

ISLAND HOME Stock Farm, GROSS, IL. WAYNE CO., MICH. SAVAGE & FARNUM, PROPRIETORS.

Percheron Horses.

All stock selected from the best of sires and dams of established reputation and registered in the French and American stud books.

WATCH THE KIDNEYS.

They are the most important secretory organs. Into and through the kidneys flow the waste fluids of the body, containing poisonous matter taken out of the system.

KELLER'S CATARRH-REMEDY

THE GREAT BLOOD PURIFIER OF THE WORLD. Catarrh has become so prevalent that it is truly the scourge of the American people.

Millheim Plating Mill. Furnishes and Keeps on Hand SASH, DOORS, FLOORING OF ALL KINDS, SIDING, SHUTTERS, BLINDS, MOULDING OF ALL KINDS, STAIR-RAILING, etc., etc.

MILES UNDER THE SEA.

Many curious forms of fishes have recently been found in the deep sea, says a contemporary. One fish, dredged from a depth of nearly three miles from the surface, shows a complete modification of structure.

Snlight penetrates about twelve hundred feet below the surface of the sea. At three thousand feet the temperature lowers to forty degrees Fahrenheit, and from about the same, the world over—just above freezing. How do the fishes and other forms here see? Their eyes are modified as well as their other parts.

One of the most ferocious of these deep sea forms is the channiodon. Its mouth is fairly overflowing with teeth, that protrude in a forbidding manner.

Gen. William Preston, of Kentucky, is a character. He was our Minister to Spain when the war began and afterward chief of staff to Albert Sidney Johnston.

A NOTABLE KENTUCKIAN.

Gen. William Preston, of Kentucky, is a character. He was our Minister to Spain when the war began and afterward chief of staff to Albert Sidney Johnston.

Scientific

Huxley's acceptance of Darwinism is given in these words: "I adopt the theory of Darwin under the reserve that proof should be given that physiological species can be produced by selective crossing."

An application of gun-cotton is said to have been made in such a manner that it will eventually supersede the use of steam for the purpose of light locomotion and driving small machinery.

Writing from Lynn, Mass., a correspondent reminds the Scientific American that, as an instance of a remarkable flight of an exploded boiler, about two years ago a boiler exploded in that city, and the flying portion, describing a circle high in the air, landed 900 feet from where it started.

Dr. Gore, in a paper on the electrolysis of fluoride, chlorate, and perchlorate of silver, has shown that the use of these salts is readily decomposed by using electrodes of silver and an electric current derived from a single cell composed of zinc and platinum in dilute sulphuric acid.

Chronic Dysentery.

Mr. James Brannan, Second avenue, Pittsburgh, Pa., writes: "For two years I have been constantly troubled with a chronic diarrhoea, or dysentery, having had, on an average, from twenty to twenty-five passages every twenty-four hours, and every one bloody. I had thoroughly tried all the prominent physicians in Pittsburgh, was twice in the West Penn Hospital, the first time thirteen weeks, and though I left it much better, yet in five days I was as bad as ever."

Mr. Patrick Burns, Pittsburgh, writes: "I have suffered intensely from piles and chronic diarrhoea. I was treated by five of the best physicians and surgeons in the city of Pittsburgh, and with all grew constantly worse. Finally three of them said my only hope was an operation. This frightened me, and I went immediately to Dr. Hartman, who has entirely cured me with PERUNA. I will take it whenever I need it."

Charles Frank, of Emrichville, Jefferson county, Ohio, writes: "I had piles and fistula in ano for four years. I had suffered constantly with a discharge of matter from the parts, and sometimes from the contents of the bowels through it. I could not have borne it much longer."

Monuments and statues cast from refined zinc are given a sparkling appearance by directing a sand blast under steam pressure upon them so that the sand cuts the surface but does not adhere to it.

A paper on the movement of Hyperion, by Prof. S. Newcomb, has been read before the Academy of Sciences, Paris. The conclusion arrived at is that all the conjunctions of Hyperion with Titan take place near the apse of the latter satellite.

With regard to securing pure, healthful milk the following opinion by Prof. Foser, of Munich, has been quoted by N. Gerber: "It is desirable to prevent the sale of milk which is below a certain standard as good milk, even if it be simply the unadulterated product of single animals reared under insufficient and faulty feeding."

An architect thus recommends the use of copper as a roof-covering in place of tin: "We always specify the use of copper for covering roofs when we can induce owners to allow us to do so, on account of its durability, although its cost is about \$14 per 100 square feet over the price of tin roofing."

George Lawson, of Dalhousie College, Halifax, Nova Scotia, writes as follows on wasps as fly-killers: "In this part of the world wasps enter dwellings by the open windows, in summer time, and hunt flies unmercifully, leaving the dead in hundreds on the floors, ready to be swept into a dustpan. This occurs only in the country and where wasps' nests are near by."

At the requisition of the prefect of Police, Paris, MM. Dujardin, Beaumete, Pasteur, and Roux performed experiments with the view of ascertaining what would be the best gas for disinfecting rooms in which patients suffering from contagious diseases had sojourned.

Our black silks at \$1.50, \$1.75, \$2 and \$2.25 are guaranteed not to crack or wear shiny—See Hive.

NO SURPRISE!

THE AMERICAN AGRICULTURIST. (From the 10th Census, Vol. 8, just published.) The American Agriculturist is especially worthy of mention, because of the remarkable success that has attended the unique and untiring efforts of its proprietors to increase and circulate its circulation.

WHAT IS IT TO-DAY? Six months ago the American Agriculturist entered upon a new career of prosperity, and to-day it is in the hands of a new proprietor, who has entirely reorganized the paper, and presenting in every issue the condensed and original reading matter from the ablest writers, and nearly 100 illustrations.

WHAT FREE?? Every subscriber, whose subscription is immediately forwarded to him, receives the American Agriculturist (single or annual) for all of 1894, and is presented with the American Agriculturist Family Encyclopedia, (just out) 700 pages and over 1,000 engravings, strongly bound in cloth, black and gold.
