ad Commotion Caused by that published in these colntly from the Rochester, emocrat, created a deal of ere, as it has elsewhere. commer it caused even more com-Apparer Rochester, as the following motion in ame paper shows:

from the

Dr. J. H. Henion, who is well-known not only in Rochester, but in nearly every part of America, sent an ex-tended article to this paper, a few days ago which was duly published, detail-ing his remarkable experience and rescue from what seemed to be certain death: It would be impossible to enumerate the personal enquiries which have been made at our office as to the validity of the article, but they have been so numerous that further investigation of the subject was deemed an editorial necessity.

With this end in view a representative of this paper called on Dr. Henion at his residence on Andrews street, when the following interview occurred: "That quite a whirlwind. Are the statements in, and the way you were rescued such it can be cured. as you can sustain?"

Every one of them and many additional ones. I was brought so low by neglecting the first and most simple symptoms. I did not think I was sick. It is true I had frequent headaches; felt tired most of the time; could eat nothing one day and was ravenous the next; felt dull pains and my stomach was out of order, but I did not think it meant snything serious. The medical profession have been treating symptoms instead of diseases for years, and it is high time it ceased. The symptoms I have just mentioned or any unusual action or irritation of the water channels indicate the approach of kidney disease more than a cough announces the coming of consumption. We do not treat the cough, but try to help the lungs. We should not waste our time in trying to relieve the headache, pains about the body or other symptoms, but go directly to the kidneys, the source of most of these ailments."

"Tois, then, is what you meant when you said that more than one-half of the deaths that occur asise from Bright's disease, is it Doctor?"

"Precisely. Thousands of diseases are torturing people to-day, which in reality are Bright's disease in some of | tically to wash out his stomach. its many forms. It is a hydra-headed monster, and the slightest symptoms should strike terror to everyone who has them. I can look back and recall hundreds of deaths which physicians declared at the time were caused by paralysis, apoplexy, heart disease, pneumonia, malarial fever and other common complaints which I see now were caused by Bright's disease.

"And did all these cases have simple symptoms at first?" "Every one of them, and might have been cured as 1 was by the timely use of the same remedy. I am getting my eyes thoroughly opened in this matter and think I am helping others to see the facts and their possible danger also."

Mr. Warner was visited at his establishment on North St. Paul street. At first he was inclined to be reticent, but learning that the information desired was about Bright's disease, his manner changed instantly and he spoke very earnestly.

"It is true that Bright's disease had increased wonderfully, and we find, by reliable statistics, that from '70 to '80 its growth was over 250 per cent. Look at the prominent men it has carried off. Everett, Sumner, Chase, Wilson, Carpenter, Bishop Haven, Folger, Colfax and others. Nearly every week the papers record the death of some promiprotecting coat of manure, or other neut man from this scourge. Recently, of my remedy.

Do you think many people are afflicted with it to-day who do not realize

it, Mr. Warner?"

A prominent professor in a New Orleans medical college was lecturing be- active state throughout the winter and fore his class on the subject of Bright's a protection to the roots promotes this disease. He had various fluids under activity, and by this means enables the microscopic analysis and was showing parts above ground especially to bear the students what the indications of this terrible maisdy were. 'And now, gentlemen,' he said, 'as we have seen the unhealthy indications I will show you how it appears in a state of perfect health,' and he submitted his own fluid results his countenance suddenly changed-his color and command both left him and in a trembling voice he said: Gentlemeu, I have made a painful discovery; I have Bright's disease of the kidneys.' And in less than a year he was dead. The slightest indications of any kidney difficulty should be enough to strike terror to anyone.' "You know of Dr. Henion's case?"

"Yes, I have both read and heard of 1t?" "It is very wonderful, is it not?"

"No more so than a great many others been cured by the same means." "You believe then that Bright's dis-

ease can be cured." "I know it can, I know it from my own and the experience of thousands of prominent persons who were given up to die by both their physicians and

"You speak of your own experience, what was it?"

of the case of Mr. H. H. Warner some three years ago, Doctor?" "Yes, sir."

"What did this analysis show you?" "The presence of albumen and tube casts in great abundance." "And what did the symptoms indi-

cate?" "A serious disease of the kidneys." "Did you think Mr. Warner could

recover?' "No, sir, I did not think it possi-

"Do you know anything about the remedy which cured him?" "Yes. I have chemically analyzed it

and find it pure and harmless.' We publish the foregoing statements in view of the commotion which the publicity of Dr. Henion's article has caused and to meet the protestations which have been made. The doctor was cured four years ago and is well and attending to his professional duties to-day. The standing of Dr. Henion, Mr. Warner and Dr. Lattimore in the community is beyond question, and the experience shows that Bright's disease article of yours. Doctor, has created of the kidneys is one of the most deceptive and dangerous of all diseases, about the terrible condition you were that it is exceedingly common, and that

> A POINT ABOUT WATERING .- When convenient, horses should be fed at short rather than at long intervals. The small size of the stomach precludes the horse from rapidly digesting a quantity of food sufficient to serve him for a long period. This applies with even greater force to watering. It is a very common practice to water horses only three times a day, the water being by some given before meals, and by others afterward. Whichever of these plans is adopted, the system is bad; but is worst when the latter method is adopted. For when the horse, with his small stomach already filled with food, injects a large quantity of water, a great tried Ely's Cream Balm, and much to portion of the food must be washed out into the intestines before the gastric marked improvement. We continued juice has had time to act on it. And if it even in the fasting stomach, then water- | Cary, Corning, N. Y. ing before meals must wash away this juice into the intestine, where it is of no service. Horses should therefore have water at short intervals, and when practicable they should have free access to it in their mangers. When this is the case the horse drinks frequently, but never in quantities so great as prac-

