really improved in flavor under this treatment. Fish which has been kept in ice during the night, and been exposed on the shop-board during the day, being frequently watered to make it look less stale, undergoes changes which destroy both flavor and nourishment.

BEEF CROQUETS. - One cup of lean beef; half a cup of the fat, half a cup of cold boiled or fried ham; a piece of onion as large as a silver dollar; one teaspoonful of salt, half a teaspoonful of pepper, a pinch of sage and a little grated lemon peel. Chop all as fine as possible, or put through a mincing machine. Heat, with half a cup of stock or cold soup, and add one egg well-beaten; form into croquets; roll in egg and bread crumbs and fry in boiling lard.

CUSTARD made in this way is delicious for filling of a layer cake: Heat a coffee cup of sweet milk in a bright tin basm, eggs and larvæ have been destroyed by beat one egg very light and beat with exposure to the frost. They require a it unitl smooth one heaping teaspoonrich, sandy soil, and if planted on a ful of flour, add sugar to suit the taste; heavy, wet clay, failure will be certain, when the milk is hot, stir the flour, eggs, etc., into it; it will thicken in a very few minutes. Take it from the fire and flavor with lemon; if you our knowledge, belongs to Mr. G. M them in three or four pieces and stir Please send me another gross."

Boiled Potatoes,-Have ready some cold boiled white potatoes left from the previous day. Cut them in slices less than half an inch thick. Dip each one year and three months old; another slice in melted butter and dust with heifer belonging to the same gentleman, cracker crumbs, and broil over a clear fire. Arrange on a pot dish, putting a tiny bit of butter on each slice, and sprinkle with a little finely-chopped

A DECORATIVE catch-all, or receptacle mulch for all kines of fruit trees and for burnt matches, to hang in a corner, berry vines. Use it for bedding and is made by taking the rivet out of a by frequent charging increase the Japanese fan and running a cord in compost heap. Spread it on dry knolls place of it to tie the sticks together and places in meadows or pasture where over a tin or pasteboard cornucopia, Bright ribbons are woven in and out of the sticks, which should be black, and a bow with long loops hangs from the point, while a ruche of fringed silk or quilted satin ribbon finishes the top.

> CRANBERRY PUDDING .- Pour boiling water on a pint of bread crumbs; melt a tablespoonful of butter and stir in. When the bread is softened add two eggs and beat thoroughly with the bread. Then put in a pint of the stewed fruit and sweeten to your taste. Bake in a hot oven half an hour. Fresh fruit of many kinds can be used instead of the cranberries. Slices of

> CHICKEN FRITTERS,-Cut into neat pieces some tender cold chicken and let them stand awhile in a mixture of lemon juice, salt and pepper. Make a batter of milk, egg, flour and salt, stir the chicken into it, and fry in hot butter, a bit of chicken in each spoonful of butter. Serve very hot, first draining off all the fat. Garnish with pars-

THE large lace tidies with deep scalloped edges are made very crnamental if they are tied tightly in the centre; then spread out the ends after the style of a butterfly's wings, and after pinning them in place put a large bow of broad bright-hued ribbon just above the place where the tidy is tied.

A HIGH authority in cooking recommends that when baking a custard you should set the basin or pudding-dish containing it into another dish filled It is said by those who have tried it with hot water; this keeps the temperthat a dressing of gypsum spread over ature more even, and the danger of frostbitten plants early in the morning scorehing is entirely done away with. A more delicate flavor is insured also.

> LEMON JELLY. - Two cupsful of sugar, one of lemon juice, one quart of boiling water, one cupful of cold water, a box of gelatine. Soak the gelatine

TENDERLOIN ON TOAST .- Cut pork tenderloins in very thin slices, stew Lemon Butter to fill tarts with is made of one cup of white sugar, three eggs, butter the size of half an egg, brown; serve on buttered toast and them in a little water till they are

bright basin and set into a pan of boiling water. Stir it constantly until it is defense)—"Is it myself that underthick. Small cakes are nice if split and stands the nature of an oath? Faix, and Legs! Wy, I thought yer wanted a put together with this jelly. C. ASTHMA.

Hitherto it has puzzled eminent surgeons to account for sudden death caused by apparently madequate wounds in the heart, such as those made by the prick, without penetration even, of a needle. Herr Schmey, a student of the Physiological Institute. Berlin, has, however, just discovered that when a needle pricks a certain small spot on the lower border of the upper third of the septum cordis, quite instantaneously the movements of the heart are arrested and forever set motionless in death. "It is now the task of anatomical investigation," says Prof. Kronecker, who verified the discovery of his pupil, Herr Schmey, and communicated it to the Physiological Society of Berlin, "to demonstrate with accuracy this vital centre, the existence of which has been proved experimentally.

A writer gives the following means of separating the solar heat rays from the light and chemical rays: Fuse a drop of distilled selenium, place it upon a plate of glass, and cover it immediately with another thin plate of glass. Compress the rod by means of a small rod so that it spreads evenly into a very thin film between the two plates. This operation is performed upon a metal plate kept at a temperature of 25° C., and when it is finished the glass plates are allowed to cool slowly under pressure. worse than that; he might play the If the operation is successful the chemical rays will be reflected while the visible rays will be absorbed and converted into electrical energy, the heat rays only passing through the glasses inclosing the selenium film, and undergoing thereby a peculiar refraction of which the exact nature is not yet known,

> As a garnish for roast spare rib or for pork chops, cut some tart apples in eighths, drop them, after peeling, into boiling lard; when crisp on the outside remove them with a skimmer, drain them well and send them to the table hot.

> An emment scientist says that when a lady cannot sit down without her nose becoming red, it shows that there is imperfect circulation of the blood, caused by tight lacing.

Same with gentleman. A red nose is a sure sign of tightness somewhere.

THE papers are publishing the net that a brass band gave a concert for the benefit of flood sufferers, but before the band had finished the first tune the sufferers jumped right back into the water,

"YES," sighed a broken down man who had given his signature to oblige a friend," the most foolish thing I ever done in my life was to learn to write my own name.

"YES," said the seedy tragedian, dly, "I was born to play Hamlet, sadly, "I was born to play Hamier, but I never got further than the early village cock, in 'Richard III.;' but you should have heard me crow."

A gentleman from Orwell, Par, called my attention to Ely's Cream Balm as a remedy for Catarrh, Hay Fever, etc. He was so earnest in asserting it to be a posttive cure (himself having been cured by it) that I purchased a stock. The Balm has already effected cures .- P. F. Hyatt, M. D., Bordentown, N. J.
