CARL SCHURZ HAS VIEWS.

He Talks of the German Defection from Blaine. [From an Interview in the St. Louis Globe-Demo-crat.]

"Whom will you support then?" asked "Whom will the independent republicans support ?" said Mr. Schurz.

'Yes, if you put it that way.' "It depends entirely upon the democratic party. Passing over the conventional talk about the democratic party being depended upon to do the wrong thing at the wrong time and to secure their own defeat, I will say that a man like Cleveland, of New York, or Bayard, of Delaware, can beat Blaine.

"And why do you think so?" "Because the nomination of either means the loss to the republican party of New York, New Jersey and Indiana. It sin will be rendered more doubtful than it is now.

"Is it doubtful now?" "Yes, because of its great German population. The Germans cannot support His nomination means that Massachusetts is doubtful. It means that Ohio and Illinois are doubtful.' "Why Massachusetts?"

"For the same reason that Ohio and Illinois are doubtful." "Blaine is the representative of that principle which has crept into the poli-

tics of this country-a desire to acquire office to enrich the holder. "Perhaps this German defection is overestimated?" "It is not. Hardly had the news of the

than such papers as the Milwaukee Freie Westliche Post, the Illinois Staats-Zeitung, the Detroit Post, the Buffalo Freie Presse, the Belleville Zeitung, and the Pittsburg Freiheits Freund and a dozen-of other innomination."

Cincinnati is superstitiously interested in the case of a woman who falling asleep in a railroad train, dreamed vividly that her child at home had been seriously hurt. She was so deeply impressed by the vision that, on arriving in the city, the vacancies occasioned by the expira-tion of the terms of Victor E. Piolet and she drove directly to a physician's office and carried him hastily to her residence, where the youngster was found to have been thrown from a swing at precisely the time that the mother had dreamed. The story is told circumstancially by the persons concerned.

Mrs. Stratton, better known as Mrs. Tom Thumb, the widow of the dwarf, is quite sensitive as to her size, and will only receive the most necessary help from others on that account. For example, when she enters a railway train or a street car, she seats herself at some inconvenience, by a nimble backward jump, rather than accept the aid of another to lift her into a seat. Once settled in place, the little woman sits upright in prim dignity, with her tiny feet dangling from the floor. The companion who is always with her never offers to assist on such occasions, in accordance with Mrs. Stratton's well-understood desire.

It Is True

That stable manure is a first-class fertilizer. It is also true that Animal Bone Phosphates are first-class fertilizers. We know that it costs some farmers as much as \$30 and \$40 per acre for stable manure, while 1/2 of the amount invested in Animal Bone Manures would give as good results. Yet all we ask farmers to Baugh's Raw Bone Manures, and thereby find that they pay a large percentage of profit upon the investment.

500 pounds of the \$25 Phosphate, at \$25 per ton, in Philadelphia, costs \$6 25. Some farmers think 400 pounds per acre enough.

2 bags of the \$25 Phosphate, each 200 pounds, will give you 400 pounds for \$5. TRY IT!