POTASH FOR FRUIT TREES, -As illustratiog the beneficial effects of potash upon the health of peach trees, Mr. J. Hale states that he applied to an orchard of 8500 trees at the rate of 800 pounds per acre, and that not more than one or two trees in the whole lot showed any signs of yellows, or any other disease, while of another orchard of 500 trees, to which potash has been applied, thirty per cent, are already dead. The states ment was made at the winter meeting of the Board of Agriculture, Mr. J. B. Rogers of New Jersey, reported a similar experience with the use of potash in peach orchards. He, however, found that muriate of potash is much better kins, Walton, Ind. than the sulphate for giving peaches a healthy growth. Prof. Jenkins of the Connecticut Experiment Station, found by the analysis of the wood of healthy and diseased trees, that the latter are deficient in ash constituents. Potashis a cheap fertilizer, and its use in all kinds of orchards should be extended until the ash of the virgin soil is restored.

LATE MULCSING: It is still a suitable time for mulching in the crehard and garden, even though quite a crust of material over the roots to guard against however, the increase has been checked heavy freezing. If manure is used it and I attribute this to the general use may be in such a state of decomposition that, while coarse enough to arrest and hold snow, yet by lying exposed to the elements until Spring it will readily spade in and serve as a fertilizer. All plant and trees are in a more or less severe cold and wind the easier.

To Examine a Horse,—A good horse will always show well standing at rest, The man showing a horse for sale who to the usual test. As he watched the keeps the animal constantly stopping about, to show off, is to be looked upon with suspicion. The time to examine a horse is when he is at rest. It is then that his weak points will be shown. If the horse "files up" at some object on the ground, nearsightedness may be suspected. If brought suddenly into the light, from a dark stable, and the light oppresses him, his eyes are weak. His gait and speed should be tested by actual service. At rest, if the horse is sound, he will stand square on his limbs, without moving any of them, the feel being placed flat on the ground, and alt hat have come to my notice as having his legs plump and naturally placed. If one foot be thrown forward, with the toe pointing to the ground and the heel raised, or if the foot be lifted from the ground, and the weight taken from it, disease or tenderness may be suspected.

In old times the agriculture of Scotland was execrably bad. Hardly any wheat was attempted to be grown; oats full of thistles was the standing "A fearful one. I had felt languid crop, and this was repeated on the and unfitted for business for years.

But I did not know what ailed me. would produce twice the amount of seed When, however, I found it was kidney difficulty I thought there was little hope and so did the doctors. I have since learned that one of the physicians of accumulated on the farm was put on a this city pointed me out to a gentleman on the street one day, saying: There goes a man who will be dead within a which was made bannock-cakes, broth, year.' I believe his words would have proved true if I had not providentially used the remedy now known as Warner's Safe Cure."

small beer, and very often whiskey. Now the agriculture of Scotland is probably the best in the world. Beautiful fields of wheat, sown with the drill, Dr. S. A. Lattimore, although busily engaged upon some matters connected with the State Board of Health, of which he is one of the analysts, courteously answered the questions that were propounded him:

"Did you make a chemical analysis

God created the coquette as soon as he had made the fool.

Joyfuliy Astonished. Mr. James Brunt, Deputy Sheriff, Baltimore, Maryland, writes: In an experience of thirty years I have become acquainted with numerous so-called specifics for coughs and colds, but never before experienced such surprising effl cacy as was obtained from the Red Star Cough Cure. I was attacked with a severe deep-seated cold and cough, I suffered for some time, and tried this valuable remedy. I was completely cared by the use of one bottle,

Nothing is so credulous as vanity, or so ignorant of what becomes itself.

The Record of the Fairs. The superiority of Wells, Richardson & Co's. Improved Butter Uclor over all others made, is again demonstrated by its record at the Annual Fairs. The test of practical use is what tells the story, and the great value of the premiums given by the Agricultural Fairs, statements they make, cannot for a lies in the fact, that the judges in these moment be doubted. Dr. Henion's cases are regular farmers, who know what their needs are and what will supply them. Wells, Richardson & Co's less like parrots. One day a man went Improved Butter Color, which has taken into the Hiogo telegraph office with a first premium at all fairs where exhib- message to be sent to Osaka. ited, is put up in a vegetable oil so prepared that it cannot become rancid, a most important property, the lack of which is fatal to so many of the Butter Colors offered for sale, It does not color the butter-milk, it imparts a bright natural color, which is unattained by many others; and being the strongest is the cheapest Color in the market.

> We find beauty in itself a very poor thing unless beautified by sentiment.

ONE OF my chudren, a girl about nine years old, had a very bad discharge from her head and nose of a thick, yellowish matter, and was growing worse, We had two different physicians prescribe for her, but without benefit. We our surprise in three days there was a using the Balm and in a short time the be the case that gastric juice is formed discharge was apparently cured .- O. A.
