THE EXPERIMENTAL STATION.

ED. REPORTER: Dear Sir-The articles I have seen in the county papers about the proposed experimental station at the State College have ledme to investigate the matter and I have learned the following facts:

1 That the bill now before the legislature does not give one dollar directly nor indirectly to the unchanged. Both sides continue firm State College.

2 That the station is placed under the absolute and entire control of a board of managers composed of the Governor, President of the State Agriultural Society, Secretary of the State Board of Agriculture, and two members elected by said board; also, the President and Professor of Agriculture of the State College, Master of the State Grange and two other members, to be elected by the board as above constituted. 3 That the State College is required to furnish

laboratories and land for the use of the station free of charge to the station or to the state, thereby saving to the state the amount which would otherwise have to be appropriated for buildings, fact we mark none of our goods in cipher or out the latter part of January but there grounds, &c., for which some states have appropriated not less than \$25,000.

THE MISTRESS OF THE WHITE HOUSE.

Yet there is nothing mannish about her and in private is rather too modest than otherwise. Her voice is elear and her articulation distinct, making her a fine speaker. She has given frequent lectures at the Elmira Female College, which have been very popular among the young la-dies. Her name is found in the last catalogue in the faculty as lecturer on mediæval history. The country may congratulate itself upon having so intelligent and public-spirited a Christian woman in the White House.
